could threaten **EU trade truce**

The US House of Representatives was last night poised to reinforce the Helms-Burton anti-Cuba law with a measure which would put pressure on the State Department to bar more foreign executives of companies investing in Cuba from antering the US. If the measure passes the Senate, the truce between the US and the European Union, which averted a damaging trade dispute over Helms-Burton in April, will be in danger of coming apart. Page 14

Wall Street pushes Footsie to new high

An early rise on Wall Street, and a sense that institutions were putting some of their spare cash into the market helped the FTSE 100 index climb 52.9 points to a closing high of 4,739.6. in New York the Dow Jones Industrial Average looked on course for another closing high, leap-ing past the 7,500 mark on optimism that US interest rates would not need to be raised. At Ipm New York time, the Dow was 50.2 points higher at 7,528.7. London stocks, Page 30; World stocks, Page 34

US move on Cuba New York gives tax break to Merrill Lynch

By Richard Tomkins in New York

New York City yesterday approved a plan to give Merrill Lynch tax breaks worth nearly \$28m to induce the investment banking and brokerage company to keep its worldwide headquarters in the city for another 15 years.

It is hoped the deal will help create 2,000 jobs over the

The plan is the latest contro-

versial deal struck by New York with companies in the financial sector to justify its claim to be the financial capital of the world.

It comes just six weeks after the city agreed to give Stan-dard & Poor's, the US credit rating agency, incentives worth \$23.7m to stop it leaving for Jersey City, New Jersey, and up to \$10.8m more if it adds 2,615 jobs in Manhattan over the same period.

In the last five years, 29 com-

panies and financial institutions have received incentives running into bundreds of millions of dollars after threatening to leave New York.

They include ING Barings, Republic National Bank, Dilion Read, Travelers, PaineWebber. Prudential Securities. Morgan Stanley and the New York Mercantile Exchange.

The city says the tax breaks preserve existing jobs and create others, and that the cost is outweighed by the tax reve-

nues generated by companies that would otherwise have

New York has suffered severe job losses in the banking sector, partly because of a wave of mergers and partly because advances in technology bave made it easier for companies to move away from Wall Street.

Critics, however, say the deals do more harm than good. "The trouble with giving these tax breaks is that they increase the tax burden on other businesses not powerful enough to wring them out of the city government," said Mr Myron Magnet, editor of City Journal, an urban affairs quarterly published by the Manhattan Institute, a right-wing

"Precisely those small, jobcreating businesses that the city should be fostering find themselves depressed by this policy. What the government

French face EU clash over stance on Emu

By Andrew Jack in Paris, Neil Buckley in Strasbourg and Peter Norman in Bonn

France's new Socialist-led government appeared to be heading for a clash with its European Union partners last night, after leaders of five other EU states said there could be no changes to the stability pact that will accompany the single currency. The five heads of govern-

ment - including Chancellor Helmet Kohl of Germany, and the premiers of Italy, Belgium, Luxembourg, and Spanish foreign minister Mr Abel Matutes agreed "unanimously" at a special summit in Strasbourg that the stability pact had to be ratified as planned at next

week's Amsterdam summit. Mr Jacques Chirac, French president, also said he hoped the pact, designed to enforce fiscal discipline in the future euro zone, would be ratified at Amsterdam, in the first sign of open disagreement with the

Mr Chirac's comments stood in stark contrast to remarks made on Monday by Mr Dominique Strauss-Kahn, the new social ist finance and industry minis ter, who said France needed more time to study the

government of Mr Lionel Jos-

Mr Wilfried Martens, the former Belgian prime minister who chaired last night's Strasbourg summit of centre-right leaders, said the leaders wanted both the stability pact and the new EU treaty to con-

clude the year-long intergovernmental conference agreed at Amsterdam.

"We reject any form of change within the stability pact," he said, "Governments have committed themselves to it and we want [it] signed as it is by the 15 countries of the Ruropean Union [next week]." He added that France's concerns about growth and

employment creation could be dealt with by "properly applying" two articles of the EU Treaty dealing with employment - perhaps with a special declaration emphasising them added to the Amsterdam con-Speaking in Berlin yester

US utility in '\$5.86bn' takeover talks

By Simon Holberton and Ross Tieman

The Energy Group, the UK electricity and coal company recently demerged from Hanson, was last night in talks with PacifiCorp, a big US utility, which could lead to a recommended takeover bid by PacifiCorp worth more than £3.6bn (\$5.86bn).

The company said that any hid would be at a 20 per cent premium to yesterday's closing price of 580p a share, giving a

value of 696p, or £3.63bn. Details of the approach were made to the stock exchange after the Takeover Panel que-

ried an increase in Energy Group's share price, which

results due tomorrow, signalling that an offer could he imminent. DKB purges 21 directors over racketeers scandal

By Gillian Tett in Tokyo

Dai-Ichi Kangyo, Japan's second largest commercial bank, yesterday purged 21 directors, including the former president and chairman, in Japan's biggest board resignation in the wake of the corporate racketeers scandal.

The directors resigned from ____\$343.7 (343.9) DKB's 40-strong board to take responsibility for recent revelations that the company had financial links with corporate racketeers or sokaiya, who demand payments from companies in exchange for not revealing sensitive information about them. Mr Katsuyuki Sugita, the 54-

> approval of the shareholders' meeting later this month. Meanwhile Tokyo prosecutors arrested four more senior DKB executives, including Mr Tsuneo Uchida, the former

> vice-president, and Mr Kenji

year-old managing director,

will become president after the

Tanaka, president of Jusco, one of Japan's largest retailers. Mr Tanaka had worked at DKB before joining Jusco in 1995 and becoming president last year. Jusco insisted it had no link with the scandal.

The arrests, which follow those of four middle-ranking DKB officials, reflect the Jacanese authorities' determination to show firm action against financial scandals.

DKB said yesterday's resignations had removed any link with the scandal. In a break with traditional practice, the former directors would not be retained as "advisers".

Mr Hiroshi Mitsuzuka, Japan's finance minister, warned that DKB would need to take drastic action to prevent the scandal recurring. DKB should not seek to fix things by merely reshuffling personnel." he said.

Mr Sugita is regarded as young enough to have avoided any contact with the sokania

Pull together on jobs, urges Flynn

Employment Editor,

The European Commission should join forces with EU governments in co-ordinating employment policies across the Union, Mr Padraig Flynn, the social affairs commissioner, said yesterday.

"The employment chapter we want in the treaty at next week's Amsterdam intergovernmental conference will help to provide a focus in giving social affairs a much stronger role," he told the FT. "I know the Commission does not create jobs; that responsibility lies with member states. But we have to underpin their efforts."

With 18m people unem-

and recent election victories the west of Ireland, Mr employability." for the left in France and Britain, the draft employment chapter has assumed increasing importance. The new French and British governments, though far from united on the best way to create jobs, differ from Germany's roling centre-right coalition in Wanting a strong emphasis at Amsterdam on

Mr Flynn said that, if Europeans were to accept the single currency, they would have to be reassured about social cohesion and stability. He noted, however, that "we don't want to return to the lax fiscal controls of the past that gave Europe its unemployment". A canny conservative poliFlynn has been in the social affairs post since January 1993 and has two and a half years more to go. "I am a moderniser," he insisted. "I believe in flexible labour markets. It was me and not Tony Blair Sthe UK'a Labour prime minister] who invented the idea of a third way between the neo-liberal US and an over-regulated

social Europe. "I want high-quality, skilled workers who embrace change and don't resist it. I recognise the need for downsizing and restructuring but I want it done in a sensitive, sensible way. Regulation should only be necessary when it satisfies a need. There has to be flexibility

- Allour EBRD's new vice president named

By Anthony Robinson, East Europe Editor, in London

The two-month search for a new vice president for the European Bank for Reconstruction and Development has ended with the selection of Mr Charles Frank, the 60year-old vice president of GE Capital Services, to replace

Mr Ronald Freeman. Mr Frank, a US citizen, has no prior experience of lending to the former Communist countries served by the bank, but he has an extensive record in project financing. He also served four years as deputy assis-tant secretary and chief economist on the policy planning staff of the US State Department in the 1970s after a stint st the Brookings Institution and as an economics professor at Princeton University.

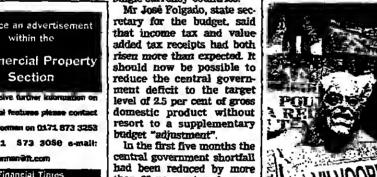

As first vice president of the EBRD Mr Frank will have ultimate responsibility for banking operations in an institution which has lent more than \$10bn to the region over the past six years and whose capital was doubled last year to \$20bn. He will chair the weekly credit committee meeting and provide strategic and ement direction.

The US is the largest singie shareholder in the bank, which was set up in 1991 to help finance the transition of former Communist states to a market economy. The top banking job is informally reserved for an American candidate.

Mr Frank was first approached a month ago about taking the post by Mr Ernie Stern, formerly managing director of the World Bank and now a senior executive of JP Morgan, This was after the original candidate backed off and the US Treasury failed to come up with

one of its own. For the past nine years Mr Frank worked at GE Capital, latterly as managing director of the structured finance group specialising in global project finance and other structured finance products. Earlier, be beaded the group's global energy financing and international project finance section.

Before that, be was at Salomon Brothers for nine years after being recruited in 1978 by Mr Freeman who is now returning to Salomon's as the bank's London-based joint head of global investment banking after six years at the EBRD.

At 65, Taiwan InnovalueSM put the Reverend Harrold back in the saddle again.

Until recently, the Reverend Harrold loved cycling. He would pedal miles to visit his flock. But the hills got steeper. And his breath got shorter.

Then, miraculously, he discovered the new Pedcon, a variable assistance bicycle from Merida in Taiwan. Its tiny sensor detects when more energy is needed and triggers an electric motor to help the weary cyclist.

In Taiwan, we call this kind of ingenuity "Innovalue": that is, innovation in design and manufacturing that gives added value to high end products. For example, when Tecom developed its new affordable TCM-1 Wireless Access telephone system for people without wirelines, that was Innovalue.

If you're interested in how Innovalue can improve your area of products, contact us by fax or the Internet. We have hundreds of ideas, products, and especially values that are VERY WELL MADE IN TAIWAN.

carry this Symbol of Excellence. It is awarded by a penel of judges only to those products which excel in quality and innovation. TAIWAN.

The age of the multiplex cinemas arrives in China

By James Harding in Shanghai

China'e first modern 12-screen multiplex cinemas are to open next year in Shanghai and Guangzhou, promising movie-goers, disenchanted with dilapidated local film-houses,a taste of luxury entertainment.

Golden Harvest, the Hong Kongbased film company, is in final negotiations to open 2,000-seat multiplexes, which will offer the widest choice to the largest audiences in China.

Partly to help meet the demand likely to be generated by its own cinemas, the company has also launched a \$30m fund to invest in Chinese filmmaking, together with a number of Singapore-based companies.

Golden Harvest, which has produced hundreds of Chinese films, notably kung fu movies starring Bruce Lee and Jackie Chan, is looking at 30 other sites in China and has announced a venture with a Singapore partner to build a six-screen cinema in Shanghai.

the two 12-screen entertainment centres marks a breakthrough for foreign involvement in China's state-controlled film industry. Cinemas have only recently been opened to foreign investment and the Beijing leadership remains reluctant to open the door to Hollywood, fearing an onslaught of western "spiritual pollution".

In 1996, the authorities allowed just 14 foreign films to be be distributed on

thirds of movies shown must be made in China, with content sanctioned by the state. Golden Harvest says the multiplex plan is "ambitious" given the limited supply of films in China.

Entertainment Network, a Shanghaibased film, TV and music consultancy, says censorship and alternative domestic film entertainment have "brought commercial release and rejected such the market to its worst point, but the comfort of their own homes.

The estimated \$10m investment in films as "Goldeneye" and "Apollo 13" things are starting to get better... You on political grounds. More than two are not going to make a return on an investment in the short term, but in the end it may be hugely incrative.

Officials with the Ministry of Radio, Film and Television are drafting regulations to allow foreign funds to Mr William Brent, president of China revamp China's movie theatres. The run-down, single-screen auditoriums are struggling to keep audiences who can often afford to watch the latest, uncensored videos and video CDs in

But American film exhibitors have struggled to win cinema operating licenses, making the Golden Harvest consortium one of the few international companies allowed to operate in mainland China. "This area is very sensitive. The film husiness has been beavily protected by the Chinese authorities who view films not as entertainment but to be used for propaganda purposes. So they really prefer Chinese nationals to operate cinemas. a Golden Harvest spokesperson said.

Steelmaker rises as China's national model

James Harding reports on a state group allowed to manage its own business — for the time being

r Li Ming, chair-man of Baosteel. sympathises with the chief executives of China's loss-making state-owned enterprises: "They are too tired to take care of their businesses. They spend their time managing their employees' housing, the children's schooling, they take care of their workers' grandmoth-

By contrast, Baosteel, on the outskirts of Shanghai. has farmed out such responsibilities to independent bodies and "what we care about is material handling, steel production, hot-rolling and cold-rolling. That is what we

The hands-off approach to workers' welfare is not the only thing that makes the company unusual: Baosteel is a highly profitable stateowned enterprise (SOE). Most industrial companies

in China's state sector are making losses. Weighed down by the legacy of inefficient communist management and a bloated labour force, the SOEs are sustained by state subsidies. which strain China's overstretched hudget.

Baosteel, though, which generated more than Yn3bn (\$360m) in profits and taxes last year, is a national model and the government hopes to see it grow into a conglomerate - a Japanese keiretsu or Korean chaebol with Chinese characteristics.

"By 2010, Baosteel aims to have built itself into a large multinational - one of the top 500 enterprises in the world - with steel produc-

ing industry, finance and trade," says Mr Li in an interview, offering a glimpse of how China hopes to salvage some success from the

wreckage of the state sector. By the end of next year, Baoshan Iron and Steel Group, or Baosteel as it is commonly known, will be the biggest steelmaker in China, the largest steel-producing country in the world.

The company started operations in 1985, relying heavily on foreign technology and expertise, and in two phases has built production to 8m tonnes per year. The completion of phase

tion at the core, but integrat- three by the end of 1998 will lift output to IIm tonnes. Last year's sales dipped as operations in the No.1 foundry were stopped for renovation, but the company still improved profitability

Yn23.6bn turnover, on reporting pre-tax profits of Yn3.1bn. The company's goal for 1997 is sales of Yn28bn and Yn4bn in profits. The transformation into a companies and is investing

in Guangda Bank. Last year, Baostesl consolidated its trading subsidiaries to form Baosteel Group International ernment bopes to foster

division.

Trade Corporation with a view to building an international and domestic trading business on the back of its

steel interests. The company

is also building a shipping

The parallels with Japanese and Korean conglomerates are obvious and, while Mr Li stresses Baosteel's unique development, he acknowledges "we imitate conglomerate has already some models from Korea... begun. Baosteel has stakes For example, Daewoo started in two Chinese insurance as a trading company and developed into an industrial company. We are doing it the other way round."

Shanghai's municipal gov-

ates over the next 15 years. However, more officials are consumed with managing the decline of the statesector than the rise of national champions. The city, which leads the country in the awkward process of state enterprise reform, has let 58 SOEs go bankrupt since 1994, and in 1997 alone expects 100 bankruptcies of

of more than Yn6bn. The winding down of state industries carries alarming social risks. Declining and defunct businesses in Shanghai have already laid off more than im people since 1990 and further mass redundancies loom. Baosteel has so far rebuffed political pressure to maintain employment, cutting the workforce again last year from 12,800 to 10,500, and Mr Li'e unswerving message to the manage-

state companies with debts

tives of business. "The management of Baosteel is sensitive to the markets. We focus on production and efficiency," he says, pointing to the company'a commitment to quality and technology as symptoms of

concentrate on the impera-

this mentality. "The equipment and technology we use in Baosteel is new and can adapt very quickly to the changing market... The Chinese market is to Baosteel. so large, there are too many companies which are too impatient. They import secondhand equipment that is already outdated so production cannot catch up with western companies."

Although much of the debate about improving the performance of state companies revolves around the delicate issue of ownership, Mr Li is ambivalent about privatisation. "Whether the enterprise is wholly owned by the state or transformed into e shareholding company, it can work only as long as it has its own strategy. The central government could give companies more freedom to enliven the econ-

omy," he says. To date, Beijing has granted Baosteel a fair degree of that commercial freedom, one of the conditions for the company'e success. Model companies, however, come and go in China's corporate history. A generation ago, Daqing oilfield was heralded as the harbinger of modern Chinese industry. In the 1980s, China's Capital Iron and Steel, or Shougang ment of troubled SOEs is to group, was an example of Chinese enterprise, until corruption scandals tarnished its image

Baosteel's future is by no means assured. The company is being pushed towards a merger with Shanghai Steel, the struggling municipal steel company. The state-sponsored strategy is to transfer the burden of modernising the local steel company and relocating its redundant workers

If faced with that uncomfortable task, the question will remain whether the central government or the municipal authorities or Baosteel itself will manage

ASIA-PACIFIC NEWS DIGEST

stripped of role

In the first signs of significant political fallout from Thailand's economic woes, the prime minister, Gen Chavalit Yongchaiyudh, has taken the role of economic policy co-ordinator from the finance minister, Mr Amnuay Gen Chavalit fought off a move by some members of his

six-party coalition to force the finance minister from office but the decision to hand the largely symbolic role to Gen Chatichai Choonhavan, a former prime minister, may erode Mr Amnuay's authority within the government. It also may set the stage for future conflicts over such ensitive issues as the state-sponsored ballouts of the finance sector and flagship computer chip exporter

Alphatec Electronics. While investors generally feel comfortable with Mr Amnuay, a former Bangkok Bank president, he has come

under criticism for failing to implement policies to revive the economy. Gen Chavalit said after a meeting of coalitioo leaders on Monday that Gen Chatichai, leader of the powerful

Chart Pattana party, who presided over record levels of economic growth before being ousted in a 1991 military coup, would chair weekly meetings of ministers to formulate economic policy proposals for cahinet Ted Bardacke, Bangkol

Baht loophole stopped

Thalland's central bank has closed another loophole in its new two-tier foreign exchange market by preventing foreign investors from obtaining baht by selling Thai equities, Custodian banks are now required to settle foreign investors' stock sales in US dollars and not Thai baht. The move comes after two days of volatility on the That market which many dealers attributed to foreign investors getting their hands on scarce Thai baht by selling their equities. Yesterday the Thai stock market

closed down 7.24 points at an eight-year low of 527.22.

Investors moved the baht overseas to take advantage of the large differential that grew between the offshore and domestic baht rates since the Thai central bank prohibited local banks from selling baht to foreign investors suspected of engaging in speculation against the currency. The baht was unchanged yesterday, closing at 25.74 to the dollar in the domestic market and 24.15 to the Ted Bardacke, Bangkok dollar offshore. World Stock Markets, Page 34

Japanese mobile phone boom

Japan's mobile communications market grew 71 per ceot in the year to March to a record Y4,061bn (\$35bn), according to the Ministry of Posts and Telecommunications. This strong growth has been spurred by falling prices of cellular handsets, the sprea of Personal Handyphones, a lower cost form of cellular

service, and a growing range of discount fees. Growth since 1994, when handsets were liberalised, has been particularly strong. The ministry is forecasting another 27 per cent increase in the market to Y5,137bn this fiscal year. The rise in the number of subscribers to mobile phone services has been even more spectacular with subscriptions up 116 per cent last year to 28.2m. That makes Japan the second largest market after the US, which has 44m subscribers but about twice the population of Japan. Mohile phone penetration in Japan more than doubled last year to 22.4 per cent, pushing Japan to fourth place after the three Scandinavian countries of Finland, Sweden and Norway. Michiyo Nakamoto, Tokyo

Tung pledge to Democrats

Mr Tung Chee-hwa, Hong Kong's future leader, said yesterday he would continue a dialogue with the Democratic party, the territory's largest political group, which will be absent from the post-handover legislature. He agreed to let them hold meetings with policy secretaries and said their views would be taken into

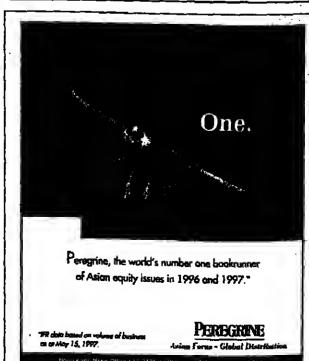

account. He urged the party to take part in legislative

elections, due in the first half of 1998, promising they would be fair, open and democratic. The Democratic party has been a vocal critic of Chinese policy towards Hong Kong, notably Beiling's plans to scrap the elected legislature and replace it with a handpicked provisional legislature. John Ridding, Hong Kong

Australia eases liquidity rules

A diminishing supply of federal government securities and a shift in the approach to liquidity management has led Australia's Reserve Bank, the central monetary authority, to halve the "prime assets requirement" for the nation'e banks.

At present, they have to hold 6 per cent of liabilities in high quality, readily cashable" assets, such as Commonwealth government securities or notes and coins - in effect making these assets an emergency source of liquidity for the banks. But from June 23 the RBA is cutting the required ratio to 3 per cent and widening the eligible assets to include A\$ denominated securities issued by state and territory governments. Nikki Tait, Sydn

How will your software react to the turn of the century?

Many software programs will have problems coping with the year 2000. And so will you when the two-digit year entries take you back to 1900 instead of into the next millennium. This problem is already impacting long-term planning and contracts - and time is running out.

The SAP' R/3' software can help your company meet this and many other challenges. Currency conversion support, multicurrency capabilities and Internet applications mean you won't get caught out by the Euro or miss new business trends. SAP is ready for the future. But that's not all.

After a brief implementation phase, SAP's R/3 standard enterprise software automates essential workflows throughout your organisation. And with networked finance, manufacturing, sales, personnel and other departments, you're guaranteed better information and faster decisions. In share your business will run the way you've

R/3's modular design not only gives you un individual solution tailored to your needs, but also functionality that can be added as your requirements evolve. R/3 is quite sumply the perfect solution for companies of all sizes and from all sectors of industry.

Competitive software solutions that accompany you far beyond the year 2000 can be found on our Web site at http://www.sap.com.

Manila ruling opens race for presidency

By Justin Marozzi in Manila

The Philippine Supreme Court yesterday delivered a resounding blow to President Fidel Ramos's bopes of running for a second term. The court's ruling, upholding a ban on a constitutional

change to allow Mr Ramos to run again, changes the terms of debate in Manila in the run-np to the 1998 presidential elections, and comes on the eve of today's planned merger of opposition parties.

It should end the. long-standing fight between those wanting to remove the present limit of a single sixyear term for the president and those, including opposition politicians, the powerful Roman Catholic church and former President Corazoo Aquino, who have hitterly ntested such moves.

Despite repeated statements from the president that he intends to stand down next year, many political observers believe he is eyeing another term.

Western dlplomats expressed surprise at the court's decision, following widespread epeculation it was going to reverse its earlier ruling against the constitutionality of the initiative.

The ruling itself, a split 6-6 decision with two abstentions (enough to let the previous ruling hold), is an indication of the divisions over the question of a second term for Mr Ramos, widely considered a successful pres-

The 1987 constitution, framed after two decades under the dictator Ferdinand Marcos, provides strong checks against the executive, notably from the judi-

You probably come across us every day, perhaps without even knowing it.

Maybe in our medicines that help doctors keep you healthy or treat serious illnesses.

Or in the food on your table, grown with the help of our agricultural products.

Or maybe in your home or car where our advanced materials such as fibres, plastics and paints make your life easier, safer and brighter.

But with our name some people still get a little tongue-tied!

It's actually very easy.

We're called Hoechst, pronounced "Herkst".

You can say that again!

Hoechst is an international group of companies spearheading innovation in health care, nutrition and industry. With a staff of 145 000 people worldwide, annual sales total DM 52 billion.

Peso crisis turbo-charges revolution in motor trade

Not until 2000 is assembly or manufacture of in demand. Not until 2000 is Delphi components or the market expected to return to its 1994 level.

Henry Ford paid his work ers enough so they could huy their own cars, thus assuring that he would have customers. GM's chief economist, Mr G Mustafa Mohatarem acknowledges that GM workers cannot afford even the small, polluting Chevy. In Mexico. with Its huge hungry young labour force, the company has many more applicants for jobs than it can offer.

"GM generally pays above prevailing wages," Mohatarem. "You have to pay that country's wages with a slight premium to be sure you get the best workers." The prevailing wage for autoworkers in Mexico, however, has been estimated as low as 70 cents an hour, s level US union leaders allege has depressed incomes both sides of the border.

"If they don't (take advantage of cheap labour), then someone else will," said Mrs Needham. "That's just the

Indian plan for imports rejected

By Khozem Merchant in New Delhi and Frances Williams in Geneva

India's main trading partners yesterday rejected as "unacceptable" New Delhi's proposals for removing controls on imports of consumer goods. This raises the prospect of a damaging stale-mate in World Trade Organisation talks in Geneva due to eod tonight.

The Indian plan envisages a phased elimination of controls on some 2,700 consumer goods over nine years. But the US, European Union, Japan and other industrialised WTO members are pressing for a phase-ont within two to three years.

WTO's balance of payments committee, disappointed western trading partners mantling trade barriers after market.

half a century of protection. EU officials describe the issue as the "single most important trade policy matter hetween Brussels and New Delhi" and ssy its apparent paralysis owes much to the "difficult internal processes within the [Indian] government".

The hardlins Indian position is driven by communist elements of the coalition government led hy Mr I.K. Guiral which remain hostile to foreign multinationals and to opening up the domestic consumer mar-

Since Indian economic reforms began in 1991, so-called swadesi (economic nationalist) agitators have protested against the presence in India of Ksntucky and McDonalds, the US food its consumer markets.

giants. Western officials say that if negotiations are inconclusive tonight they will "review all options, including appealing to the

WTO complaints procedure". Under WTO rules, the balance of payments committee is supposed to reach declsions hy consensus, including India, which received support yesterday from such developing nations as Brazil, Egypt, Nigeria, Pakistan and

India has proposed removing curbs on 26 per cent of restricted products - mostly consumer and agricultural goods - hy 2000, another 45 per cent after six years and the balance after nine years. In the final phase are some

New Delhi's proposals, "big ticket" items such as products including fruit, coffee, tea and grains where trading partners had hoped who were hoping for s more for decisive early sction to rohust commitment to dis- open India's large domestic

The Indian press quoted government officials as saying that "since this is a matter with political dimensions and not just economic ones. Indian negotiators are not in s position to deviate".

India has consistently argued that the economy would not withstand the chock of a sudden influx of competitively priced foreign goods, even though in the early stages imports would comprise luxury items such as cosmetics.

But an IMF report published in January said India's balance of payments was healthy and with forsign exchange reserves of about \$23bn, the country could no longer claim balance-of-payments weakness as an excuse for protecting

Task force to fight Brussels plan for end of duty-free sales

By John Murray Brown

Fifty years after Ms Kitty Downes opened the world's first duty-free kiosk at Ireland's Shannon Airport, the industry gathered on the same spot this week, to contemplate a more worrying

development. This was the possible end of its European husiness, in line with the European Commission's plans to extend the single market to this lucrative tax-free sector.

At an international conference, Mr Frank O'Connell, chairman of the Brusselsbased International Duty Fres Confederation, announced the launch of a special task force to lohby the Commission to reverse its threat to scrap duty-free

The EII accounts for half world trade in duty-free. The confederation estimates 75 per cent of the \$6.9bn worth of duty-free goods bought by travellers within the EU would have to go, the rest being sales to travellers in transit.

Mr O'Connell, who is also group commercial manager of Aer Rianta, Ireland's-state owned airports authority. said indications of support had come from Sweden, Ireland, Luxembourg, Spain, Denmark, Belgium, Greece and the Dutch EU presidency. But the UK attitude would be "crucial" in resolving the issue, as It holds the presidency in the run-up to

"The Commission will not

sales within the Union by take any initiative to solve (\$343m) sales revenues the problem, so we must build the necessary support move would have a wider in each member state," Mr

O'Connell said. Mr Alan Dukes, Irish transport minister, urged the Commission to reverse its plans, hut said: "I am under no illusion this can be done

easily. It can't." Aer Rianta has recently diversified into new markets, announcing plans last month for five shops at Hong Kong's Chek Lap Kok air-

It is now the world's second largest duty-free company, with operations in Moscow, St Petersburg, Kiev, Kuwait, Cyprus, Beirut and Damascus, as well as et both ends of the Channel Tunnel. The company relies on dutyfree for a third of its I£231m Mr O'Connell said the EU

impact on jobs among ferry companies and airlines, and could be critical for some of the giftware companies and drinks concerns dependent on duty-free turnover.

Industry officials estimate 50,000 jobs could be lost in the ferry sector. Fares would have to go up an average 30 per cent to compensate; many routes could be closed.

A study by Cranfield University suggested loss of revenue to the airport authorities could result in landing charges rising 60 per cent, with the knock-on effect on ticket prices and passenger volumes. The impact would be most severe on charter airlines, dependent on on-

Imports from China 'putting US jobs at risk' US trade deficit

By Nancy Dunne

US imports of high-value Chinese goods pose "looming dangers" to US jobs and businesses, the US Business and Industrial Council warned yesterday.

The council - representing 1,000 small and medium sized companies - said the growing tlde of Chinesemade telecommunications equipment, electrical machinery and computers sold in the US were mostly the products of US multi-

The council's report -'Made in China?" - is clearly designed as ammunition against renewal of China's Most Favoured Nation

(MFN) status. It argues that China's mercantilist trade policies are unlikely to make it a major market for US products, as MFN backers claim. It contains extensive data about the composition of US-China trade not to he found in ths work of most mainstream Washington think-tanks

It says toys, footwear and clothing still represent the largest share of China's exports to the US. But the fastest growing component of trade is now computer and office machines and This contrasts with the parts, electrical machinery. portrayal by large US compa- audio and video recording

Although transport equipment - mostly aircraft - is the fastest growing US export to China, low-value products are playing a larger role too. These include oilseeds, animal feed and paperboard, and generate

The US-China trade relationship contrasts sharply with that of Japan and the EU. They export more than the US to China - and a higher percentage of sophis-... ticated manufactured goods - and import less.

While the US trade deficit with China last year hit \$40bn, the Japanese deficit. was \$22hn and the EU'swhich support MFN renewal. \$19bn.

REPEAT CALL FOR TENDERS FOR THE SALE OF 55,040 DMT GOLD BEARING PYRITE CONCENTRATE OF "CHEMICAL. PRODUCTS AND FERTILIZERS CO S.A." OF ATHENS, GREECE

*ETHNIKI KEPHALEOU SA, Administration of Assets and Liabilities" of 9a Chryssospiliotissis St. Athens 10560, in its capacity as liquidator of "HELLENIC CHEMICAL PRODUCTS AND FERTILISERS COMPANY S.A." a company with its registered offices in Athens (20, Amallas Avenue, Athens 105 57), Greece, which is presently under liquidation according to the provisions of article 46a of L.1892/90, by virtue of Decisions No. 4299 and 7714/1992 of the Athens Court of Appeal

announces a rapaat call for tenders for the sale of 55,040 DMT gold bearing pyrite: concentrate with a gold content of approx. 22.7 g.p.t.

Interested parties are hereby invited to submit binding offers, not later than Monday July 7th, 1997, 12.00 hours to the Athens Notary Public Mrs. loanna Gavriell Anagnostalaki, 18 Fidlou Street, Athens Tel.: +30-1-38.19.728, fax: +30-1-38.25.191. These should be accompanied by a Letter of Guarantee issued in accordance with the sample Letter of Guarantee contained in the Offering Memorandum, by a bank legally operating in Greece, to remain valid until the adjudication, for the amount of DRS. TWENTY MILLION (20,000,000.-) Binding offers together with the Letters of Guarantee shall be submitted in sealed opaque envelopes.

Envelopes containing the binding offers shall be unsealed by the above mentioned Notary Public in her office, on Monday, July 7th, 1997, 14.00 hours,

The Auction shall take place in accordance with the provisions of article 46a of Law 1892/1990 (as supplemented by article 14 of Law 2000/91 and subsequently amended), the terms and conditions set forth herein and the "Terms and Conditions of Sale". contained in the Offering Memorandum.

Interested parties may obtain a copy of the Offering Memorandum from the Liquidator "ETHNIKI KEPHALEOU SA, ADMINISTRATION OF ASSETS AND LIABILITIES" 9a Chryssospiliotissis St, Athens 10561 Greece, Tel. +30-1-323.14.84-87, fax: +30-1-321,79,05 or the, Liquidator's agent Mr. Elstratios Michaelidee, 20, Amalias Avanue, Athena 10557, Greece Tel.: +30-1-32.26.334, fax. +30-1-322.11.03.

Singapore gets Japanese win Aden contract | radio deal

By Robin Allen in Dubai

The Port of Singapore Authority (PSA) has won a \$187m contract to build six quays and a terminal on the north abore of Aden port next to Caltex island. The turnkey contract,

which includes engineering. procurement and construction of the transhipment container terminal, as well as dredging a 690m wide turning area, is due to be signed in London on June 17. The contract has been awarded by Yemen Invest-

ment & Development International (Yeminvest), s Jeddah-based company owned by Saudi Arabia'a Bin Mahlouz family, majority owners Bank, the country's largest in terms of assets. Yeminvest has a 25-30 year

huild-own-operate-transfer concession agreement with the Yemen Free Zone Public Authority (YFZPA) to redevelop Aden's port. Construction of the container terminal is the centre-

piece of the \$280m first stage

of a \$580m 25-year redevelop-

ment scheme which aims to restore Aden's port as the region's primary container hub on routes from Europe to Asia. Yeminvest's threephase redevelopment plan also constitutes Yeman's first overseas-led privatisation programme. Deadline for completion of the first phase is March 1999.

Other elements of the first stage include dredging the harbour, huilding a 15MW power station, and upgrading the existing Ma'alla terminal. The Netherlands' Royal Boskalis Westminster started dredging a 16-metre deep navigation channel last month.

Discussions on the power four family, majority owners station and the Ma'alla ter-of National Commercial minal are "on-going", according to Mr Matthias Moser, senlor associate director at Deutsche Morgan Grenfell, which is advising on project finance.

US court hits at

By Christopher Parkes in Los Angeles

The "schoolkids' curfew", one of the most favoured unruly US youth, has been raled out of bounds in its birthplace, San Diego.

The Californian city's 50-year-old law, which makes it a crima for anyone under 18 to "lotter, idle, wander, stroll or play" in public after 10pm is unconstitutional, according to a

federal appeals court.
The ruling that it is too
vague and violates perents' rights to bring up their children without "undue interference" yesterday set city attorneys across the nation reviewing their own stat-

Restrictions similar to those in San Diego, introduced in 1947 when the border town naval base enjoyed a less salubrious reputation than now, are in force in about 1,000 US cities, with

about 10 per cent of the total in California alone. President Bill Clinton spoke warmly in last year's election campaign of the merits of protecting children from the perils of the

night by keeping them in. While some lawyers suggested San Diego could reinstate its curfew by djusting the ordinance's language, to allow constitutional rights such as attending political meetings, going

to church ceremonies or concerts, the ruling seems likely to reopen the debate on church burnings. The on the measure's effectiveness. Violators are typically arrested, finger-printed and photographed, and held by police until collected by their parents. Fines and community service orders are the usual penalties for repent offenders.

San Diego officials say the number of youths arrested for violent crimes has fallen by 40 per cent since June 1994, when the city council dusted off its legislation and ordered the police to enforce it rigorously.

Millionaire's run stirs sleeping PRI Perceptions of race relations show wide gap

Some elements of US racial prejudice have declined considerably since tha civil rights movement of the 1960s, but there remains a large gap between black and white perceptions of race relations, says a Gallup poll

published yesterday.
The poll sets the stage for President Bill Clinton's expected announcement this week of a new initiative to overcome racial divisions, part of his campaign to establish an historic legacy for his presidency.

The poll shows a dramatic change in white attitudes to racially mixed marriages, with 61 per cent of whites saying they approve of such unions today against only four per cent 40 years ago. Among blacks 77 per cent said they approved mixed race marriages. Figures for marriage licences appear to reflect the trend; unions between black men and white women have risan sharply, from 1.9 per cent of all marriages involving a black groom in 1970, to 8.9

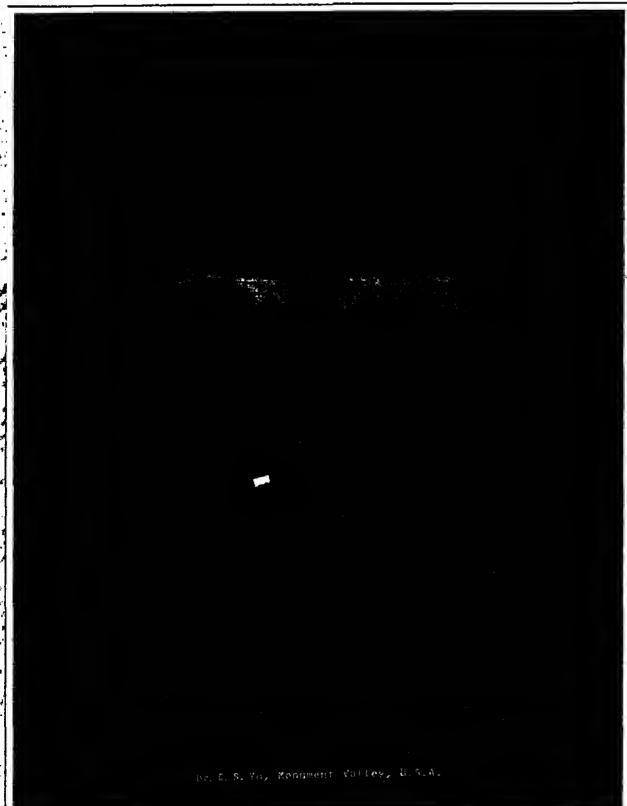

per cent in 1993. The poll shows other signs of declining prejudice. Almost all whites now say they would vote for a qualified black presidential candidate, though only 35 per cent expressed this view in 1968.

racist views to pollsters, however. For though whites viewed themselves as having little or no personal racial prejudice, most said neighbours were less egalitarian. And blacke ascribed to whites higher levels of prejudice than whites admit to.

The poll shows that the gap between black and white perceptions of race is not being bridged. Nearly four fifths of whites feel blacks are not restricted in employment or education because of race, while half of blacks feel they are discriminated against in terms of lobs, and two thirds complain of unequal treatment in education. White attitudes reflect the backlash against affirma-

tive action programmes. The racial perception gap was highlighted earlier this week when a presidential task force released its report force was set up after a sharp rise in church arson, mainly affecting black churches, raised fears of a new wave in racially motiveted crime. But the report found no evidence of a racist conspiracy against black churches, adding that fac-

tors including personal profit, burgiary and revenge motivated many of the crimes. Of 81 suspects arrested for arson of black churches, 26 were themselves non-white. This may reflect an unwill-

In 1996, LG invested over US\$9 billion to grow its business.

Now, how can we help you?

Imagine a device that combines the functions of a computer, a fax machine, a modern, a web browser, an electronic organizer and more-so small it rests comfortably in the palm of your hand-

What Chan-Su likes most about LG Electronics' new Handbeld PC is the freedom it gives you to work how and where you like. Freedom from the expense and inconvenience of the long line of machines it replaces.

LG's other many technologically sophisticated products include one-time programmable microcontroller units and digital mobile telecommunication systems. Everything we make exists because we listen to you.

Outright victory eludes pro-European former chancellor in Conservative party contest

Clarke wins first round in leadership bid

By Robert Peston and John Kampfner

Mr Kenneth Clarke yesterday won an inconclusive victory in the first round of voting in the contest to the opposition Conservative party.

The pro-European former chancellor of the exchequer, who is blamed by the Eurosceptic right for the party's heavy defeat in the general election on May 1, said that the breadth of his support among the surviving 164 MPs was much when the leadership campaign

He said last night that he a platform to unite the party and . The result showed that Tory MPs and Mr Howard to withdraw from intended to broaden his appeal by "setting out how I intend to lead this party on an inclusive basis". However, his supporters did little to hide their disappointment that succeed Mr John Major as leader of his 49 votes left him 34 short of the overall majority required. "I can't see him pulling it off now," said

> Mr William Hague, the 36-yearold former chief minister for Wales, is now in a strong position to win votes from Mr Clarke and the party's divided right wing, hav-ing come second with 41 votes. "It gives me a very good position to ernment and Mr Howard was home campaign for the second ballot on secretary.

give the party a fresh start," he had not been swayed by an advi-

Meanwhile, the prospect of rightwing Conservative MPs rallying around a single challenger receded when their vote split comparatively evenly between Mr John Redwood, Mr Peter Lilley and Mr Michael Howard. Their respective tallies were 27, 24 and 23. The strongly Eurosceptic Mr Redwood resigned from the cabinet in 1995 to challenge Mr Major for the leadership. Mr Lilley was chief social security minister in the Major gov-

sory ballot of constituency chairmen, European parliament members, lords and senior party workers, who have no formal role in the selection process but are stalwarts of the party outside the

House of Commons. This demonstrated a clear consensus for Mr Clarke to succeed Mr Major, with Mr Hague the second

party in the country gave only derisory backing to the three rightwing candidates Mr Redwood called on Mr Lilley

It was also striking that the

the race so that their supporters could coalesce behind him. With some Tories seeking a lead

from former prime minister Baroness Thatcher, her former press secretary, Sir Bernard Ingham, gave a surprising endorsement to the former chancellor of the exchequer.

"Kenneth Clarke is the most competent politician, and the one the public will most warm to," he said. "I have sneaking admiration

Editorial Comment, Page 13

Industry urges modest tax rises

By Robert Chote, Economics Editor

The Bank of England, the UK central bank, is likely to raise UK interest rates above 7 per cent unless Mr Gordon Brown, the chancel-lor of the exchequer, restrains consumer spending by raising taxes in his budget on July 2, the Con-federation of British Indus-

try warned yesterday. Mr Adair Turner, the CBI director general, said there was no need for big tax increases because public finances were "probably now on a sound mediumterm footing". The employers' organisation argued for tax increases of £2bn (\$3.3bn).

Improvements in the public sector borrowing requirement have seen the CBI reduce its original proposal

for a tax rise of up to £3bn.
"With consumer spending set to grow strongly this year and next, some small action is needed to prevent Inflationary preasures

emerging," Mr Turner said. "However, we are cautions about relying solely on interest ratea to curb demand, since that could drive up sterling at a time when the high pound is already hurting the UK's export performance. A limited rise of up to £2bu would interest rate rises."

Ms Kate Barker, the CBI's chief economist, said base rates were likely to rise by half a point from their current 6.5 per cent even with a modest fiscal tightening. Without it, basc rates "could rise to 7.5 per cent." Sir Bruce Pattullo, governor of the Bank of Scotland. yesterday warned Scotland against turning its back on the highly competitive UK

tax rates than in England. He said that if the proposed Scottish parliament levied an extra 3p in the pound, it would mean "we are pulling the drawbridge up and saying we want to distance ourselves from that

economy by setting higher

competitive world outside". At the bank's annual meeting in Edinburgh, Sir Bruce said such an increase would be a self-inflicted wound which would have "a cumulative and corrosive adverse effect on the Scottish economy".

UK NEWS DIGEST

Narodny bank probes 'fraud'

Moscow Narodny Bank, the Russian-controlled UK bank, has begun legal proceedings after uncovering a £6m (\$9.8m) potential fraud. Mr Derek Farmer, Narodny's general manager, said allegations involving a US customer with Ukrainian connections had been reported to the Bank of England, the UK central bank, and a report commissioned from external accountants. "As far as we're concerned, we have done everything that is required of

Narodny said the account officer involved had been placed on paid leave as a standard procedure. "We have no reason to believe there has been internal collusion." said Mr Stewart MacFarlane, company secretary. The Russian central bank controls 88.9 per cent of Moscow Narodny, which was set up in London in 1919 and opened its first subsidiary in Moscow this year. Narodny's pretax profits increased from £30.5m in 1995 to £43.5m last year. It has shareholders' funds of £306.9m. George Graham

IN NORTHERN IRELAND

IRA says it fired at army patrol

The Irish Republican Army said yesterday that one of its "ective service units" had attacked a British army patrol operating on the west bank of the River Foyle in the Northern Ireland city of Londonderry. The IRA made its claim in a statement to a local newspaper. The caller said that at least one member of the patrol had been wounded. but police said there were no reports of injuries. A number of shots were heard as the patrol passed along the Foyle Road, near the city's Roman Catholic Bogside area. A vehicle thought to have been hijacked and used in the

attack was found abandoned nearby.

• Community workers in the Shankill Road district of Belfast, the Northern Ireland capital, are taking action to try to stem an upsurge in "punishment beatings" and shootings. A new group will attempt to mediate in a bid to stop the violent attacks, which they say cast serious doubt on the ceasefire by anti-nationalist "loyalist" paramilitary groups. Three men were treated yesterday for gunshot wounds after being "kneecapped" in a paramilitary attack in a "loyalist" area of the city. A 24-year-old man had a leg amputated last week after being shot by republican paramilitaries in the Markets area of the city.

CHANNEL TUNNEL Shuttle operator to reserve space

Eurotunnel, which operates the Channel tunnel between England and France, is to reserve an average of half the places on its car sbuttles for travellers who book in advance, overturning its previous "turn up and go" pol-lcy. The company introduced a booking system in the wake of last November's tunnel fire, when its capacity was restricted, but intends to maintain it now that it is back to full capacity. Mr Bill Dix, managing director of passenger abuttle operations, said yesterday.

This may mean that at peak times "turn up and go" passengers are not be able to obtain space but this would be limited to very few occasions, Mr Dix added. The company claimed 36 per cent of the Dover-Calais market in the first five months of the year and expects to increase this to 55 per cent by the end of 1997. Charles Batchelor

■ ANIMAL EXPORTS

Minister aunounces tough rules

Tougher rules against livestock bauliers who break welfare rules were announced yesterday by Mr Jack Cunningham, agriculture minister. From July 1 transporters ed to use trained staff to be isters will have powers to disqualify serious or persistent offenders. Mr Cunningham said the government wanted exports of meat, already accounting for 80 per cent of the trade, to replace the transport of live animals for slaughter altogether. This would be good for animal welfare and for jobs in the UK slaughtering industry.

Live animal transport is a highly emotive public issue although protests have abated somewhat since calf exports, worth about £50m in 1995, were halted by the EUwide ban on British beef in March 1996. Live exports are now predominantly in sheep, worth an estimated £23m this year, and high-value breeding sows, worth about

ANTI-HUNTING BILL

Blair fears clash in parliament

Mr Tony Blair, the prime minister, has strongly urged Labour backbenchers not to bring forward legislation to ban bunting with bounds, fearing that the measure would provoke a dangerous clash with Conservative members of the House of Lords, the unelected upper House of Parlia-ment. Mr Michael Foster, a Labour MP, is keen to bring forward an anti-hunting bill, which has strong support in the House of Commons and in the country. But the prime minister believes the measure is too controversial to push through early in the government'e first term. "No matter what how much we want to ban bunting, we know that the Tories will pull out all the stops in the Lords to stop the bill," a government official said.

Premier aims to exploit business expertise

hen Mr Tony Blair, the prime minis-ter, declared in opposition that Labour was a party of business, few thought he meant it so literally. Since taking office just over a month ago. Mr Blair has put business people into a number of government jobs and has promised that there are more to come.

One prominent businessman was even given a leading ministerial position, even though he was not a member of the Labour party.

Advisers say Mr Blair was impressed with the businessmen he met in opposition and wants to use what he sees as their ability to cope with complex managerial

Problem Free internet 1884 Conline fees **Economist**

By Nicholas Denton

The Economist will this Friday hecoma the first mainstream publication from the UK to go against the culture of the internet and charge for access to its articles there.

The news weekly, which will continue to make about eight articles from each edition freely available on the internet, will give access to its entire content for an annual rate of \$48.00.

Pearson, the media and information group that owns the Financial Times also owns 50 per cent of The Economist Group.

The online service, which includes a searchabla archive of beck issues starting in 1995 and classified advertising, is initially available without charge to subscribers to the print edition of The Economist.

The move hy The Economist comes despite discouraging experience in the US, where some publications have sought to charge from and have lost online custom-

The most successful subscription site, apart from offerings from magazines such as Playboy, is the Wall Street Journal's interactive edition, for which it charges \$49 a year with a discount

1 PA.A

VINICES.

for print customers. The Wall Street Journal. which launched its subscription site last September,

It estimates this is more than half the potential readership of a free service.

Some online publishers are charging for packages. LineOne, the joint venture between News International and British Telecommunications, charges £6.95 (\$11.36) a month for content including

titles such as The Sun. However, the New York Times and Slate, tha magazine set up by software giant Microsoft, both abandoned plans to charge subscriptions in the interest of building up readership and adver-

tising revenues.
UK publishers will watch carefully the response of The Economist's 40,000 regular onlina readers, many of which the news magazine hones will switch to the subscription service.

Subscription revenues are important if online publishers are to reduce their reliance on advertising revenues and to cover the costs of the electronic editions that most have set up since the internet took off in 1993.

"Wa don't give the Econothe earliest feasible point mist away in print, so I don't see why we should give it away on the web," said Mr Anthony Gottlieb, executive editor. "The internet can only benefit from collecting money rather than losing

He dismissed fears that the online edition would cannibalise sales of the print version. "If people are going to switch from print to onscreen, you have to make took eight months to attract sure you are on screen for 100,000 internet subscribers. people to switch to."

Mainspring (www.main-spring.com) is an internet site for people who are dealing with the challenges of establishing a business on the internet or building a corporate intranet. Mary Cronin, author of Doing Business on the Internet and a contributor to Mainspring, aims to have 100 case studies on the site by the

end of the year.

So what is the most common mistake that businesses make when implementing technology? "Failing to integrate internal operations," says Cronin. "Each department has its own web activity, but often there is little co-ordination." Finding the right balance between distributed systems and centralised control is crucial, she says, and many companies go too far in one direction or the other.

Cronin is refreshingly

frank in her approach to all things internet. "It is impossible for anybody to keep up there are too many changes and too many areas of growth," she says. One of the most efficient, and least painful, ways for managers to get the latest information is by joining a group of their peers, she suggests. Executives from the companies Cronin has studied will join discussion groups to answer Mainspring mem-

operations After a four-month trial Mainspring has attracted 4,000 members, et \$500 a year. This may be a high subscription fee for a website, but its a small amount if it saves a few hours of a consultant's time.

bers' questions about their

Information overload · Vanessa Houlder

Intelligent reading

Companies are looking at ways to cut down the mountains of information

nformation overload is blighting many organisations. There is too much to read, too little time in which to read it, and no reliable way of working out what should take prior-

The blame must, in part, be pinned on the huge quantity of information that has become evailable electronically. But if technology is adding to the problem, it may also provide a solution. Organisations are experimenting with a number of tools, mostly based on artificial intelligence, in an attempt to lighten the load on their employees

One such is Swiss Bank Corporation, which decided to address the problem after it monitored the readership of its own publications. Even though internal documents are e small fraction of the material demanding attention from its staff each day, it calculated that it would take several bours e day for its staff merely to keep up to dats with its internal fore-

casts and reviews. The response of its staff to being swamped with so much information was unsurprising: two-fifths of its publications were only read sporadically and e further two-fifths were hardly read at all

These dismal findings encouraged SBC to explore a technical solution. It wanted to give staff a quick method of finding out what information is relevant to them; it wanted a way of delivering relevant information auto matically to individuals; it also wanted to know which parts of which documents were best and least read.

SBC asked its financial engineering group. For information engineering group, a team of researchers based in Basle, to find a nary language, such as "I solution for its privats banking section.

An obvious part of the all its documents were evailmany of its documents on to its intranet. The more difficult challenge was finding a method of indexing these documents that would allow the investment bankers to question and navigate the database quickly and easily.

The approach chosen for this project, which was known as the know-how pool project", was en artifi-cial intelligence technique known as case-based reasoning. This technique makes use of an electronic datawhich describes previous situations and the response to those situations. resented with a new problem, the computer retrieves the most similar case and, if

essary, adapts it to guit

The first step in epplying case-based reasoning was creating an index of the documents. SBC achieved this using the CBR2 generator tool, which was designed by Inference Corporation of El Segundo, California, This mmarises each document in the form of keywords; it also lists a number of keywords that are best suited for distinguishing one document from another. When e document is published or updated, the index file is automatically updated over-

One of the attractions of the system is its flexibility. "CBR seems to be very easy to use," says Frank Block of SBC's financial information. example, the user can type his or her request in ordiwould like to have informa-

tion about private banking." Another attraction is that solution was ensuring that it can cope with typing SBC was already putting algorithm", which allows it to match words that have

choices from seven boxes: region, currency, economy, branch, product, politics, strategy. The user can refine the search by answering e

number of questions. The know-how pool project also makes use of intelligent agents - software that can eutonomously perform specific tasks. One of these is a "news agent" that informs readers about new information according to their specified user profile.

Another agent that SBC is working on is a "document reading statistics agent", which counts how often and at what time documents are read. SBC expects it to yield quite detailed information, given that each document is split into chapters and subchapters. This would allow it to work out which sections are either read very frequently or not read at all. That could provide feedback to the authors about where they should provide more or less detail.

The pilot is being errors and it can find dates improved and extended. able electronically. This did close to those specified. The although Block is aware that not present difficulties since system also has a "stemming it may be difficult to extend the operation throughout the organisation. The potential rewards - better investment decisions through faster and more eccurate eccess to information - are high but hard to quantify. "It is very difficult to give precise numbers on the return on investment." he says.

SBC is not alone in experimenting with CBR and agent technology for knowledge management. Halifax, the UK bank, used case-based reasoning to help its staff find the right information to deal with queries from members about products and shares in the run-up to its flotation. Boeing has codeveloped the prototype of e knowledgeeble agent-

oriented system" in a porta ble aid that provides training and support to customers on aircraft maintenance.

Organisations are using s range of approaches to help their employees find relevant information from an excess of data. Andersen Consulting, which tries to share knowledge between its 40,000 consultants across the world, bas a repository of interfaces, or "knowledge maps", which helps users find their way to the most relevant of its hundreds of

Lotus Notes databases. Automatic filtering tools are also proving valuable. The Price Weterhouse World Technology Centre in California, for example, is experimenting with an information extraction system called Odie - on-demand information extractor - to extract relevant information from news wires. As a result, users receive information on just a handful of relevant appointments every week.

The researchers working on epplying artificial intelligence to knowledge management are aware that the subject is at an early stage. The American Association for Artificial Intelligence recently noted that artificial intelligence was relevant to commented that most existing tools cannot be applied to the task in their present

Nonetheless, there is cautions optimism from researchers in the field. "In our experience at Price Waterhouse, Al-based technology can play a key role in dealing with these difficulties in managing knowledge," says the PW team. SBC's Block is also upbeat about his company'e pilot project. "We have e good starting point," he says.

The Financial Times invites you on a 15-day tour exploring some of the exotic islands in 2000 the Indian Ocean and watching game in the Masai Mara. This exclusive holiday, arranged

for the FT by African Safari Club, includes: A three-day safari amongst the game, staying on the vast plains of the Masai Mara and nine-days aboard the luxury cruise ship the MS Royal Star, stopping at the paradise islands of the Seychelles, the

plantations and white sands of Madagascar, the waterfalls and coral reefs of the Comores and the ancient ruins of Zanzibar. To receive a detailed itinerary and brochure about this trip, simply call Richard Thomson

on +44 171 873 3670 or complete the coupon below.

BRIEF ITINERARY

Day 1 Day 2 Day 3 Day 4 Depart from Heathrow, via Basie to Mombasa Day at leisure in Momba Day 9 Fly to Masai Mara, half day game drive Masai Mara, full day game drive Day 5 Masal Mara, half day game drive, return to Day 13 Fly to Seychelles and embark MS Royal Star Tour island of Mahe, sail to Praslin and La Dingue

Tour Prasiin, sail to Madagas Leisure and lectures at sea Leisure and lectures at sea Tour 'perfumed island' of Nosy Be, Madagasc Tour Mayotte, Comores Leisure and lectures at sea Tour Zanzibar, Tanzania, sall to Mombase Depart Mombasa to Heathrow via Beale

Cost per person ranges from £2,500 to £5,100 depending on cable accompdation aboard the MS Royal Star. Price includes: Full board, all transfers and eirport taxes, 3-day Mara Simba Safari, insurance, all excursions detailed in the itinerary Please note that complimentary flights from Manchester to Heathrow are available on request. Price excludes: Visas (where applicable) and Items of a personal nature.

 Identify clusters - where various systems with similar characteristics can be grouped together and

This approach can drastically simplify the overall plan, reducing testing requirements and therefore resources. Wherever possible. substitute old bespoke systems with modern general-purpose packages These products can support specific processes at significantly lower cost and more importantly, they are millennium-compliant. Replace obsolete and unsupported computers with maintenance and greater

efficiency. at Ernst & Young sim to . ensure their clients not only cope with the short-term demands of the millennium changeover but exploit the circumstances to realign systems and business processes together, adding monstrable value to their

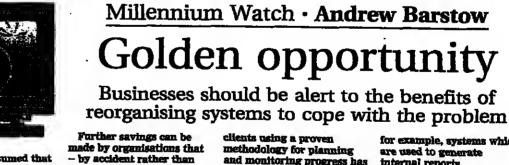

The author is a partner at Ernst & Young and head of its technology strategy and

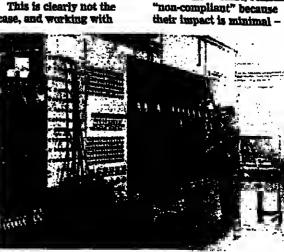

It is generally assumed that all chief executives and design – use an inefficient and disparate range of old their senior managemen teams are aware of the year 2000 issue. What is difficult exists not only to develop to assess is the extent to new systems, but to scrap which they are tackling the old computers and buy in hardware which is faster, problem and whether they can see beyond the cheaper, and arguably more reliable.

short-term systems fix. Organisations should be elert to the wider busin opportunities presented by the issue. The short-term cost can, in theory at least, be offset against the long-term benefits of re-engineering business ses and systems together. This alignment sures the best fit to meet the future needs of the

On this premise it is reasonable to assume that some organisations may already foresee changes to their markets that could alter their busine processes and render some of their systems obsolete. With a clear insight into the future requirements usually achieved with third party support - an organisation can accurately predict which of its systems will fall short of its future requirements, enabling it to remove them and avoid the cost of making short-lived

Dark ages: but many companies still use old, inefficient equip

Venezua Handay e reading man in a forest scrambles purposefully up a steep rockface, scrabbles in a little pocket of earth, and digs up an old (though anconvincingly pristine) biscuit tin from which he produces birds' eggs, cigarette cards, and a penknife. Then, with a wobble in his voice and the hint of a tear in his eye, be begins to sing "Wimoweh" as he uses the penknife to whittle a stick. All together now: Assashhi What is this? A Tribute To Dennis Potter? Well yes, in a way it seems that is just what it is. This is the climax to Stone, Scissors, Paper – the very title a reference to a playground game - the drama with which Richard Cameron won the first Dennis Potter Film Of The Year Award. Though too long and too sentimental, this drama (Potter might have smiled wryly at that word "film" in the name of the award) was well acted by Juliet Steven-son as a battered wife, and Ken Stott as a bored and unfulfilled husband and monumental mason with whom she has a platonic affair. It was also produced to bigb profassional standards.

Marie times :

Television/Christopher Dunkley

Missing the heart of the matter

appearance of Potter's work as honest an account as possible tion of the pop-repeat approach for his father; the cynical agent often very funny; no great surwithout, it seems, much appreciation of what Potter was really about.

When the author of The Singing Detective showed us the hoy in the tree to the Forest of Dean, squashing the ladybird, watching his mother make love with the Other Man, and dwelling obsessively on childish things, that was not a calculated appeal to the general consciousness of the public, not a cynical ploy to tug at our heartstrings. It was an attempt to do what artists in every medium have striven for ever since men scratched plctures by firelight on the walls of caves: to dig down inside themselves and express their coness, their bumanity, to the hope that the revelation would make common ceuse with the onlooker. "Only connect!" said E.M. Forster.

There is all the difference in tha world between searching sort of material reproduces tha your innermost self and giving

of what you find there, and attempting to create for the sake of public entertainment more of whatever has proved in the past to be most appealing. It is the difference between the best of the European cinema tradition and the worst of Hollywood, the difference between good books and bad, between the great composer who is trying to show us his soul and the pop music industry which strains perpetually to repeat its last success. What is sad and a little frightening is that there does not seem to be anybody left to British television and, most worrying of all,

None of which is to suggest that popular entertainment is ss, nor that it is all alike, although watching FIV's cynical approach to the nine o'clock drama slot in the last coupla of years, you might wonder. Anybody wanting a quick illustra-

anybody in BBC drama, who

recognises the difference.

need only catch one episode of The Man Who Made Husbands Jealous, ITV's current Friday night nine-o'clock drama, which achieves the near impossible trick of consisting solely of surface material - big bonses, fast cars, short skirts. It is hard to helieve that a woman as witty as Jilly Cooper wrote it. Perhaps the adaptation is unkind.

ut there is at present a remarkably large number of highly professional and entertaining drama serials around, most of them produced by the BBC. On Fridays BBC1 offers Drovers' Gold which must surely be the first Welsh cowboy drama, Writer Michael Chaplin has managed to incorporate just about every constituent of the classic American original: persecuted tenant farmers: the desarted wife (Garaldine James) with the loyal son standing to

with a big hat who does the dirty prise, perhaps, given that the work for the landowner; the actual cattle drive; the sheriff and his posse, played here by the bailiff and his men; the hold-up; the loss of everything including the herd in a poker game; even the genteel young lady in fancy clothes whose la-di-da ways dissolve when she falls for the horny-handed son of toil. Apart from a couple of Clint Eastwood classics, this is probably the best western made anywhere in the

last 15 years. Saturday brings Jonathan Creek (BBC1 again) which bears comparison with Minder. It combines crime and comedy, uses unconventional casting stand-up comedian Alan Davies as the magician's assistant and sleath, with sitcom actress Caroline Quentin as his companion and, again, high production values. The plots, all, it seems, locked-room mysteries, are sheer

writer is David Renwick, creator of One Foot In The Grave. This week's episode was set in a running at the age of 65. house shared hy its human inhabitants with a large number of apes, one of which had just eaten an entire thesis on subdural haematoma when the action began...

of these serials on Sundays. Wokenwell, with a splendid cast including Celia Imrie and Bryan Pringle, (ITV) seems to owe something to Twin Peaks and Northern Exposure in that smalltown life is depicted with a super-realism that is continually undermined by the weird and wonderful. However, in the end the Wokempell plots fight shy of genuine magic realism and opt for mundane resolutions. Plotlands (BBC1) is, oddly, another British version of a classic American genre: tha homesteading grit and the risk characteristic of nonsense, but the dialogue is movie. Here, though, the bostile

landscape and threatening weather are in the suburbs of the English bome counties. And Born To Run, the best of the three (also BBC1), is another helping of feminist triumphalism from Debbie Horsfield but with some very funny characters, even funnier situations, and hilarious lines. Billie Whitelaw stars as the repressed wife who discovers orgasms and marathon

There is much here to entertain us, and it would be churlish and silly to dismiss It for failing to sustain the ambition of the single play in British television drama between the 1960s and There are no fewer than three 1980s. That said, bowever, we do pay our licence fees to maintain the BBC and one of the purposes should surely be for it to set an example and keep others up to the mark. Whatever quantities of well made serial drama are produced there is no reason why the more complex ambitions of Dennis Potter and his ilk should be forgotten and abandoned. The Dennis Potter Film Of The Year Award may be aimed at reviving those ambitions, but it would be good next time to see more evidence of an appreciation of the

Theatre Baseball gets lift-off

What is so irritating is that this

obody talks about the importance of dance in musicals any more. but as this exuberant revival of Damn Yankees proves, you can dance your way to success. Even Jack O'Brien's astute direction cannot quite save the ludicrous Act 2 plot and some of the performances are not so much Broadway as downright broad, but the superbly energetic company could run a power station let alone a musical.

Richard Adler and Jerry Ross's reworking of the Faust legend tells the story of Joe, a middleaged hushand and baseball fanatic who dreams of his two-bit team winning the pennant and accidentally calls up the devil, who promises to transform him into a long-hitting legend who will inspire the team to victory in return for his soul. Cagey, faithful and square, Joe, however, is in real estate and knows all about escape clauses and manages to wrest one from the devil but plausible Mr Applegate, complete with a nasty habit of setting fire to Douglas W. Schmidt's gorgeously satirical 1950s set, a riot of triangular lines and pastel

So far so good, but even to someone who can't tell e bunt from a loaded base, the show achieves lift-off with the terrific baseball sequences showing off the team's terrible game. Rob Marshall's choreography ie deeply indebted to Bob Fosse's original work and not just the elbows akimbo, knocked-kneed, jaunty hat stuff, but the boisterous athleticism too. Who can blame him? These big numbers don't belabour the plot, they fuel it. They aren't just e series of flasby moves, they bave real shape and build. The guys launch into the defining number, You've Gotta Have Heart" with its boped-filled harmony line sailing over the cheery, sauntering inclody and then suddenly we are in the middle of a hilarlously staged sequence in the changing

The production gives in to star power in the middle of Jerry Lewis's act two solo show-off

Devilish: Jerry Lewis as Mr Applegate in a wonderfully energetic revival of 'Damn Yankees'

number and he stops dead to deliver 10 minutes of his vaudeville act, but elsewhere he laps np the opportunity to play it (relativaly) straight, displaying a wicked urbanity as Applegata. Joe tells him, "there are more important things in life than being a bero". Lewis stretches and savours the moment before neatly despatching it with the retort "I'd love to embroider that on a needlepoint pillow".

In the three years it has taken for this revival to arrive it bas grown brasher, busting a gut to give you a good time. You wish the cast would relax occasionally and allow the pathos back in. The over bright sound design doesn't help and the tempi are sometimes too driven, which drains them of charm. April Nixon as the temptress Lola has a strong voice and great legs but "Whatever Lola Wants"

seduction only impresses when it should induce heart failure. Overall, there is too much "musical comedy acting" and not enough truth, but compared with tha automated Beauty and the Beast, this is a triumph of energy

David Benedict

At the Adelphi Theatre, London

Ballet/Clement Crisp

Sweeties from Birmingham

has come to Covent Garden for a short season, and looked very sparky at Monday's opening. (Uncharitable thoughts suggest that this may be due to the fact that BRB is now separated from the Opera House.) Monday's triple bill ended with David Bintley's jazz romp, The Nutcracker Sweeties. As I reported at its premiere, Bintley's response to Duke Ellington's hig band attack on The Nutcracker is ebullient, full of jokes, musically apt. The design - Peter J. Davison's jolly sets; Jasper Conran's equally jolly costumes - and the dancing are buoyant and clever. Chenca Williams and Joseph Cipolla steal the show as a deeply Spanish couple. The score is splendidly played under Paul Murphy - as was all the music of the evening. The whole affair is brash, and had the groundlings in a roar.

The programme also brought two works new this season. Neither won my heart. Oliver Hindle

piano concerto (Moritz Mosz-kowski in Times Square) and BRB proposed ten apprentice talloses the bout, though the design by David Blight is stylish. Lila York's Sanctum is earnest about Our Mechanistic World, and involves a young man (the excel-lent Robert Parker) with a borde of automata. He finds peace fleeing a great deal of robotic dancing and a grinding score by Christopher Rouse - with the same automata, now afflicted with pastel clothes and "lyrical" (i.e. bloodless) movement to the adagio from Ravel's G major piano concerto. Such misuse of Ravel merits a lengthy term in the Hulks. BRB's dancers work like demons in both pieces, and deserve far, far better.

en days ago the troupe showed what that "better" was in an evening at their home theatre. For the second year running, David Bintley has made it possible for his artists to try their hands at creating dances. So, on in Bright Young Things is entan-gled with Gershwin's flatulent Ballet unveiled its choreographic

into the future. Everything was right about the occasion. A theatre packed with an audience eager to see what its own ballet company was doing. A top price of £10 for eeats. An excellent choice of score: Mussorgky's Pictures at an Exhibition. And young dancers given one or two of the pictures to realise in terms of today's world. It matters less that the new choreography was apprentice stuff than that the chance was there, in a theatre with an audience, with lively design from students of the Birmingham School of Theatre Design. Among the aspirant creators I was most impressed by Jonathan Payn's bright-edged dances for the children in the Tuileries gardens and the ballet of the unhatched chicks: I hope to see his work at greater length. But the whole enterprise was vital. The air was keen. How different from the stale gusts emerging from certain other troupes.

ents making steps, taking steps

Opera/Richard Fairman

Italian rarities in concert

Then the claseical record industry and enterprising small opera companies are exploring the backwaters of operatic history at a rate of knots, it is amazing to think there are any rarities left to discover. Two more in one weekend? It hardly seems possible, but London is

still seething with activity. The Royal Opera's Verdi festival continues to throw up much that is new and fascinating. (Whatever else the new chief executive Mary Allen does, she must ensure this ambitious festival gets her full support.) Premieres of the early Verdi operas are spaced out so there are several each year, although tha most obscure get relegated to concert performances. In the casa of Oberto, Verdi's first opera, this was less important, as Opera North has already staged the work in Britain, but two London concerts were a welcome opportunity to get to know it better.

Samuel Ramey as the big draw in the title-role. But exhaustion kept him away and his place was taken by John Tomlinson, who had sung the role in Leeds, a dominating presence as ever, even if at the price of some heaving and lunging in the singing that was far from stylish. Elizabeth Connell is a true soprano these days and her Leonora shone at the top of the voice, while sounding disappointingly shallow lower down. Denyce Graves made a fine impression with ber sultry mezzo in Cuniza's slow, lyrical music and fellow American, the tenor Stuart Neill,

requires. All round, not a cast to remember, and Simone Young failed to keep up the taut, rhythmical forward drive on which early Verdi thrives, deepite moments of

tha free top notes his role

Royal Opera had hoped to have to put in perspective how unapologetically forceful Verdi was in his musical inspiration from day one in comparison with the other Italian composers who were established at the time.

Donizetti was, of course, one of them, and it was interesting to go from Oberto to Chelsea Opera Group's concert performance of the latter's Poliuto at the Queen Elizabeth Hall on Sunday. This story of Christians thrown to the flames actually came almost ten years after Verdi's first opera. though one would not guess it. Brad Cohen'e energising performance, with the COG orchestra sang a passable Riccardo without and chorus on their sharpest form, had an early 19th-century surface brilliance, although it was none the worse for that Donizetti was decently served by Penelope Walmsley-Clark's superbright singing as Paolina, together with Terence Robertson excitement from the Royal Opera a promising Poliuto and Roberto orchestra and chorus. The inter- Salvatori a strong, if hollowest of the evening was the chance voiced. Severo.

Lunatic instability

Disarray over monetary union threatens to derail the intergovernmental process for reforming the EU treaty

The recent antics of the provocative, but seems to that they insisted that Emu me over the top. Mr Kohl is the long-running saga of not the kind of fellow who on principles that were European economic and easily succumhs to the authoritarian undemocratic vapours; and as regards Mr monetary union have been Chirac, and in politics genso hizarre that it is difficult erally, a more prosaic explato eccount for them in rationation is usually more plaunal terms. sible: stark incompetence. For example: the new

First, Mr Theo Waigel. German finance minister, tries to revalue the German gold reserves, as if to strengthen Germany's credibility for monetary union; of currency in the first wave is course, its only effect would instead bave been to damage Germany's credibility.

Then, Mr Lionei Jospin fies for the first wave, the comes to power in France real question they will be demanding a raft of new asking is this: "Is France/ demanding a raft of new conditions for monetary union, most of which must be anathema to Germany. But in Luxembourg this week his finance minister denies any intention of renegotiating the terms of Emu: all be wants is time in the next week or so to "study" the so-called stability pact for enforcing budgetary rigour in the planned single currency zone.

Since the terms of the stability pact have been known since last December, per- quence of past bypocrisy haps the new French government does not really know what it wants

These erratic episodes can only spell bad news for the prospects thet Emu can start plausibly and on time; but this new disarray over monetary union is now also poised to derail next week's European summit in Amsterdam, which was supposed to be the end-game of a quite separate process, the intergovernmental conference (IGC) for the reform of the European Union treaty.

Mr David Marsh, of the Robert Fleming investment bank, bas suggested in the New Statesman that Franco-German behaviour can only he explained in irrational terms: Mr Jecques Chirac and Mr Helmut Kohl are so stressed out hy the implications of Emu that subconsciously they want it to fail.

and deflationary.

Yet in Germany itself, the Bundesbank sets monetary policy against a background of national and democratic economic policy; and the same is true in other civi-Franch government's lised countries. In the European Union, by contrast, the future European Central Bank (ECB) is supposed to set monetary policy in a virtual policy vacuum, as if it were sitting on Mars.

This is obviously a mix-ture of lunacy and hypocrisy. It must be asking for political trouble to launch an Emn whose only serious policy instrument is the anti-inflationary role of the ECB, especially with unemployment at record levels in France, Germany and Spain.

If Emu is ever launched, we can dismiss the infantile notion that it will operate bappily and amouthly on auto-drive: it is the participating governments which will have to make it work. If it works badly, as all the Cassandras predict, then the governments will have to take responsibility for dealing with the problems. frightened of the historic profligacy of their partners, And when they do, they will

psychosis, is amusing and Jospin: most of his demands must be anathema to Germany the Europeans.

103 of the European Union Treaty, which says that "memher states. . . shall co-ordinate" their economic

> When the French talk of the need for an "economic government" in Europe, to promote growth and employment, the Germans run scared that Mr Jospin wants to debauch the single currency with unreconatructed Keynesian reflation. But for the Germans to pretend that they can solve the problem by not having any collective economic policy-making in Europe is just bypocrisy: especially since France's infletion record, over the past 10 years, has been as good as Germany's.

The problem is that, even if the French government is right on some of these questions of principle, the timing of its attempt to re-open long-suppressed issues is deeply disruptive. The Emn stability pact was supposed to be ratified at the Amsterdam summit: the French say they will not have finished "studying" it. They also say they want a new treaty protocol to article 103, which will detail bow Europe should or conld make its economic policy; ohviously this protocol can-

not be ready by next week. Until this week, Europe's governments prstended to make an absolute distinction between Emu and the IGC. The Emu programme was signed and ratified, and was not on the negotiating table; the IGC was about quite different and quite senarate treaty issues: and there was no connection between the two.

The French heve now ensured that the two issues will be hopeiessly confused. So if there is e smash, it will be an almighty smash. The British, of course,

will continue to do what they always do so well: sit on the sidelines and carp et

Trade and human rights needs global banner

From Professor Jean-Pierre

Sir, As one who spends e great deal of time in Asean (Association of South-east Asian Nations) countries and other parts of Asia, I often find myself cringing in embarrassment at the hectoring, sermonising and sanctimonious tone of west ern politicians and others. The effects are almost invariably counter productive, and indeed seem definitely to have been so, as yon point out ("Asean's burden", June 3), in respect to Burma'a admission to Asean

One must not forget that to many Asian ears, terms such as "Western values" convey oppression and exploitation, rather than human rights. It is not that long ago that in the US rights were brutally denied to racial minorities, while the skeletons in European cupboards are too numerous to mention, Racism remains a fact of western life and one many Asians experience.

Avoiding sanctimonious sermonising should not, however, preclude us from having a genuine concern for those who are cruelly and arbitrarily victimised, as too many people continue to be in a number of Asian countries. Here again, though, one must be very careful which vehicle to put

As Jagdish Bhagwatl eloqueotly argues ("Short on trade vision", June 3), trade in general and the World Trade Organisation in particular should not be the means for Washington, or other western capitals, to push the human rights agenda. It is natural that such tactics should be seen in Asia as a protectionist ploy and the effects here, too, may end up being highly counter-productive, jeopardising the global trading system and the prosperity it has brought and further promises. There are many other organisatious in

agenda may he more legitimately, hence effectively, The recently established dynamic relationship between America and Asia (through Apec) and between

where the human rights

Asem) represents undoubtedly one of the most promising scenarios for the decades ahead. Human rights is a crucial subject which must be addressed for the sake of current and future generations. This must be done in sophisticated and truly global manner, rather than as e banner for western protectionism and cultural neocolonialism.

Jean-Pierre Lehmann. professor of international political economy, International Institute for Management Development. Chemin de Bellerive 23. CH-1001 Lausanne. Switzerland

From Professor Philippe Sands.

Sir, I have no doubt that inspired by the best of motives in urging the new UK government to pursue human rights and environmental issues outside trade treaties ("Short on trade vision", June 3). The difficulty is the relevant treaties. and the institutional arrangements they create, do not operate in a vecuum.

Human rights, environment and trade are inevitably interconnected, and they need to be treated as such. into a separate treaty body solves nothing over the long term. This is precisely what has happened over the last 50 years. The result is that the international community is served by an ever increasing number of institutions

competing for a piece of the

action. Professor Bhagwati is prescribing further fragmentation, putting off today's conflicts for tomorrow.

There are two real problems. First, that there exists no international body charged with the task of balancing conflicts between these three subject areas, or integrating the standards each establishes into a coherent set of policy and legal arrangements. The second that there are too many treaties (and treaty bodies) operating in each of the three areas

If the new UK foreign sec-

retary really wants to grapple with these issues he should institute a thorough review of international institutions and treaties in the field of human rights, environment and trade, He might then come up with proposals to rationalise existing arrangements and ensure proper integration between the three areas. A good starting point is the German government's proposals for radically reforming international environment institutions, which is to be discussed at the G7 later this month and which, hopefully, the UK will be

Peter Poore,

A dubious link with inflation

From Mr John Wells. Sir, Robert Chote should perhaps not be too exercised over the subject of the Bank of England's accountability for meeting the objectives set for it ("Our mortgages in their hands". June 4). The French election resuits showed that voters will hold elected governments ultimately responsible for economic performance and punish parties which inflict excessive and unnecessary deflation.

The main problem iles surely with the objective set by the chancellor for the Bank: namely, the achievement of price stability (as defined by government) as its overriding task - albeit without prejudice to this objective, to support the government's objectives for

growth and employment". Not only is the international evidence supporting a supposed relationship between central bank independence and low inflation open to much criticism with "dependent" ccotral banks, such as those of Japan and Australia, being as successful as those of Germany and New Zealand, But, there is no evidence that low inflation is statistically associated with faster and/or less variable output growth: still less that the former is a necessary precondition for the latter. On the contrary, Professor Robert Barro, while working at the Bank, showed that modest inflation (aibeit in single digits) may be mildly beneficial for

growth. The conservative bias manifest in the Bank's recent track record can only add to our anxieties.

John Wells, faculty of economics. University of Cambridge, Sidgwick Avenue, Cambridge, CB3 9DD, UK

Treaty has no answer

From Mr Rophael Papadopoulos:

Sir, Bernard Connolly's suggestion (Letters, June 6) that the way to change the 1999 Emu timetable inscribed in the Maastricht treaty is for the European Council to declare that no country has satisfied the necessary conditions, offers an insight into creative legal thinking of e type which, in terms of ingenuity and scope, appears to go beyond the creative accounting we have seen so far. Yet, unlike creative accounting, which may be accepted or rejected on merit. Mr Connolly's idea may hit a more serious snag. water, education, healthcare, From what is public knowledge about the Maastricht treaty it appears the Council did not entertain the possibility of what Mr Connolly terms an "empty shell" third stage, at the time. If this is so the treaty will

not provide an answer as to what steps are to be taken in order to fulfil the political objective of filling the empty shell. The answer to this will almost certainly require political ingenuity which is far more demanding and less forthcoming.

Raphael Papadopoulos. 52 Asmuns Place. London NW11 7XG, UK

From Mr Peter Poore. and an effect of poverty. to people who are getting poorer is only one way to

The very poor need more choices

Sir, The article on the UN report on population trends, ("Birth rate down, hardship up". May 29), offers the global view that world population is not growing as fast as was feared.

This obscures the fact that in the poorest parts of the world, it is. The terrible toll on populations exacted by Aids and conflict cannot be allowed to allay fears of population growth among the very poor, particularly because both are a cause

Tories in the fog

cession to Mr John Major would ballot were dashed by the outcome of last night's count. The prospect now is for at least one, and probably two more rounds of voting before Conservative MPs choose a new leader. The risk is that the eventual outcome will satisfy no one.

As predicted, Mr Kenneth
Clarke, the shadow chancellor.

came top of the poll with 49 of the 162 eligible votes. But his lead over his four rivals was much smaller than that suggested by an informal canvass of the party in the country. From grandees to grassroots, Conservatives outside Westurinster gave an an overwhelming endorsement to Mr Clarke,

Appalled by the infighting over Europe, which cost the party the election, their judgment was that Mr Clarke was the candidate best equipped to mount an effective opposition to Mr Tony Blair's government. Their views were blithely ignored by two thirds of the MPs, many of whom cannot forgive the former chancellor for refusing to rule out a single European currency.

But if the Eurosceptic right to advance its own cause. The three-way split in its vote

Any hopes that the deep fog of Howard has left the sceptics confusion hanging over the suc-With Mr Redwood just out in be dispelled by a decisive first front, the other two face strong pressure to withdraw. But few believe that Mr Redwood can ever step up to the leadership.

That leaves Mr William Hague, the youthful former Welsh secretary, as the princi pal challenger to Mr Clarke. Although his tally of 41 votes fell short of the former chancel lor's, many at Westminster now see him as the favourite.

While Mr Hague has been careful to temper his Euroscep ticism during the campaign, presenting himself as the nonideological candidate, he has never hidden his antipathy towards a single currency. The reasoning is that in a thirdround run-off he would draw substantially more votes from the right than would Mr Clarke.

All such arithmetic is perilously speculative. What is evident, though, is the difficulty that Mr Hague would face if his chosen role as the unifying candidate does win him the leadership. An intelligent politician, he lacks the weight and experience to succeed where Mr Major so dismally failed.

That leaves the choice for Tory MPs between ideology and succeeded in its ambition of political revival. The sceptics frustrating Mr Clarke's hopes of can deny him Mr Clarke leaderan outright win, it did nothing ship but only at further great cost to the party's dismal standing. And one thing is clear from between Mr John Redwood, Mr. last night's result - Mr Clarke Peter Lilley and Mr Michael is not about to go away.

Handling Abuja

Africa's higgest single Nigeria has no qualification for engineering project, the \$4hn Nigeria Liquefied Natural Gas scheme, is in trouble. The decision by Mr Dan Etete, Nigeria's petroleum minister, to dissolve Its board of directors, has undermined the confidence of his foreign partners. In spite of strenuous efforts to protect the giving their tacit approval, they project from political interfer- are sending a thoroughly mudence, that is precisely what died signal to Abuja: implicitly seems to have happened.

Sheli, Agip and Elf, the multinational investors, seem powerless to respond. "Least said, soonest mended," sums up their reaction. In the meantime, the project management has been ordered to report directly to the minister's office, and confidence in swift progress in building the huge LNG export terminal has

been undermined. Under any other circumstances, this high-handed approach should prompt a robust response. But western reaction is inhibited by uncertainty over just how to deal with the Nigerian military regime. That holds as true for business partners as it does for governments.

At the moment, the Nigerian government is beavily preoccupied with its efforts to reverse the military coup in Sierra Leone. Its intervention in its fellow west African state was a big mistake, irrespective of the admirable objective of restoring a civilian administration.

other members of the European approving military intervention in Sterra Leone while consider ing sanctions which might help to bring about the return to democracy in Nigeria.

Until Mr Abacha has put his the role of regional policeman it intends to use serious sand tions - an oil embargo - to per regime itself, have had little if

any effect. It is a classic case of commer-

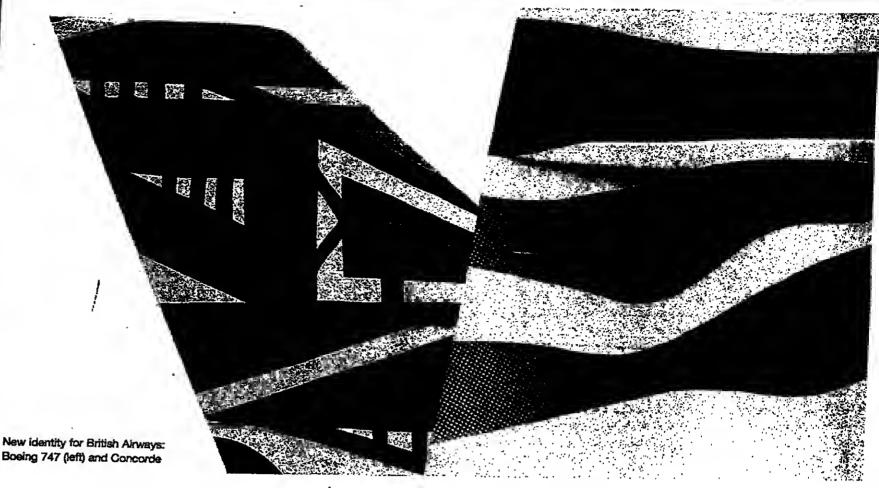

this task other than the military muscle that brought general

Sani Abacha in power in 1998. African nations have been wrong to give this action their blessing. The US, Britain and Union should also object. By

own house in order, Nigeria should not be allowed to play The west must decide whether suade him to revive his own democracy, or whether it can do so by persuasion. Certainly, the modest sanctions now imposed a ban on arms sales, and visa restrictions on members of the

cial interests having to be reconciled with a human rights agenda. Britain's new Labour government has brought this into focus as an important strand of its foreign policy. Like the oil multinationals, it wants to carry on doing business with Nigeria. Mr Abacha is not making it easy.

COMMENT & ANALYSIS

Flights of imagination

British Airways' change of livery reflects the growing use of design to stand out from the crowd, say **Alison Smith** and **Michael Skapinker**

Airways aircraft they could see it adorned with a Kalahari bush painting or a calligraphy inspired by a Chinese tea ceremony. BA is getting rid of its sober blue and motto. "To fly, to serve" on the

The new livery, to be introduced over the next three years, will include 50 different designs aimed at portraying the airline as British but modern; rooted in its UK heritage but at home wherever it travels.

But the publicity surrounding the launch, which has forced BA to deny suggestions it is dropping its "Britishness", raises questions about what large organisations gain when they seek new corporate Identities.

The question is particularly ately, even in the knowledge that ers from a variety of it will generate controversy at least initially.

BT decided it must change its image to mark its shift from UK monopoly to private sector company looking for business overseas. The £60m (\$98m) image redesign included not just the introduction of a piper as its logo - criticised then for being lightweight and whimsical - but adoption of BT as its trading

For both BA and BT, the new identity was an outward sign of significant change within the organisation, heightening the contrast between the amount spent on a new image - £60m in the case of BA's changes including repainting the fleet - with the numbers of jobs to be lost. At BA the new identity is part right designs. The livery includes of the organisation's "second rev- a paper-cut of a cockerel by

he next time passen-gers hoard a British Mr Robert Ayling, BA's chief olution, launched last year by executive, to prepare the airline for the next millennium. The first revolution, culminating in BA's decorated by Whale Rider, a privatisation in 1987, changed the airline from heing a company criticised for its bad service to red livery and crest - with its one of the world's most profitable and admired carriers.

Mr Ayling says the second transformation is necessary hecause BA has to compete in more liberalised markets, where low-cost carriers can offer cheaper fares. It also has to compete against new airline groupings, such as the Star Alliance, a six-airline partnership led by United Airlines of the US and Lufthansa of Germany, which

unveiled a new logo last month. As part of its programme for the new millennium, BA is cutting costs by putting out to contract services such as catering pointed when, as in the case of which can be done more cheaply BA - or British Telecommunica- hy outside suppliers. But It is tions in the early 1990s - the task also offering monolingual cabin of establishing a new identity has staff voluntary redundancy and not been forced on the company replacing them with flight attenas a result of a merger or take- dants who speak foreign lanover but has been chosen deliber- guages and can deal with custom-

> backgrounds. The new livery, the costcutting and the change in staff skills are all designed to show employees and customers that the airline is changing.

The company says it wants to persuade its customers that it is both "global and caring" and able to deliver service to passengers of "This identity should put clear

hlue sky between BA and its competitors," says Mr John Sorrell, the chairman of Newell and Sorrell, the London consultancy which designed the new livery. On BA's instigation, Newell and Sorrell travelled the world talking to potters, weavers, quiltmakers and calligraphers in an attempt to come up with the

painted wood carving by Joe, David of the Clayoquot people of north-west Canada, who spends days selecting his wood and "feels he is giving away part of his soul and spirit" whenever he lets a work go.

Another will carry the design Delftblue Daybreak, inspired by traditional Delft ceramics and created by Mr Hugo Kaagman, who began his career spraying graffiti in the centre of Amster-

Mr Terence Conran, the UK restaurateur who has long championed more innovative corporate design, yesterday commended BA on its new livery. "It has charm, humour and the sort of style that standing the essence of the brand huge multinational husiness," he badge, it's a management mecha-

r Brian Boylan, chairman of Wolff Olins, a London-hased design consultancy, says that services in sectors such as telecommunications are becoming more uniform, a compelling providers to seek ways of showing how they stand out from competitors.

As innovetions, for example billing per second", are copied more quickly it becomes harder to achieve lasting differences in the product itself. "You cannot sustain those differences, so you have to look at softer issues," he

He adds that businesses established in a particular field have been struck by the success of new competitors, entering from different sectors, which have won customers on the basis of their corporate reputation alone.

The entry of UK high street Sainsbury into financial services, an eptity based on Mr Richard Branson's personality while operating in areas as diverse as airlines, cola and financial services, are two recent examples.

These new competitive pressures have helped to change the corporate identity industry from its early days at the beginning of the 1960s. It emerged then in the US with the first wave of industrial conglomerates and at first focused on creating names and

Mr John Rushworth, a director of Pentagram, the UK-based design consultancy, believes the corporate identity has evolved further since then. "In the 1960s identity was seen as a labelling exercise," he says. "But today a good Identity is about under-away.

Mr Sorrell sees another significant change. "The mantra of corporate identity of the last 30 years was to get high recognition and to be consistent," he says. "But high recognition is no good unless you are also liked."

Many large husinesses still think in terms of a "monolithic" approach which is dominated by the need for consistency, he

In taking this line they are missing the opportunity to present the diversity of their organisations, which would help them in communicating a sense of warmth and humanity to their customers.

"Most corporations are stuck with a very limited range of grammar to express themselves." he says. "Our use of artwork and more varied tone of voice."

ny's aspirations and intentions to

But there are limits to what a new corporate identity can achieve, no matter how varied its tone. While it signals the compa-

both employees and those outside the organisation, customers' experience of the products and services it provides, and their own contacts with staff, will weigh more heavily in determining their attitude towards the

"An identity can't do it on its own," says Mr Boylan. He says that the lukewarm response to Pepsi-Cola's multi-million dollar launch last year of its new corporate colour - blue - shows the limitations of embarking on a new identity which does not reflect the qualities of the brand or company. "It was all colour, and no substance," he says.

The true test of whether a new and 1970s, designing a corporate corporate identity is worthwhile can only be seen after the initial

> Mr Charles Trevail, managing Sampson Tyrrell, says there are three ways to judge whether a change in corporate Identity has been effective: "Is there a stronger bond of loyalty between the company and its customers; does the share price go up; and do staff understand and believe in the new values of the company? BA says Its staff, who were

shown the new livery before its public launch, generally liked the designs. Whether they approve of BA's new corporate direction is another question.

Cargo and baggage staff have agreed to wage freezes as part of an agreement that will keep them inside BA. However, ground staff are being ballotted on whether to take industrial action over the sale of BA's Heathrow catering operation.

Some in BA are pessimistic about the outcome of the ballot, photography has given BA a saying they think staff will support their unions over the contracting-out programme. If they are to convince their workforce that BA needs to change, it will clearly take more than new tail designs from around the world.

Slobodan's cash

Serbian president, has just been thrown a financial lifeline by Stet, the Italian telecoms group, and OTE, its Greek counterpart. Between them the two companies have agreed to pay DM1.586bn for a 49 per cent stake in the telecoms business of Serbian PTT and a mobile telephone licence. At the insistence of Mr Milosevic, 80 per cent of the payment will be up-

front and in cash. This is very good news for Mr Milosevic, who has been struggling to find a way ont of the financial sanctions which exclude Belgrade from IMF membership and access to international capital. The US and EU countries Insist these will remain in place until Serbia fulfils its obligations under the Dayton agreements, including the return of refugees to their homes and co-operation with the UN war crimes tribunal in

Whether the deal will prove to be such good news for the two foreign telecoms companies or Serblan consumers is more doubtful. The agreement comes as Mr Milosevic, a consummate political operator who remains the most powerful politician in Serbia despite having led his country into international isolation and poverty, is preparing another complicated manoeuvre to keep himself in power. This mtails switching his power base money alone is not enough.

Mr Slobodan Milosevic, the from the Serbian presidency to the presidency of the Yugoslav federation, a hitherto largely symbolic post. To achieve his aim, Mr Milos-

evic has to find some means of paying the overdue wages of state and other employees whose votes will be essential The money from the Greek and Italian telecoms companies will do very nicely.

Given the highly political nature of the deal, the Serbian leader's divided hut vocal domestic opponents already accuse him of selling their "crown jewels" too cheaply. Such accusations are more likely to damage the foreign companies than Mr Milosevic. Having paid most of the money in advance, they have little leverage left if their new Serhian partner proves less compliant than hoped. This cannot be excluded, as the deal was done before introduction of Serbia's long-promised privatisation law and when much else remains opaque in the legal sys-

Serbia desperately needs foreign capital and know-how, but its political leaders have yet to demonstrate their ability to emulate the economic and financial reforms which have enabled neighbouring Slovenia and Croatia to recover from war and re-establish their international credibility. For that,

clean up Pelgio's financial analysts and to reach so: their banking

who's whos yesterday after the leds Kangyo Bank, in pursuit mer image after a stended over dinks with cimograte inchesters, appointed Katsuyuki Soguta, 54, as the youngest president of a major Japanese bank

100 years ago A Large Fund Of Humonr

The Directors of the Native Guano Company appear to possess a large fund of native humour, for they amounce that "they continue to have unabated confidence in its .. nltimate success". It was in 1869 that the company was registered, and no dividenid has yet been paid, so it will be admitted that the board is a peculiarly cheerful body. The public appears to think that . the success of the company will be very ultimate indeed. for the £5 shares, fully paid, are quoted at the striking figure of half-a-crown to seven and surpence (20.125-60.375).

50 years ago United States Of Europe

Washington, 10th June. Mr. Marshall, Secretary of State, to-day expressed general approval of a resolution to put Congress on record as favouring the creation of a United States of Europe within the framework of the United Nations. "The U.S. welcomes any initiative which may be taken by the peoples of Europe within the framework of the United Nations to ensure greater co-operation among themselves to expedite reconstruction and restoration of the economy of

BA warns delay may hit planned US link

† ★

By Michael Skapinker, Aerospace Correspondent

British Airways is likely to drop its proposed alliance with American Airlines if US and European regulators do not give it the go-ahead by November, Mr Robert Ayling, BA's

chief executive said.

Mr Ayling said BA and American Airlines bad not expected regulators to take so long to approve their alliance, which was announced a year ago today. The alliance envisages extensive co-operation and revenue sharing.

Mr Ayling said approval had been beld up by US and UK elections. He boped tha alliance would still win approval transportation, the UK government and the European Commission. He said warmer relations between the Commission and the UK government would help regulators reach agree-

Mr Ayling said that BA aged by the GAO'e report wanted the deal approved by November, when take-off and landing slots will be allocated for the summer 1998 season. "After that it becomes more difficult. There comes a point in any transaction where not having approval is tantamount

to being told 'no'," he said. The UK Office of Fair Trading has recommended that the alliance be allowed to proceed if the two airlines give up 168 weekly slots, or 12 round trips a day, at London's Heathrow airport. Mrs Margaret Beckett, trade and industry secretary, will make the final decision for the UK government.

The General Accounting Office, the investigative arm of from the US department of the US legislature, said last transportation, the UK govern-week that other US carriers should be entitled to an extra 23 round trips a day at London's Heathrow airport. Mr Robert Crandall, Ameri-

can's chairman, said yesterday the two airlines were encourbecause it did not suggest all the extra slots should come from BA and American. Other US afrlines could win under

Beijing's troops demand opens new HK rift

By John Ridding in Hong Kong

China is pressing for armed troops to be stationed in Hong Kong before tha transfer of sovereignty at midnight on June 30, threatening a new dis-

versy over arrangements for the handover ceremony and a warning yesterday from Mr Chris Patten, governor of Hong Kong, that other countries might follow the US and boycott the swearing in of a Bei-jing-backed legislature.

the Hong Kong daily Wen Wei Po, a mouthpiece for Beijing, the military handover should not take place at the border control but in the garrison troops' barracks.

It said the mainland garrison would need more than two hours to travel from the border to its barracks and demanded that Britain should arrange traffic and security measures to allow this.

defence handover practice".

The editorial hinted that if Britain failed to meet China's request, Beiling would not co-operate with British plans to withdraw its garrison in the hours after the midnight transfer of sovereignty.

The new demand could reopen a dispute over the presence of armed military personnel ahead of the handover, which seemed to have been settled after the UK agreed that China could station an unarmed advanced guard in the territory to prepare for the transfer.

"Ministers are committed to sition but there is no question of Britain agreeing to the deployment of tha main People's Liberation Army garrison in Hong Kong before July 1," a Foreign office spokesman said in London.

Arrangements for the cere-

cent of electricity generation in England and Wales and, through its bidding in the wholesale market, is responsible for setting electricity prices 20 per cent of the time. It also owns the biggest distribution company in the UK, serving 3m customers.

If the bid proceeds, Eastern would be the eighth of 12 privatised UK electricity companies acquired by US interests taking US investment in the UK power sector to £11.4bn.

PacifiCorp has a stated aim of owning 25 per cent of world electricity generation. Analysts forecast it will make \$488m in the current year. It has a market capitalisa-

tion of \$5.9hm. One analyst said last night that Energy Group was seen as a natural fit for PacifiCorp.

French face | US Cuba move risks reviving row with Europe

By Nancy Dunne in Washington and Sander Thoenes in Brussels

US House Representatives was yesterday poised to pass a controversial measure to reinforce the

The House was due to vote pressure on the State Department to bar more foreign executives of companies investing in Cuba from entering the US.

a damaging trade dispute over Helms-Burton in April, will be in danger of coming apart. So far the US has only barred executives from two companies, one Mexican and one Canadian. No European executives have been refused entry and supporters of the Helms-Burton law suspect the US is avoiding sanctions

promise on investment in Cuba with the EU. Congresswoman Ileana Ros-Lehtinen, a Cuban-American from Florida, said she had introduced the new measure to show the EU that Congress would not let President Bill Clinton's administration ease

the Helms-Burton legislation. "The timing, of course, is very provocative," said Mrs Erica Mann, a member of the European Parliament responsible for US relations. Representatives of Sir Leon Brittan, the

EU trade commissioner, and Mr Stuart Eizenstat, US undersecretary of state for economic affairs, are due to meet next week for talks following up the April accord. The EU suspended its complaint against Helms-Burton in Helms-Burton anti-Cuba law. the World Trade Organisation after the US and the EU agreed on a measure which would put to seek a bilateral agreement to constrain companies from "trafficking in illegally expropriated" foreign assets in If the measure passes the Senate, the truce between the "The ball is rather in the US and the EU, which averted

American court," a European Commission official said yesterday. "There are ways for the US government to defuse this. We have yet to get indica-tions that there are determinations against European companies in the pipeline. That would clearly endanger the agreement. We might reopen the WTO case. That should act

as a deterrent." If the US and EU reach a against European companies bilateral agreement, the Clinwhile it negotiates a final comton administration has promised to ask Congress to weaken the part of the Helms-Burton act which requires the US to deny entry visas to executives, directors and their families. and shareholders of foreign companies investing in Cuba.

Canada and Jamaica have defied US pressure and strengthened economic ties with Cuba. In April, France, one of Cuba's biggest EU trading partners, sent a business delegation which pledged to

FT WEATHER GUIDE

THE LEX COLUMN Dollar danger

is the US going back to the bad old days of dollar bashing? Senior officials have stopped short of explicitly bad-mouthing the greenback. but incessant expressions of concern about Japan's rising trade surplus with the US, against a backdrop of a sharply weaker dollar, come perilously close to the same thing: The US may seem to have a case for complaining; after all, Japan's surplus with tha US has risen for seven months in a row. But it is not a case that stands up to much examination, and the solu-tion the US is advocating - stimnlating domestic demand - is likely

only to aggravate Japan's problems. For starters, the surplus is cur-rently around \$4hn a month, well short of the \$5hn monthly figures which brought trade tensions to a head in 1994. And given the relative states of demand in the US and Jap-anese economies, it is hardly a surprising state of affairs. Anyway, given its own obsession with a balanced budget, the US is hardly in a position to lecture Japan about stimulating demand. With the worst budget deficit in the G7 group and a debt/GDP ratio on the scale of Italy and Belgium, it is quite right that Japan should be trying to rein in

government spending.
Instead of grandstanding to domestic political audiences, the Clinton administration would do better to concentrate on what matters - improved overall access to the Japanese market, and continued deregulation. Certainly, there will be no quick fixes and, yes, Japan starts from a low base. But import penetration has improved considerably, and the Big Bang in financial services is evidence of a gathering deregulation bandwagon. Apart from being wrong-headed, the US's current approach also risks pushing an already jittery market into an avalanche of dollar selling.

Stet, the Italian telecoms group, is like an old maid rushing around buying expensive baubles in a vain attempt to make herself attractive to suitors. Yesterday's bid for Retevision, Spain's second telecoms group, was pitched 39 per cent higher than the rival bid. On Mouday, Stet bought 29 per cent of Serb Telecom. The price equates to around 5.7 times operating cash flow - a chunky multiple given left on the shelf in the whiriwind of the company's face. But with luck,

Eurotrack 200 Index 2432.1 (+17.0) Against the yen (V per \$)

global telecoms matchmaking unless it can supply a handsome international dowry. Hence, April's purchase of a 25 per cent stake in Mobilkom, an Austrian mobile group, at a premium around 50 per cent more than analysts think it is worth. Hence last year's investment, again at a premium, in Bouygues Decaux Telecom, the also-ran

of French telecoms. These investments are most unlikely to dazzle would be partners. The real attraction of Stet to any global alliance is its dominant position in Italy. BT's Concert or Global One, the Deutsche Telekom/ France Telecom partnership, would be delighted to sign the company up as its local distributor. If anything, the more assets Stet owns outside Italy, the more conflicts of interest it will present to potential allies and the harder it could be to embrace. Stet should put its extravagant tastes behind it, recognise that its virtues are solid domesticity and recycle its prodigious cash flow to shareholders,

Renault

If any normal company were to stake its reputation on the overriding need to close a car plant, only to turn around months later and commission an independent study into alternatives, beads would surely roll. But Renault is no ordinary company. It is a French national symbol, half state-owned and chaired by the former chief of staff to a Socialist prima minister. Its deference to France's new political mood, therefore, perhaps deserves Serbia's high risk status. The Ital- to be met with a Gallic shrug. Conian group seems worried it will be ceivably, the study could explode in

it will prove a formality, vindicat ing Renault's decision while letting the government argue that it forced the issue to be double-checked.

Nevertheless, the episode is a powerful reminder that the new French government expects bustness to play by different rules. Renault may well end up dispensing with large numbers of Belgian jobs. But after yesterday's bumiliation, it is difficult to imagine the management tackling the problems of its French operations with much relish. International investors should make no mistake; restructuring will still occur under France's new regime, but it is going to be a slow and painfully tactful business.

Energy Group

And then there was one. The US appetite for British energy contin ues unabated. PacifiCorp's proposed bid for Energy Group will leave only one freestanding English regional electricity company, Southern Electric. It must be feeling somewhat exposed.

Energy Group, the former Hanson combination of Eastern Energy and Peabody Coal, is an unlikely bid victim, PacifiCorp cannot gear up Energy's balance sheet to fund the bid - Hanson got there first, loading it with £1.4bn of debt. At least Peabody is less of a poison pill to Pacificorp than other utilities, since the US company has an exist ing coal business. But Energy Group is about to get hit by a UK windfall tax and PacifiCorp looks unlikely to squeeze out anything in the way of operational improve ments. Of course, Energy Group brings with it strong managemen and offers electricity trading expertise, which will be useful after US electricity deregulation - but it would have been a lot cheaper to poach a few key employees.

property of

. No or with

Nonetheless, it is also surprising that Energy Group seems so keen to accept a bid. It has only just won its freedom and its management has plenty of plans, albeit of question-able value. Moreover, the premium being suggested is not hugely generous. Mr Derek Bonham, chairman, can at least ebow some value springing from the Hanson demerger. But even if Energy is bought out at 700p, the bits of Hanson are still worth 16 per cent less than in February 1995, when it announced the first of its four demergers.

Ekran rights issue may stall dam project

By James Kynge in Singapore

Mr Ting Pek Khiing, the Malaysian businessman who is managing a national project to build the buge Bakun hydroelectric dam, has come under pressure from underwriters. They want him to take some

of the financial burden of a M\$1.47bn (\$585m) rights issue by his flagship company, Ekran, which has been undersubscribed. Financial industry execu-

tives said yesterday that several underwriters for the one-to-one rights issue of 257.14m shares in Ekran have expressed discontent at the prospect: of being left with shares which were not subscribed for. Financial analysts said last

week that the Ekran rights investors are no longer preissue was less than 50 per cent subscribed. The proceeds from the rights

issue had been intended to ahead because it has the prime belp finance Ekran's purchase minister's backing. The arguper cent equity stake m Bakun Hydroelectric Corp, the company which will oversee the building of the Bakun dam and operate it from 2003. Bakun is scheduled for an

initial public offering in July, but this may be delayed if Ekran's financing problems are not resolved, analysts said. Mr Ting, who owns 26 per cent of Ekran, is believed to Mahathir has given his assurhave taken up his rights at a cost of M\$381m.

But other investors have been distinctly lukewarm ing the dam.

Japanese electronics conglomerate NEC unveiled its "virtual fish" - a moving 3D image - at the Asia Telecom exhibition in Singapore yesterday. Buyers are offered a choice of species Proper Ballet

Chinese weigh up regional telecoms for C&W venture

By Nicholas Denton in London and John Ridding in Hong Kong

Up to 20 of China's regional telecommunications companies are being considered for inclusion in the proposed joint venture between the Chinese government and Cable and Wireless of the UK.

The carriers are subsidiaries of China's ministry of posts der the financial burden," said and telecommunications (MPT) and are understood to include Guangdong MPT, the company which covers the part of China abutting Hong company leading the dam's construction, is scheduled to

The assets selected would be transferred to China Telecom (Hong Kong), the planned joint venture in which C&W said last week it would take a stake in exchange for some of its shares in Hongkong Telecom. The intention, say people

familiar with the deal, is to create a company which could be floated in the fourth quarter of this year, valued at abont £5bn (\$8.2bn) and realising about £2bn from financial

C&W is then expected to reduce its stake in Hongkong Telecom, the territory's dominant carrier, to about 30 per cent, in exchange for a holding in the new vehicle for investment in mainland

Another possibility being mooted is the inclusion in CTHK of a carrier such as Deutsche Telekom to cement a link between C&W and one of the global telecoms alliances.

Goldman Sachs, the US investment bank, has been selected to advise on the creation of CTHK and lead the public offering, BZW of the UK and Morgan Stanley of the US are advising C&W and the respectively. On Friday, it was amnounced

that China Telecom, part of the MPT, was paying \$1.19bn for a 5.5 per cent stake in Hongkong Telecom, leaving C&W with 54.5 per cent.

The agreement is part of a shift of corporate power to planned a \$500m shopping mall China-backed companies before Beijing takes over the UK colony on July 1.

Subsequent phases of the deal remain unclear because China has not specified the assets it will inject into the joint venture.

C&W shares, having risen 15 per cent on news of the agreement, slipped back yesterday after investment banks SBC Warburg and Dresdner Kleinwort Benson recommended that investors reduce their holdings.

in Mexico City office tower

By Daniel Dombey in Mexico City

Mr Paul Reichmann, the Canadian responsible for some of the most ambitious real estate developments of the 1980s, yesterday announced that he was forging ahead with a big project in the troubled Mexico City market.

The project reflects increase ing confidence in the Mexican property market only two and a half years after the peso crisis. It also signals an effort by Mr Reichmann to regain the snccess once enjoyed by Olympia & York, his former

Reichmann International, an association between Mr Reichmann and the financier Mr George Soros, said it had entered a 50/50 joint venture with Empresas ICA, Mexico's biggest construction firm, to build a high-rise office tower in Mexico City.

Final construction and financing plans will be announced in the next ninety days. The project, first mooted in 1994 and shelved following the peso crasb, bad been planned as the country's tallest tower, with 52 storeys and a \$250m price tag. It is understood that the size of the project will be revised and could cost \$100m-\$150m.

Even so, the construction of the tower, which may begin as early as next month and take about three years, represents a vote of faith in a difficult mar-

"Building a huge office tower like this, so close to the peso crisis, is a very aggressive step," said Ms Sobani Warner, an analyst at Bear, Stearns in New York. The tower was one of three

large projects announced during 1994. Reichmann and ICA development in the western suburb of Santa Fe. and Reichmann has also been involved in a \$500m plan to revitalise the centre of Mexico City. To date there has been no building on any of the sites. However, there have been

signs that the real estate market has been recovering, despite plans by the Mexican government to sell some of the \$40bn in assets seized in lieu of bad debts. A number of property companies have been listed on the stock exchange.

The Dow Jones cashes in its options at last

15

16

Jones Industrial Average remains the world's bestknown stock market index even though in terms of design it is absurdly old-fashioned.

After all, it is 101 years since it was launched by Charles Dow. Yet last week's news that Dow Jones is finally to sell the rights to its precious average to the derivatives markets is reminder of the pressures both on the average and on Dow Jones itself, which has some very dissatisfied shareholders, not least within the controlling family. Competition between indices

is intense. The Dow Jones weekly Barron's now lists 39 US domestic market benchmarks in its "Major Indexes". table. They come from eight leading providers. In the early 1980s Dow Jones risked squandering its advantage by refusing to license its

average to the eager derivatives exchanges attracted by the retail potential. Dow Jones feared the DJIA would be tainted by speculation and scandal. As a result it effectively handed the business over to the then little-known Standard & Poor's 500 Index. The scandals never happened. How, then, bas the Dow average remained the firstquoted measure of the US mar-

ket despite being of crude con-

struction and with a very nar-

row coverage of 30 blue chips?

It falls a long way short of

comprehensivaly representing

corporate America.

est the Financial Times is a partner of Standard & Poor's in global indices, and competes against Dow Jones In various fields. Also an acknowledgement: the FT's own one-time flagship benchmark, the 30-Share index, has faded into a twilight zone, though it is still calculated. It moved up through the 3000 level last month, but hardly anybody

The FT is in the index busi-

The average benefits from the cascade of money into the US market leaders

ness through partnerships, primarily now with the London Stock Exchange. There has also, however, been a very long term link with the actuarial institutes, which have acted as design consultants, and the 30-Share Index faded from view mainly because the actuaries were so hostile to it on technical grounds.

Dow Jones, however, has managed to preserve its own average from professionals who might be contemptuous of its crude construction. The company has done so partly through the marketing strength it possesses by virtue of publishing the mass-selling Wall Street Journal. This vigorously promotes the DJIA,

First, a declaration of inter- index for retail investors (although these days it has to share a corner of the cable TV screen with the S & P and the Nasdag Index).

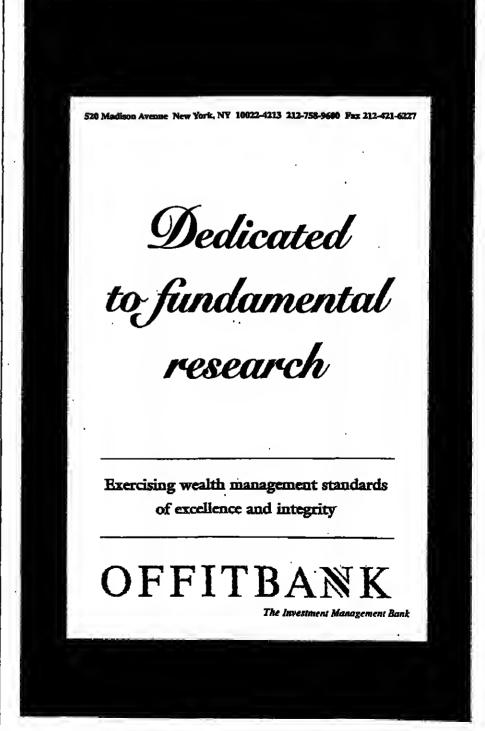

Right now, too, the 30-share Dow average is hot. For much of the 1970s and 1980s it trailed the broader indices because small capitalisation stocks outperformed. But currently the US market is being led by a handful of giants. Over 25 years the DJIA has

underperformed the S & P 500.

if only by a tiny margin of 0.1

per cent a year on average But over five years it is ahead by 1.3 per cent annually, and by 3.1 per cent over one year. In March the average was freshened up. Four new constituents were brought in, with Hewlett-Packard and Wal-Mart, for instance, replacing Bethlehem Steel and Woolworth. Even the newcomers, it has to be said, look rather long in the tooth. But for the time being the average benefits from the cascade of money into the US market leaders. Still, Dow Jones has passed up the alternative of reinventing tha DJIA as a modern 100share capitalisation-weighted index like London's Footsia or like one already calculated in the US by Standard & Poor's.

The Dow Jones Industrial Average scores heavily on sheer familiarity, and its 101year history is a unique feature. But longevity is a mixed blessing. The loss of the franchise among professional investors is now irreversible and any product, no matter how powerful the brand, must maintain competitive quality if which remains the premium it is to survive in the long run.

DKB awaits further punishment

The scandal-hit bank may suffer penalties more serious than the sacrifice of individuals

s the financial scan-dal at Dai-Ichi Kangyo Bank widened yesterday, Mr Ryntaro Hashimoto, Japan'e prime minister, delivered a carefully timed blow.

Speaking to parliament, he announced that the government was considering punishing DKB by taking away its de facto monopoly businese underwriting the Y828bn (\$7.3bn) of state lottery tickets sold each year. Such a threat may not be carried through: few other banks appear keen to take on a business which is believed to yield less than

Y15bn profits a year. Bnt it highlights the essing game now dogging Tokyo'e markets: just how large an impact will the latest acandal have on the

DKB has not yet seen the dramatic defection of clients that has taken place at Nomura Securities following revelations of its links to the same scandal earlier this year. But expectations are growing that DKB will face penalties - irrespective of yesterday's executive reshuf-

With DKB already under

Katsuyuki Sugita (centre), the new president of Dai-Ichi Kangyo Bank, and other bank officials bow deeply at a news conference after the resignation of 21 directors

a distinct blow. Mr James McGinnis, bank-

ing analyet at Dresdner Kleinwort Benson, says: "The situation for DKB is potentially much worse than Nomura. Whatever happens, Nomura will remain Japan's largest securities house lots of competition from the other banks."

What is clear is that

any loss of business could be the second largest in terms its senior management. of deposits in the country.

When the group was first accused last month of making large, unsecured loans to the same corporate extortionists at the heart of the Nomura affair, it initially maintained a stony silence a reflection of its reputation but DKB is surrounded by as one of Japan's more traditional and secretive banks.

However, as the government investigation mounted, severe pressure in Japan's events have dented the it was finally prompted into goats has been the tradi-considering suspending the over-banked financial sector, image of the bank, which is a sweeping reshuffle of tional pattern of punishment hank from underwriting.

The company appears to hope that these ritual sacrifices of key individuals will be enough to appease the government and its customers. Mr Katsuyuki Sugita, the new DKB president, yes-terday stressed that the bank would take firm action to punish individuals involved in the scandal.

But though pinning the blame on individual scape-

growing hints that this may no longer be enough. Earlier this week, tha

Keidanren, Japan's business federation, announced that it would suspend membership for both DKB and Nomura. as a punishment for the scandal.

Some public bodies, such as the Tokyo metropolitan government, have already indicated they will etop using DKB to manage new city funds and are considering dropping the bank as an underwriter.

Private companies such as NTT and East Japan Railway bave also indicated plans to cut business ties. And in May deposits at the hank fell by some 1.1 per cent - a hint of defections among retail clients.

owever, the crucial question is whether the government will also take action against the bank, as it is planning to do against Nomura. For the moment this remains unclear, not least because the government has not completed its investigation.

However, the Ministry of Finance has indicated it is

in corporate Japan, there are Some observers think that the bank may also face a penalty later this summer, or be banned from the interbank market for several months. Another possibility - potentially more damaging - is a ban on its corporate

foreign exchange business. These moves in themselves might not affect the bank's bottom line too badly. DKB notched up Y391bn of core profits in fiscal 1996, and most analysts think that even exclusion from the foreign exchange market would cost the bank no more than

a small fraction of this.

But it is the timing of the scandal, ahaad of the planned deregulation - or Big Bang - of Japan'e fman cial markets that could cause the most damage. The Blg Bang is expected to intensify competition in traditional commercial banking, an area on which DKB

is heavily dependent. Mr Sugita, the bank's new president, may face a Herculean task in the short term, not least because fending off the blows from the latest sokaiya scandal will leave the bank far less time than its competitors to carve out a strategy for Big Bang.

ASIA-PACIFIC NEWS DIGEST

First Tractor in HK\$1.35bn issue

A manufacturer of tractors is set to become the 30th Chinese state-owned enterprise to list in Hong Kong and the last before the territory reverts to Chinese sovereignty on July 1. First Tractor is planning to raise HK\$1.35bn (US\$174m) through a stock market listing on June 23. It is offering 300m H shares - the name given to the Hong Kong-listed stock of mainland enterprises - at HK\$4.50 each in a global flotation.

The issue price represents a prospective price/earnings multiple of 13.3 times on a fully diluted basis, compared with a stock market pje of about 14 times. The sale, which represents 40 per cent of the company's enlarged share capital, will consist of 255m shares placed internationally and 45m distributed through an initial public offering in Hong Kong.

Proceeds from the issue will be used to expand nanufacturing capacity, pay down debt and for general working capital. Peregrine Capital is acting as global co-ordinator, sponsor and lead manager, and underwriters have been granted an over-allotment option to issue a maximum of 45m extra shares. Alphatec bail-out planned

A group of three Thai quasi-government financial institutions say they will enter negotiations with foreign and domestic creditors of Alphatec Group, the struggling That electronics conglomerate, in an attempt to restructure the company's debt obligations. Krung That Bank, the Export Import Bank and the Industrial Finance Corporation of Thailand told the Thai cabinet yesterday the plan would include turning the debt held by creditors into equity stakes and finding new partners for the company. Mr Charn Uswacboke, Alphatec chief executive once seen as the man who was single handedly pulling Thailand into high tech manufacturing, said he was ready o relinquish management control of the group if it would

help pave the way for a bail-out of the company.

Alphatec Electronics, the flagship company of the group which accounts for nearly 1 per cent of Thailand's total exports, must refinance nearly \$80m in credits from international lenders before June 22, when a put option on the company's \$45m eurobond comes due,

Proposed restructuring of the Amplats Group and disposal of Amplats' shareholdings in unlisted diamond trading companies

1. INTRODUCTION

L. States

Further to the cautionary ennouncements published on 16 April 1997, 7 May 1997 and 21 May 1997, shareholders are advised that negotiations regarding the terms of the proposed restructuring of the Amplets Group into a single listed entity ("the restructuring") have been finalised. RPH, which is to be renamed Anglo American Platinum Corporation Limited, will become the listed entity for the restructured Amplats Group. To allow the Amplats Group to focus on its core business of mining and marketing platinum group metals. Amplats intends to dispose of its shareholdings in unlisted diamond trading companies ("DTCs") ("the disposal"). Details of the restructuring and the disposal and other ted matters are set out below.

2. RATIONALE FOR THE RESTRUCTURING

The unique competitive advantages of Amplats Group are its extensive portfolio of viable mineral resources and its financial strength. The Amplats Group Intends to utilise these advantages to move down the cost curve by adding to and enhancing the suite of cost competitive production sites, not only to improve margins, but also to take advantage of market opportunities for growth.

Accordingly, the Amplats Group needs to have unconstrained choice in developing new mining projects in order of profitability and in determining the optimum production mix from its verious production sites in eny given circumstances. Such flexibility would enable the Amplats Group to manage its asset base more effectively, so optimising its position on the industry cost curve for the long-term benefit of all its stakeholders.

PPRust shareholders would exchange their investment in the current single pit operation and the company's mineral resources for a more risk diversified and extensive portfolio of production sites and resources. In addition, shareholders would benefit from an increased exposure to the platinum price whilst continuing to enjoy the protection provided by the law cost production opportunities which PPRust brings to the Amplets Group.

The current financial and operational structure of Leplats is inadequete to ensure its ongoing viability. The restructuring would enable the Amplats Group to properly address these issues while at the same time offering shareholders value for the companies mineral resources.

Amplats shareholders would benefit through the unlocking of the inherent value of Amplats as measured by the discount of its share price relative to its net asset value.

RPH shareholders would acquire operations and resources which consolidate the Amplats Group's position as the world's largest and most robust platinum producer, which, by serving a single body of shareholders, permits maximum operational flexibility.

3. THE DISPOSAL

Amplets will dispose of its shares in the DTCs to De Beers Consolidated Mines Limited ("De Beers"), De Beers Centenary AG, Anglo American investment Trust Limited and companies associated therewith, subject to the approval of Amplats shareholders and any relevant authorities. The consideration for the disposal will be US\$194.5 million for the foreign DTCs and R309.8 million for the South African DTCs and will be settled in cash.

Assuming the disposal had become effective from 1 July 1995, the net asset value of Amplets et 30 June 1996 would have increased by 53.6% from R965.2 million (536 cents per share) to R1 482.2 million (823 cents per share) as e result of the R517 million profit on disposal of the DTCs. Assuming US\$150 million of the offshore proceeds was used to settle Amplats' US\$ long term liabilities, bearing an average rate of Interest of 6.97% per annum, and the balance of the US\$ consideration was converted to Rand and placed on deposit to earn an after tax interest rate of 10.4% per annum, which is similar to the yield on the DTCs, for the year to 30 June 1996 the total earnings of Amplats would have decreased by 8.7% from R319.5 million (177.5 cents per share) to R291.8 million (162.1 cents per share). (All references to "cents per share" in this paragraph are based on the current issued share capital of Ampiats).

4. DETAILS OF THE RESTRUCTURING

4.1. The unbundling

Subject to the approval of Amplats shareholders, the RPH shares held by Amplets are to be distributed to Amplets shareholders in terms of section 60 of the Income Tax Act (Act 113 of 1993) ("the unbundling") in the ratio of 24,096 RPH shares for every 100 Amplats shares held on the date the restructuring is implemented.

4.2. The schemes

its decline

Simultaneously with the unbundling, schemes of arrangement in terms of section 311 of the Companies Act (Act 61 of 1973), as amended, will be implemented as proposed by RPH between:

- Amplets and Amplets shareholders;
- PPRust and PPRust shareholders, other than RPH and Amplets; and Leolats and Leplats shareholders, other than RPH and Amplats
- (collectively "the schemes").

In terms of the schemes, RPH will issue to the relevant shareholders, registered as such on the record date, RPH shares in exchange for the surrender of their existing documents of title in the exchange ratios set out below:

	Number of RPH shares per 100 shares	Total number of RPH shares to be issued by RPH
Amplats	46*	39 436 809
PPRust	41	36 924 871
Leplats	6	5 175 073
Total		81 536 753

" Inclusive of the 24,096 RPH shares, the subject of the unbunding.

Excluding the RPH shares to be distributed in terms of the unbunding, as such RPH shares are already in issue and are presently held by Amplets.

The exchange ratios were established by valuing each of RPH, PPRust and Leplats ("the operating companies") on e discounted cashflow basis over the current life of mine plans using risk adjusted discount rates to establish operational valuations. The mineral rights not currently included in the life of mine plans were valued and included with the operational valuations. The expansion projects announced by RPH and PPRust on 16 April 1997 were taken into account in such valuations.

Amplats was valued on a net asset value basis using market prices for its investments in the operating companies (including the implied premiums for PPRust and Leplats), discounted cash flows for the management contracts with the operating companies and the value for the DTCs as set out in paragraph 3 above. The velue of Amplats' holding of RPH shares was included in the valuation of Amplats and hence the ratio set out above of 46 RPH shares per 100 Amplats shares held includes 24.096 RPH shares which are the subject of the unbundling.

The schemes will result in the issue of e total number of 81 536 753 RPH shares, which, based on the ruling RPH share price at the close of business on 9 June 1997, equates to a value of R6 360 million.

5. CONDITIONS PRECEDENT

The restructuring is conditional upon, inter alla, the following:

- . the approval by RPH shareholders in general meeting of the ordinary resolution relating to the restructuring and the special resolution to enable RPH to increase its authorised share capital;
- . the approval by the requisite majorities of Amplets, PPRust and Leplats shareholders at the respective scheme meetings;
- the sanctioning of the schemes by the High Court;
- the registration of the relevant special resolutions with the Registrar of Companies: and
- the necessary approvals of the Johannesburg Stock Exchange ("the JSE"), the Securities Regulation Panel ("the SRP") and any other local or International body having jurisdiction in this matter.

The disposal is not conditional upon the restructuring.

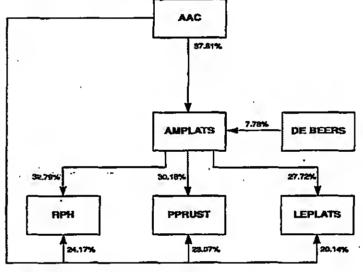

Angle American Corporation of South Africa Limited ("AAC") and De Beers are major shereholders in Amplats and are classified as releted parties for purposes of the disposal. Accordingly, whilst the votes of AAC and De Beers will be counted towards the quorum requirements at the general meeting of Amplats shareholders, at which they will vote their shares in favour of all resolutions, it will nevertheless be e requirement of the JSE for the passing of any resolutions relating to the disposal that they be passed by e majority of shareholders present or represented at the relevant meetings, excluding AAC and De Beers.

EFFECTS OF THE RESTRUCTURING

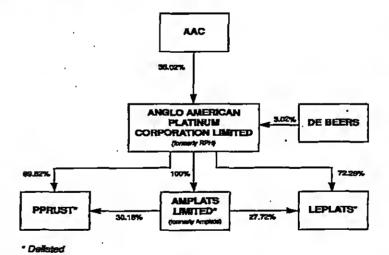

6.1. Shareholdings

Schematics showing the effects of the restructuring on the shareholding structures of the listed companies within the Amplats Group ere set

'National champion' keeps its guard up

The solution to making Finmeccanica profitable could prove politically explosive

administration has created a nies such as the energy and triumvirate for the delicate task of running Finmeccanica, the state-controlled defence and high-technology

conglomerate. The new top management team, appointed last week following the April resignation of chairman Mr Fabiano Fabiani, is likely to be temporary. For the moment it Finmeccanica. The resignawill be responsible only for tinn of Mr Fabiani which Finmeccanica's 1997 caused the shake-up was accounts. But this promises provoked by a clash of perto be a crucial period during which talks on international alliances in the defence and aerospace sectors have to be concluded and the group returned to profit through selective divestment after its

1996 loss of L540bn (\$320m). For continuity's sake, Mr Bruno Steve, the previous chief executive, has been retained as managing direc-tor. He was involved in discussions for defence joint ventures with GEC-Marconi and British Aerospace including the \$40bn Eurofighter programme; and be also helped arrange a recent L3,000bn re-financing pack-

age of short-term debt. The principal executive responsibility has been given five main divisions, of aeroto Mr Alberto Lina, whose career has spanned both the public sector (including Finmeccanica companies) and private sector linked to high technology (Honeywell and

Taking a leaf from the Carbone, an expert in comgovernance of ancient pany restructuring with Rome, the Prodi experience of group compatransport concern Ansaldo. Although he has no operational role, he is expected to act as arbiter and govern-

> ment representative. What is less clear is the kind of relationship the new management will have with Iri, the state holding group that owns the majority of sonalities more than policies with Mr Michele Tedeschi, the Iri chairman. Mr Fablani was trying to rationalise Finmeccanica while keeping it intact to he privatised as a conglomerate. He was convinced cross-group synergies existed - especially in research and development, where Finmeccanica accounts for 10 per cent of the national outlay. He further believed it was wrong to break up one of Italy's few large industrial groups, and the biggest after Fiat.

Irl on the other hand felt the group was too slow in reducing its liabilities and could be profitable only with separate strategies for its space, automation, defence, energy and transport. Apart target of L184bn, debt rose from LA.878bn to L5,113bn on turnover of L13,883bn.

This was because of write-The chairmanship has downs on defence contracts

German automation group Hartman and Braun. As a ferred to Finmeccanica's result, net assets fell to L4.448bn. Because of Brussels' constraints on state aid, from missing tha 1996 profit Iri cannot inject fresh capital that might then be seen as a transfer of public funds.

Mr Pablani had hoped to persuade the Treasury to allow the state's 38 per cent

tor company, to be transbooks, as it already had a contract from Iri to be industrial manager for the Italian end of the venture. But the option, preferring to narrow rather than enlarge Fin-

meccanica's focus. gone to Prof Sergio Maria and the higher cost of debt stake in SGS-Thomson, the also pushed for Finneccan-tiveness.

due to the purchase of the Franco-Italian semiconduc- ica to revert to its role four years ago of a financial holding company, passing operational control to its manufacturing companies.

Finmeccanica's main probtreasury has ruled out the all heavily reliant on option, preferring to narrow exports, which account for 70 per cent of earnings, yet they lack real economies of Mr Tedeschi himself has scale to sustain its competi-

In defence Finmeccanica controls directly and indirectly two thirds of the Italian industry and has been promoted as a "national champion". But its presence is too dispersed with state-ofthe art technology in niche sectors such as radar, naval armaments and helicopters. There are also areas such as automation where Elsag-Bailey is one of the world's two leading groups.

owever, a report by conenitants Mckinsey last year recommended the defence business be split away - an idea successfully resisted by Finmeccanica. Mckinsey is now preparing a new business plan; but this may have to be flexible to accommodate various alliances. whether on the defence side with GEC-Marconi or in aerospace with the Airbus consortium.

Finmeccanica's strategy is unlikely to be determined by purely managerial consider-ations. Many of its 350 comof Italian industry. If offered for sale, they would be snapped up by foreign competitors likely to restructure. Thus a break-up is politi-

cally difficult. As Mr Fabiani argued in his farewell address; "Once a lem is that its companies are country's technical and technological base is weakened, or even destroyed, it cannot easily be rebuilt - if it can be reconstructed at all."

Sandvik enters Trustor battle

in Stockholm

Sandvik, the Swedish engineering group, yesterday hrand, as well as Trustor.
pitched in to a growing conLord Moyne, a non-exec troversy over the planned takeover by Lord Moyne, the UK investor, of Trustor, a mid-sized Swedish invest-

ment company.

In a direct challenge to Lord Moyne - formerly Mr Jonathan Guinness of the UK drinks family - Sandvik said it was offering SKr827m (\$106.7m) for a 49.9 per cent voting stake held by Trustor in Kanthal, the Swedish

heating wire company. The move could derail Lord Moyne's acquisition of a controlling stake in Trustor from Mr Per-Olov Norberg, its main owner. That deal is conditional on Trustor selling its holding in Kanthal to Mr Norberg, who as Trustor chairman last year rejected a similar offer

by Sandvik. Lord Moyne's bld has incurred flerce criticism among Trustor's minority shareholders. Some suggest the Kanthal stake is being sold to Mr Norberg for less than its market value and have threatened legal action to halt the transaction.

Under his agreement with Lord Moyne, Mr Norberg is bidding SKr190 a share for the Kanthal stake. Sandvik's holding in Kanthal to 64 per offer is SKr223 per share. The controversy throws a spotlight on Lord Moyne.

who was unknown in Scan-

dinavia until three waeks

acquired a controlling interest in Amer, the Finnish sporting goods group which owns the US-based Wilson

Lord Moyne, a non-executive director of the Guinness drinks group from 1961 tn 1988, spent about SKr250m last month to purchase a 52 per cent voting stake in

He could face a rebellion from Trustor shareholders on Friday at a special meeting convened to approve the sale of Kanthal ahares to Mr Norberg.

Sweden's small shareholders' association has threatened to sue Trustor's board if it approves the sale to Mr

Skandinaviska Enskilda Banken Fonder, a mutual fund which has a 7 per cent stake in Trustor, yesterday increased the pressure on Lord Moyne, saying it would consider applying for a court injunction to halt the sale. An indication of strong

institutional backing for Sandvik emerged yesterday when the SE-Banken fund | FM757m to FM986m. said it had sold its 4 per cent stake in Kanthal to Sandvik. Two other insurance

groups, including Wasa, sales up from FM842m to which has a 3 per cent voting stake in Trustor, also said they had sold to Sandvik. This takes Sandvik's cent of the equity and 45 per cent of the votes.

Neither Trustor nor Lord Moyne's London-based representative could be reached ago. Since then he has for comment.

Financials help lift earnings at Huhtamaki

By Greg Mctvor in Stockholm

Huhtamaki, the Finlandbased confectionery and food packaging group which has restructured heavily, restructured heavily, shrugged off a sharp decrease in sales to post a 14 per cent increase in profits for the first four months. Pre-tax profits in the January-April period rose from FM108m to FM117m (\$22.8m). despite a drop in sales from FM2.5bn to FM1.9bn.

However, the advance was rooted in improved financial income, partly linked to capital gains from equity disposals. Operating earnings fell from FM156m to FM109m.

Huhtamaki said operating performance in its main Leaf confectionery and Polarcup packaging divisions was in line with expectations, Operating profits at the Leaf confectionery husiness dropped from FM47m to FM16m despite sales up from

At the Polarcup packaging unit, operating profits rose from FM65m to FM72m, on FM912m

Mr Timo Peltola, Huhtamaki chief executive, predicted "substantial" profits growth this year, with a particularly strong final third. Earnings per share were FM3.10, against FM2.73. Huhtamaki's most traded 1 shares closed up FM1.50 at

FM225 in Helsinki.

EUROPEAN NEWS DIGEST

German regulator challenges BASF

The German monopolies commission yesterday recommended against the proposed sale by BASF, the German chemicals group, of its potash mining interests to Potash Corporation of Saskatchewan (PCS). However, BASF vowed to fight the decision.

The recommendation is now due to be considered by Mr Gunter Regrodt, the economics minister. A public hearing is due to be held on June 26, with a decision by Mr Regrodt expected in mid-July.

BASF planned to sell a 51 per cent stake in a holding group which owns 51 per cent of Kali und Salz, the lossmaking potash and salt-mine operator which has a turnover of about DML.7bn (\$1hn) and employs 8,300 people in Germany. It wanted to concentrate on its core business of

chemicals, pharmaceuticals and oil and gas. BASF planned to keep 25 per cent. It said its stake would be sold below its market value of about DM500m. PCS of Canada is the world's largest producer of potash fertilisers with a turnover of \$1.4bn. The latest move follows a ruling in March by the

German Cartel Office against the proposed sale. It said the deal would inhibit competition in the German market, giving PCS a dominant market position. But BASF said at the time it would fight the office's decision and asked the government to overturn the ruling.

In a statement, the monopolies commission yesterday

said the deal would have "considerable" limiting effects on competition in the industry which did not outweigh its public advantages. But BASF said the move to join the operations of PCS and Kali und Salz would help protect the German company's competitive position in the market and help secure jobs.

Graham Bowley, Frankfurt

Advisers named for DEP float

Greece has appointed SBC Warburg, Salomon Brothers and Ionian Bank, a state-controlled Greek bank, as advisers on the flotation of a 10-15 per cent stake in Public Petroleum Corporation (DEP), the state-owned oil refining and products trading group on the Athens stock

Officials said DEP aimed to raise at least \$150m from the offering, which would include a tranche for

institutional investors abroad. The flotation is planned for November, but exact timing will depend on progress with restructuring the group and auditing its accounts to international standards, DEP will be the second utility to come to market under the Socialist government's programme for privatising up to 25 per cent of state corporations, following the telecoms operator OTE.

DEP is the holding group for Greece's two largest oil refineries. Elda in Athens and Eko in Thessaloniki. Each refining company controls a nationwide petrol station chain with market shares of 4 and 14 per cent. respectively.

However, Defa, the group's natural gas operation, will not be included in the offering. Pre-tax 1996 profits at DEP increased 74 per cent to Dr11.5bn (\$42.2m) on turniver up 29 per cent to Dr462bn.

HSBC merges Swiss banks

HSBC Holdings, the UK-based international bank, is merging the Swiss subsidiary of its Trinkhaus & Burkhardt affiliate with Cuyerzeller Bank. HSBC's Midland Bank subsidiary owns 73 per cent of the Dusseldorf-based Trinkhaus & Burkhardt and 75 per cent of the Zurich-based Guyerzeller Bank.

The latter has been established for more than a century and is one of the top three foreign-owned banks in Switzerland in terms of profitability. At the end of 1996, Guyerzeller Bank had assets of SFr551m (\$393.6m) and was roughly five times the size of Trinkhaus's

subsidiary. Cnyerzeller has 165 staff in Switzerland and Trinkhaus employs 34. Both banks provide investment advice and esset management services to high net worth individuals. The merged business will continue to be based in Zurich and operate under the Guyerzeller Bank name. Trinkhaus & Burkhardt will take a 16 per cent stake in

Wienerberger abrasives sale Wienerberger, the Austrian building materials group, has

sold its Treibacher abrasives business to Germany's August von Finck family and the local management. No price was mentioned for the sale of the marginally profitable operation which employs 930 staff in factories in Austria, Germany, Italy, Slovenia and North America and had annual sales of Sch1.5bn (\$125m).

Wienerberger shares, which have performed strongly this year, rose Sch16 to Sch2,537 yesterday. Analysts welcomed the move as a further sign that the group was disposing of non-core businesses so it could concentrate on its core strengths as the world's higgest maker of

bricks and pipes.

The sale of the abrasives unit comes only a few weeks after Wienerberger raised Sch3bn from the sale of its Business Park Vienna real estate project.

Mr Robin Horne, an analyst with Kleinwort Benson Securities in London, said thet the latest disposal could be another sign that one of Austria's most acquisitive companies was building up its war-chest prior to making another international bid. William Hall, Zurich

Setback for Swiss buy-backs

The campaign to encourage corporate share huy-backs in Switzerland has suffered a setback following the decision of tax authorities to challenge a ruling which would have made it easier for Swiss companies to buy back their

Last month, Société Générale de Surveillance (SGS), a Swiss company which has led the fight to change Swiss tax rules, won a ruling that its mechanism of issuing put options to buy back shares was not liable to the 35 per cent withholding tax. Although cumbersome, the method offered companies a chance to buy back their shares and treat all shareholders

equally. Until now, Swiss companies which wanted to re-purchase their shares have generally had to do it through a friendly institutional investor who could offset the tax liability.

However, the Swiss federal tax authorities have lodged an appeal against the earlier ruling. However, even if the

latest challenge is upheld, the procedure for share buy-backs could become more relaxed on the strength of proposed corporate tax changes now before the Swiss A recent study by Pictet & Cie, a Swiss private bank.

says Novartis, SGS, Baloise, EMS-Chemie, Jelmoli. Publicitas, and Rieter would probably undertake share buy-backs if the rules were changed.

TDK opens Hungarian plant

TDK Corporation, the Japanese electronics group, will today npen a 5,000 sq m electronics manufacturing plant in Hungary. The plant, at Retsng, 50km north of Budapest, represents a Y1.2bn (\$10.6m) investment and

TDK'e first in the east-central Europe region. The plant will employ 600 workers in an area close to the Slovak border which has so far seen little foreign investment. Production will consist of low-current transformers, choke coils and ferrite cores with planned turnover of Y1.5bn in the first year.

In a second phase of development TDK plans to build a chip capacitor unit on the site, due to begin production Kester Eddy, Budopest More

Severn Trent Plc-more water, more than a water company

Once again, Severn Trent can report on a year's progress that's produced results for shareholders, customers and employees alike.

We delivered the highest quality standards ever. We reduced leakage by one third to 16%.

We passed on the benefits of increased efficiency to our shareholders and to our customers.

We invested £412 million to maintain and improve our system, and to safeguard supplies for the future.

Our non-regulated businesses flourished too.

In the last year, they accounted for 46% of growth in group profit before interest, they are recognised leaders in their industries, and are set to deliver increasing growth for the group in the years ahead.

We'd like to take this opportunity of publicly thanking all the 10,000 people who work in the Severn Trent group for their hard work over the past year.

Thanks everyone.

FINANCIAL AND OPERATING HIGHLIGHTS

- Group profit before tax up 4.8% to £391 million (£373 million)
- New investment committed since 1995 of £220 million to eliminate water restrictions, secure supplies, and reduce leakage
- Leakage reduced by one third from 24% to 16% one year ahead of Ofwat timetable
- Further £6.50 efficiency sharing rebate for Severn Trent Water's customers confirmed
- Non-regulated companies accounted for 46% of growth in group profit before interest
- Final dividend of 22.16p net per share making 32.66p net per share for the year. Total dividends for the year, including the second interim dividend of 3.84p net per share, are 36.5p an increase of 12.8%

* excluding effect of exceptional provision of £20 million for further restructuring at Severn Trent Water and £4.5 million of exceptional costs associated with the proposed bid for South West Water

AT&T fuels merger

By Louise Kehoe

Mr Robert Allen, chairman of AT&T, said yesterday the telecommunications operator would "not turn away from opportunities to acquire" the skills and resources it needs to penetrate local markets and left open the possibility of a "strategic merger".

Mr Allen's remarks, delivered at a business group lunch in Boston, followed reports of merger talks between AT&T and SBC Communications, one of the largest US regional telephone operating companies.

AT&T has been moving

quickly to enter regional local telephone markets in the US in the wake of last year's Telecommunications Act, which removed regulations that had prevented long-distance carriers from competing in local phone markets.

To date, AT&T offers local services to consumers in four states. It intended to enter an additional 10 states by the end of this year, Mr Allen said. However, "bringing local service to all 50 states is a very large, very expensive, very time consuming proposition".

equity and high yield bond underwriting, margins have not been significantly "We are fully prepared to go it alone." Mr Alian said. Yet we are always open to ways to accelerate [the pro-But this is also what makes the bank an obvious

Referring to possible objections to such mergers by competition anthorities, he said the partnerships would only be possible if they were "pro-competino interest in selling and at tive". He complained that the biggest obstacle to competition in US local telephone markets was the "militant foot-dragging of

the regional monopolies". The combination of long-distance and local telephone companies could lead to more open competition, he said, arguing that such a these days are looking combination "should only be allowed to happen if Tracy Corrigan | people have a real choice for local services".

Its transformation began with the crash of 1987. While others laid off staff, DLJ hired aggressively. "Employment [on Wall Street] tanked by about 25 per cent and there became available some extraordinary talents," says Mr Chalsty.

When the high yield market crashed in 1990, DLJ again took a contrary approach. Following the collanss of junk bond firm Drexel Burnham Lambert while others bailed out, DLJ decided to build.

Its junk bond business has fed other areas. Since many companies which issue junk bonds are growing rapidly, DLJ has also helped them with M&As and equity offerings. It is an investment bank of choice for many leveraged buy-out funds, such as KKR, and also has its own thriving LBO fund

"We have worked our way up the scale," says Mr Chal-sty. "We used to deal with tiny companies because they were all that was available." These days, DLJ is middle-market and happy to stay that way.

The bank has done deals for the big blue-chip US com-Mr John Chalsty, DLJ's panies, but as Mr Chalsty says: "We tend to be directed man, says that when he towards a more entreprebecame chief executive offi- neurial client base." 'Big bang' in dairy industry under way

ه یکوامن المصل

By Alison Maitland

The "big bang" of dairy industry consolidation has begun and more restructuring is on the way. Northern Foods, the UK's largest dairy company, said yester-

Mr Chris Haskins, chairman, said there was still too much capacity in the industry as he reported a 2.3 per cent rise in annual pre-tax profits before exceptionals to £127.1m (\$207m), despite a £17m hit from lower dairy

The half dozen large milk processors in the UK would eventually have to be halved to three in what was likely to be a painful restructur-ing, be said. "Somsthing will emerge in the next 12

Mr Haskins said consolidation was taking place worldwide. Large mergers between farmer-owned cooperative milk processors were being struck in the US, New Zealand, Australia, France and the Netherlands.

Avonmore and Waterford, the Irish dairy groups, agreed to merge last month, and three small UK companies have gone into receiver ship in the past 18 months. "We'll talk to anybody,

but it takes two to tango." said Mr Haskins. He said the group's results represented a "tale of two businesses". Sales fell 3.3 per cent to £1.88bn as growth in prepared foods was offset by rationalisation

and lower commodity prices in the dairy division. Dairy operating profits fell 26 per cent to £44.8m, squeezed between high raw milk prices and falling prices for EU butter and skimmed milk powder which were made worse by the pound's strength against

European currencies. The group passed on a 2p per litre fall in raw milk preserve market share against aggressive competitors such as Danish-owned MD Foods.

LEX COMMENT

First round election result

To most investors, the struggle to lead Britain's Tory leadership bedraggled Conservative party must seem an irrelevance. And rightly so, almost. It is nevertheless worth bearing in mind that a credible opposition matters - because Mr Tony Blair's government could evolve very differ-

ently without one. Much of investors' relaxed attitude about an unpredictable Labour government equipped with a vast najority is explained by Mr Blair's evident desire to be re-elected. Imagine

then that the threat of defeat st the next election became obviously negligible. Mr Blair would have much less incentive to suck up to business and put the public sector through years of misery.

From this perspective, both the risks and potential rewards of a victory for Mr Kenneth Clarke are clear. On the one hand, Mr Clarke is self-evidently the most formidable opponent of the five candidates Mr Blair could face And a political debate dominated by Mr Blair and Mr Clarke could hardly avoid shifting in a belpfully pro-European direction.

But therein also lies s danger. The surprising strength of support for Mr John Redwood suggests it would be a mistake to underrate the passionate lunacy of a significant number on the Tory right. Whether such people would be willing to remain members of a party led by Mr Clarke must be rather doubtful. And little as Mr Clarke might miss them, any disintegration of the Tories' already modest parliamentary forces would leave Mr Blair rub

NICO COLCHESTER PRIZE FOR EUROPEAN WRITERS

Applications are invited for a new prize, established in memory of Nico Colchester, who died in 1996 at the age of 49, after an outstanding career at the Financial Times, The Economist, and the Economist Intelligence Unit. Nico was one of Britain's finest writers on foreign, especially European, affairs as well as business and technology, and one of his particular talents was the use of humour to cast light on seri-

The trustees of the Nico Colchester foundation will award the prize to the best, specially-written 1,000-word article that reflects that flavour of Nico's own work. Applicants should submit their article, in English, on a subject they believe to be central to the future of Europe's political, economic, scientific or business development.

Applicants should be young, should be pursuing or intending to pursue a career in journalism, and be citizens of a European Union country other than Britain.

The prize will consist of a three-month internship at The Economist, in the autumn of 1997. The foundation will provide a bursary of £4,000 to cover travel and accommodation, while The Economist will pay a small weekly stipend. The 1998 prize will be an internship at the FT.

Entries, by the closing date of June 27th, should be sent to: The Editor (Nico Colchester prize), The Economist, 25 St. James's Street, London swia 1HG.

The foundation for this prize has been established jointly by the Halifax bank, the Financial Times and The Economist. Anyone wishing to make further donations to the foundation may write to the Nico Colchester Foundation trustees, c/o the Editor, The Economist.

Soco in Mongolian discovery

Shares in Soco International, the UK oil and gas exploration company which recently came to the market, jumped 20%p to 256p yesterday after it announced s fourth oil discovery in Mongolia.

Soco said that after testing the Sotamo 19-8 well, the oil quality was about 37 degree API gravity, which was similar to that found in the 19-2 initial discovery

company's plans

included completion of the four discovery wells this summer and installation of production facilities. Mr Ed Story, president and

chief executive, said the new well marked a milestone in Mongolia's history, since lt was the country's first recorded free flowing oil

until the night of the awards presentation. It is an event not to be missed by corporate officers and their advisers.

New international bond issues

Venezuelan 10-year sees heavy demand

By Edward Luce

The Republic of Venezuela yesterday captured investors' imagination with its first dollar bond since 1993. In an otherwise unexceptional trading session, the 10-year \$315m offering was heavily oversubscribed.

An official at ING Barings - sole arranger of the deal - the enthusiasm for the deal. said it had received orders totalling \$1.2bn for the offering. About 55 per cent of the deal went to US investors, 30 per cent to Europe and the namder to Asia.

Priced to yield 265 basis points over 10-year Treasuries, strong buying saw the paper tighten to a spread of 255 basis points in the secondary market. Traders said the country'e rarity value -

interesting deals combined to provide strong demand.

When there's an excess of demand over supply, offerings such as Venezuela's will always be snapped up," said one trader. However, with a credit rating of just B+ (upgraded from B by Standard & Poor's last week) some expressed disgulet at

"It was a good deal and Venezuela is a rare nama but it is now trading well through the Argentine 10year dollar bond, which does not accurately reflect their credit differentials," said a rival syndicate official.

Others, however, disagreed with the assertion that the market was getting "toppy". The growing possibility that Venezuela will fol-Venezuela's last dollar euro- low Brazil, Mexico and oth-

INTERNATIONAL BONDS bond was redeemed in 1995 - ers to launch a Brady swap and the absence of other operation was cited as a good reason to cash in on the country's improving credit story.

"Venezuela is unusual in having both a balance of payments surplus and public sector surplus," said a syndicate official.

Another added that the US Treasury's decision to cancel its July and October 10-year Treasury issuance would withdraw abont \$24bn of expected supply from the liquidity ont there which isn't suddenly going to be withdrawn," said a banker. KIW INTERNATIONAL

FINANCE, the German stateguaranteed financial house. reckoned there was little liquidity left in the overcrowded 10-year eurodollar sector yesterday, issuing a four-year deal of \$250m.

Global format pfandbrief first

By Samer Iskandar

Bayerischa Vereinshank yesterday launched its first pfandbrief in a global format - DM2bn of five-year bonds. It was also the first global pfandbrief to be offered publicly in the US under Rule 3(a)2 of the Securities and

Exchange Commission. Pfandbrief bonds, which are backed by loans, are the largest fixed-income market in Europe - accounting for 12 per cent of all European bonds, according to Bayer-ische Vereinsbank. More are being issued in currencies

other than the D-Mark. US tranches of previous global pfandbrief bonds were always placed under the SEC's Rule 144a, which allows sales only to qualified institutions. Under Rule 3(a)2, lead managers can andary market.

offer the bonds to any investor. They are also allowed to pre-market them. whereas bankers are not allowed to talk publicly about offerings under Rule 144a. Yesterday's deal was dis-

fears

tributed as followe: 30 per cent to US investors, 23 per cent in the Far East, 26 per cent in Germany, and 21 per cent in the rest of Europe. But distribution varied among underwriters. Mertill Lynch, which led the deal

jointly with the issuer. placed 60 per cent of its allotment in the US; Bayerische Vereinsbank sold a large proportion in Germany. Although 90 per cent of US buyers were institutions that would have qualified under Rule 144a, the leads felt a

LatInvest to launch Central American fund

By Edward Luce

LatInvest, London-based subsidiary of the Spanish bank, is to launch an investment fund dedicated to Central American and Caribbean stocks. The \$20m-\$50m closed-end

fund, which will be modelled closely on successful Latin American funds, will be incorporated in the Cayman Islands and listed on the Dublin stock exchange.

Mr Federico Wynne, an investment analyst at Latinvest, said that the fund would invest in 11 stock exchanges in the region. "Central America has been completely overlooked by portfolio investors," he said. We think the region has a

investors to buy into."

7.11 7.18 7.19

However, the decision of El Salvador's parliament the yesterday to repeal legislation to privatise Antel, the telecommunicatioos operator, was a reminder that reform is not a smooth process in Central America.

The managers of the Quentzal Fund - named after a rare hird - say they will "stock-pick" rather than index their investments. With collective market capitalisation as low as \$6.7bn in 1996 the region is expected to show strong growth over the

next few years. "Until recently local investors focused on fixed-income instruments in Central America because real interest rates were so high," said Mr Wynne, "Inflation is now lot of growth potential for falling fast, so funds are moving into equities."

principles and the second second

By Wolfgang Münchau and Richard Adams

kets was short-lived, as yesterday it was knocked backwards against the US dollar, sterling and Japanese yen.

aged to make up some ground against other European cross-rates.

Sterling made the stronday in London at DM2.7915, its lowest level for 11 days. but gained more than two pfennigs to end at DM2.8141. enjoyed tremendous gains in The pound also outpaced the dollar, and its trade-record since. Many fund close at 99.7.

Overall volume on the markets was low, as doubts Jan 19 over European monetary union and a huge Japanese current account surplus left traders uncertain.

■ The French government 1994 bond market crash, and conspiracy theories about financial markets confirmed. The "speculators" - as they the foreign exchange mar- France - are beginning to franc and other European currencies, hoping to exploit

macro hedge funds, Emu could be the best game in town since the last days of gest move of the dey against the old exchange-rate mechathe D-Mark. It started the nism, parts of which blew apart in 1992, when sterling and the lira were forced out.

weighted index rose 0.7 to managers got burnt in the -Laine(-1,6370 1,6358 1,6335 1.6370 1.6358

may soon have all its worst some lost out over \$-yen more recently. But if the hedge funds get it right, The D-Mark's recovery on are affectionately known in a potential for huge profits. Emu could be another ERM,

One senior hedge fund line up against the French adviser said the world's largest macro funds were already carefully positioning uncertainty about economic themselves for a strike But the D-Mark still man- and monetary union (Emu). against the "peripheral" From the point of view of European currencies, in the event that Emu flounders within the next two weeks.

"We are not yet at a stage where we are actively going short on the lira, the peseta and the [French] franc, but we have definitely unwound Macro hedge funds our long positions [in these currencies]," he said. If France and Germany failed to agree on the final text of the stability and growth pact, to be signed at the EU summit next week, investors could pile into D-Marks. The next two weeks are likely to

> There are some caveats in this scenario. Mr Dominique overcome their angst over

finance and industry minister, only asked for a delay meeting this week, and EU leaders could still make a deal during an emergency summit in July. The German government will not agree to a renegotiation of the pact itself, but might reluctantly accept a special "jobs protocol" if that helps the French

Adjournment.

The shareholders are advised that on quoress is required for the items on the agends of the Annual General Meeting and that decisions will be taken on a simple majority of the shares present or represented at the meeting. In order to take part at the Meeting of June 20, 1997, the owners of bourer shares with larve to deposit their shares five clear days before the meeting with the registered office of the company or with Bacque Internationale à Linembourg, 69, route d'Each, L-1470 Linembourg.

THE BOARD OF DIRECTORS

Plastic puts pressure on cans

Aluminium producers are struggling to cope with changes in taste

Put 50 cents into any of the vending machines at World of Coca-Cola in Atlanta - housing "the world's largest collection of Coca-Cola memorabilia" and the drink is delivered in a plastic bottle. Only a year ago it would have been in an aluminium can.

The switch from cans to PET (polyethylene terphthalata) for soft drinks in the US has been so swift and bruising that the aluminium industry is still struggling to come to terms with it.

Cans represent one of aluminium'a main markets, accounting for 20 per cent of global demand. Cans in the US alone account for 10 per cent of worldwide sales of the metal. One customer, Coca-Cola, uses more than 600,000 tonnes of aluminium can sheet a year - enough to keep three smelters fully

Now this market is under threat, not only from PET in the soft drinks business, but also because glass bottles have come back into favour as beer containers.

In the US the development of "micro-breweries" and the belief that "premium" beer should be served in glass bottles is having a noticeable impact. Glass's share of the US beer packaging market moved up from 35.8 per cent in 1994 to 38.6 per cent last year while cans slipped to 61.4 per cent.

'Our market research shows that paople think in free-fall," he told deleglass is classy and that beer

Mr Norman Nieder, group director, packaging technology at Anheuser-Busch, the brewing group. "A can is a can. It is always the same.' He was speaking at Alumitech 97, organised by the US Aluminium Association, wbera othar executivaa

reinforced the message. Mr Robert Budway, president of the Can Manufacturers' Institute, said the main threat was posed by PET bottles in the "single serve" soft drinks market, primarily in vending. "In the US this is a market of 15bn to 18bn units and 80 per cent of all new vending business is going to PET," he warned.

Mr Jesse Myers, founding editor of Beverage Digest, went even further. "You are gates. You must do someThe aluminium industry minium had 56 to 58 per cent has also been startled by the of the new and replacement way the aluminium can's progress in Europe has suddenly stalled.

Until 1995 demand for aluminium cans in Europe was growing at 9 per cent a year, but since then it has levelled off, not only because of the growth in PET bottles but also because the steel industry, not wanting to see the beverage can market go the same way as in the US where aluminium had nearly 100 per cent of the market has fought back spiritedly.

But just how bad might it become for the aluminium is that there is a risk of a industry? Mr Nick Mason, leap across a whole range of research manager of tha aludevelopments in packaging, minium group at the CRU the risk of a jump to PET," International consultancy, said Mr Mason. said another aluminium market in the US provided

residential window market in the first half of the 1980s bnt by last year this had fallen to 18-19 per cent as vinyl windows advanced.

Another worrying aspect for the aluminium producers is that drinks companies quickly transferred the PET technology to Europe from the US. Might they do the same in emerging markets such as Latin America, on which the aluminium industry is relying for future growth in tha can business? "One lesson from Europe

However, he said the can remained an excellent concost advantage over glass bottles at the filling stage. At present aluminium was competitive with PET in "single serve" containers filled in high volumes.

He suggested a "two-tier market" might emerge, consisting of a high-throughput segment, in which system economics still dominated and cans retained many advantages, and the premium segment, "in which the package, as much as the contents, may determine the value of the product to the

brand manager". Anheuser-Busch is trying embossed cans, cans with labels using 10 colours, cans with photographs on them, cans that change colour to show whether they are cold or warm, cans with "touchoff" tops instead of ring pulls and ahaped cans.

But plastics producers are developing bottles made of polyethylene natpbthalata (PEN) - capable of holding beer - so the plastics threat to the aluminium industry could become even more serious.

Ultimately, customers will decide who wins. Drinks producers now subscribe to the philosophy once famously expounded at a sales conference by Alfred Steele, when chairman of PepsiCo.

"If the customers say they want sweat wrapped in goat akins, I will send half of you out to look for goats and get the rest of you running hard on the spot," he said.

Kenneth Gooding

Blow for Cuba as sugar crop falls short

By Pascal Fletcher

ended at the weekend, will fall short of last season's crop of 4.4m tonnes and this disappointing result is expected to lead to a shake-up of the state sugar industry, including possible mill closures, according to government officials and foreign analysis.

Although no final produc-

tion total has yet been announced, ona seulor Cuban official said last week the crop was expected to reach about 4.2m tonnes, some 6 per cent below the 1995-96 result. Some foreign businessmen working in the Cuban sugar sector said the real output figure might fall below 4m tonnes.

The harvest is a setback for the government, which was hoping to improve on 1995-96, when production, boosted by foreign financing, recovered to 4.4m tonnes after 1994-95's disas-

trous 8.3m tonne President Fidel Castro, has blamed the problems on damage caused by last October's Hurricane Lili and disruptions resulting from the US Helms-Burton law, which tightens the 35-yearold US economic embargo

against Cuha But Mr Castro also criticised "subjective factors". This was a reference to problams of organisation and inefficiency which, along with shortages of fertilisers and spare parts, have dogged Cuba's sugar industry since the collapse of the Soviet Union in 1991.

This public criticism is expected to lead to a big shake-up of the sector. Mr Castro and senior officials have sald inefficient sugar mills should close.

Cuba currently ranks as the world's fifth biggest sugar exporter, with a total of 4.2m tonnes last season.

British Columbia eases logging rules

The Canadian province of British Columbia has bowed to criticism from the forestry industry by easing environmental protection rules in its Forest Practices Code. The code was introduced two years ago in response to environmental groups' protests against logging practices in western Canada. The protests spawned consumer boycotts against several Canadian companies in Europe and the US.

The government also set up a "forest renewal fund" financed by levies on forestry companies, and curbed the transfer of tree-cutting rights. But the industry, increasingly supported by trade unions, warned that these policies would disrupt operations and discourage new investment in the province's biggest business sector.

MacMillan Bloedel, British Columbia's largest forestry group, estimated the cost of compliance at about C\$50m a year. A photograph in MB'a latest newsletter showed a pile of documents, taller than a man, needed to gain approval to log a single tree-block. The code has been phased in over the past two years and is due to take full effect on June 15. It sets requirements for a wide range of forestry practices, including road construction, soil degradation and limiting wood supplies from scenic areas. The changes are the product of talks over the past six

months between government officials, corporate chiefs and union leaders. They are designed to lighten the paperwork required for logging plans, and to speed up the approval process. The government said the changes would simplify operational planning "without compromising environmental standards"

The most far reaching change is that forestry officials will now be required to consider the economic, as well as the environmental and social, impact of logging plans. The industry welcomed the changes. "They were necessary and they are meaningful, but they're not everything we wanted." one company official said. However, environmental groups expressed Bernard Simon, Toronto

Jiangxi Copper well met

Jiangxi Copper, the Chinese copper producer, yesterday said its offering of 62.822m H-shares in Hong Kong was 32.9 times subscribed. The Hong Kong initial public offering represents 10 per cent of the global offering. The company said the price of the new issue had been fixed at HK\$2.55 per share, with dealing in the H-shares expected to begin on June 12. The shares will have a secondary listing on the London Stock Exchange, Proceeds of the offering are to be used to repay short-term debt and Reuters, Hong Kong expand production facilities.

Israel warned on nut imports

Israel's Industry and Trade Ministry yesterday said the US wants the Jewish state to stop the illegal import, via European countries, of Iranian pistachio nuts. Iran is officially classified in Israel as an enemy state and the import of products from the Islamic republic is illegal. Mr Zobar Peri, bead of foreign commerce at the Industry and Trade Ministry, said Israeli importers might be falsifying the country of origin on import documents.

Energy set to surge

By Joel Kibazo and lartin Brice

Attention is expected to focus on Energy Group folyesterday's announcement after the market close that it is in discussions with US group PacifiCorp, which may lead to a takeover of the UK group.

Shares in Energy had risen 181/2 to 580p during the course of the session and the announcement said an offer would be at a 20 per cent premium to vesterday's closing price, leading to expectations the shares will trade around the 700p mark.

UK health sciences group Amersham International was the toast of the market following confirmation it is to merge its life sciences businesses with US-Swedish group Pharmacia & Upjohn's Pharmacia Biotech.

The deal first signalled at the end of last month will create the world's largest biotechnology supply company. The new organisation will be 55 per cent owned by Amersham.

The companies said they are to fold their life sciences units into a new company. Amersham Pharmacia Blotech, which will have annual sales of around £430m.

The group also improved full year profits, just ahead of market expectations

The market welcomed the lead in global defence". deal and the figures and sent shares in the UK group sharply ahead. By the end of the session, they had gained 131% or nearly 10 per cent to £14.821/2.

One analyst said: "This is a deal that makes a lot of critical mass particularly to Amersham's business in Japan. There will be signifi- year. cant cost savings and the deal should be earnings-enhancing in the year to March 1999."

investors, and produced the biggest Footsie riser and the biggest Footsie volume.

LucasVarity showed the biggest rise in the FTSE 100 as it lifted 14% to 209p in chunky volume of 8.8m ahead of a visit by analysts to the company and firstquarter figures tomorrow.

This will be the first time that quarterly figures have. been issued by the company so comparisons will be difficult but Lehman's team expects to see £10m improvements in each quarter looking forward. The visit is to the company's Perkins

earnings per share of 35.5p . There is talk that the subject will be on the agenda when Tony Blair, the prime minister, meets Jacones Chirac, Shares in BTP were up 20 the French president, today. to 290p on the back of strong Analysts dismissed as unlikely the suggestion of an ing with analysis that extension to the concession. The share price rise came despite news that Eurotunnel was cutting its prices for the summer season.

It was a mixed day in the National Westminster, which ross sharply in the previous two sessions, ran into heavy profit-taking as recent talk about a merger with Abbey National faded into the background. The shares gave up 12 to 804p,

after trade of 9m. Abbey, still considered a suitable merger candidate for Prudential Corporation, continued to move strongly shead. The shares put on 12 to 895%p. Alliance & Leices-

ter and Halifax, both of which recently converted from building societies to banks, were also in demand. Dealers pointed to institutional buying in both stocks, which are soon expected to join the premier list of the FTSE 100. Shares in the former rose 16% to 623%p while the latter gained 13 to 762p. Prudential ended the day 13% higher at 664%p.

Legal & General was also in favour and it hardened 20% to 4720. Bank of Scotland was one

of the best performing stocks in the FTSE 100 after a positive statement at the company's annual meeting. The shares rose 20% to 404%p. Sir Bruce Patrullo, Bank of Scotland governor, said trad-

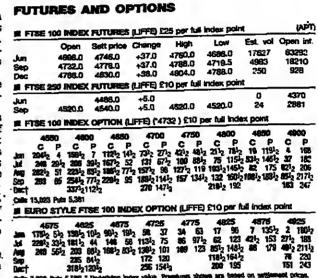

ing in the three months to

May is ahead year on year

tinuing to show growth. Strong US buying in BT brought turnover of 15m by the close. The shares gained 12 to 482%p. BT recently won approval from the European

from £480m to £495m, giving concession to run the tunnel. Commission for a \$20bn merger with U.S. telecoms group MCI Communications. It expects to receive clearance from US authorities before the end of this year. Profit-taking after the recent run left Cable & Wire-

> less trailing 121/2 to 549p. Granada Group, which is in talks about a takeover of Yorkshire Tyne-Tees at \$11.75 a share, saw its shares rise 81/4 to 8981/4p ahead of its retail banking sector, results today. Traders are waiting to hear how Granada plans to pay for the deal, and if it is to issue any shares or use cash. Yorkshire shares eased .5 to

£11.55. Elsewhere, Grampian rose. 7 to 317%p while Scottish Media firmed 7% to 706p. TRADING VOLUME Stocks Yesterday Vol. Closing Day's 000s price change

Among resource stocks, BHP gained 20 cents to. A\$18.92 and Rio Tinto 33 cents to A\$21.18. Property leader Lend Lease had a good session, rising 26 cents. gaining additional impetus to A\$26.25.

REPUBLIC OF UGANDA MINISTRY OF FINANCE PRIVATISATION UNIT IN ASSOCIATION WITH THE MINISTRY OF WORKS, TRANSPORT

AND COMMUNICATIONS INVITATION TO PREQUALIFY FOR THE INTERNATIONAL TENDER OF A LICENCE TO A SECOND NATIONAL OPERATOR (SNO)

The Government of the Republic of Uganda (the "Government") has initiated a tender process for the sale of a licence to a Second National Operator ("SNO"), to provide a broad range of telephony services, including cellular, in competition with the incumbent Uganda Posts & Telecommunications Corporation ("UPTC") or its successor company, Uganda Telecommunications Limited ("UTL"). The Government hereby invites interested parties to participate in the prequalification of

The Tender Process: The tender will be conducted in two stages. The first stage will involve prequalification of bidders based on certain technical and financial requirements, and the second will include pre-negotiation with prequalified bidders, the submission of bids and investment proposals, and the determination of the winning bidder.

- Legal requirements: A bidder may consist of: (a) A sole entity, provided that such entity is a telecommunications operator (defined as a provider as
 - wireline or wireless telecommunications services) (b) a consortium in which an operator holds at least a 30% interest; or (c) a consortium in which two operators each individually hold at least a 20% interest in the consortium.
 - Fach bidder must submit:
 - (a) incorporation certificates issued by the relevant governmental authorities of the jurisdiction in which identification of all shareholders, and beneficial shareholders, that control more than 5% of its capital;
 - statement that the bidder has not been the subject of bankruptcy or similar proceedings within the last
 - statement that, since that date of the bidder's last audited reports and financial statements, there have not been any material adverse changes thereto; and

 (a) other statements as included in the Terms of Reference for Prequalification.

Technical and Quality of Service Requirements:

The bidder, or in the case of a consortium, the telecommunications operator as provided for herein, must provide:

A general description of the network and services offered; Certification through the regulatory entity or telecommunications authority of the country of domicile of the

operator, or an internationally recognised auditor that it: (a) owns and operates a minimum of 200,000 lines in service;

has an average percentage of completed calls up to the point of interconnection of 80% for an international service and 80% for domestic service; and

(c) has an acceptable track record of cooperating with the regulatory agency of its country of domicite.

Economic and Financial Requirements: The bidder must submit the following documentation:

audited financial statements corresponding to the last two (2) years; annual reports for the last two(2) years; certification of most recent credit rating from Moody's, Standard & Poors or an equivalent rating agency, and certification from an internationally recognised auditor that it possesses the minimum annual revenues of

one hundred million United States Dollars (US\$100 million), or equivalent, for the last fiscal year,

Submission Procedures: Documentation must be submitted to the Director Privatisation Unit, Ministry of Finance, P.O. Box 10944, Kampala, Uganda, up to 5.00 p.m. on July 11, 1997, accompanied by a Submission Fee of five thousand United States Dollars (US\$5,000), payable by cartified or cashier's cheque to the name of the Enterprise Development Project. A list of prequalified bidders will be announced by July 22, 1997. Interested bidders are requested to register their interest and obtain a copy of the Terms of Reference for Prequalification and seek darffications by contacting The Coordinator, Telecoma Restructuring.

TOCOMOS FINANCIAL TIMES REVIEW OF THE TELECOMMUNICATIONS INDUSTRY

JUNE 1997

Rival telecoms groups are re-forming and jockeying for position as the deadline for full competition in Europe draws closer. Alan Cane reports on recent developments

Shake-ups and reshuffles as operators get ready for the fray

The doubts and uncer- and a consortium led by tors, will have world leadertainties are revealing themselves in unexpected changes in strategy and position as Europe's telecommunications industry approaches full liberalis-

The barriers which have nent's telecoms groups non-competition for more than a century will be demolished on January 1, 1998, less than six months from now.

Operators have been preparing for the fray for some years, forming strategic alliances, securing joint ventures and pursuing mergers. The past few months, however, have seen some dramatic realignments as the full consequences of open competition sinks in.

Germany, Europe's largest some DM60bn annually, experienced some of the biggest shake-ups as potential competitors for Deutsche Telekom, the newly privatised national operator, assessed the risks and oppor-

principal rival groupings - Mannesmann Arcor, owned by Deutsche Bahn,

Mannesmann, o.tel.o, a joint ship among Spanish-speakventure between two large industrial conglomerates, Vebs and RWE, and Viag Interkom, an alliance of the industrial group Viag with British Telecommunications.

RWE, however, had earlier in the year been expected to join the Viag consortium. Its defection to Veba, which had an alliance with Cable and Wireless, was followed a few months later by the UK company pulling out of the partnership altogether. Mr Richard Brown, C&W chief executive, said the potential rewards did not justify the commercial risks.

Equally dramatic was the decision of Telefónica, Spain's privatised national carrier, to abandon Unisource, a European alliance telecoms market, worth it shared with KPN, the Netherlands operator, PTT Switzerland and Telia of Sweden, in favour of Concert, the global alliance of BT and MCI of the US.

The move was surprising because BT and Telefónica had hitherto been competi-Today, there are three tors in Spain. The new grouping, bowever, which will involve a small exchange of equity between the German railway operator" the Spanish and UK opera-

PROFILE Guido Rossi, chairman of Stat . By By Paul Betts in Milan

Troubleshooter was parachuted in

Rossi's brief was to accelerate the telecoms privatisation process. He has wasted little time and has made remarkable progress despite complicated obstacles

Britain or Dupont in France. And Mr Guido Rossi, the chairman of Stet, Italy's group which is set to be privatised later this year, wants

has been described as the most ambitious flotation so far planned by the Italian government. It has also been the slowest and most controversial even though the process now finally seems to be entering its final stage. Last month, the Italian political parties finally approved in broadcasting bill that has now cleared the way for the authority to regulate the industry. Without this body, the government could not go ahead with the sell-off.

There are other problems. Government institutions, for example, are also arguing between themselves over responsibility for the losses called MMP which was recently put into liquidation to accelerate the telecoms privatisation programme.

spun off last year and is also about to be privatised. To also a keen football supavoid further delays, the porter (his team is Inter share swap, the new com-

ossi in Italy is like issue of MMP's losses has being called Smith in now gone to arbitration. Mr Rossi himself was para-

chuted in hy the government at the beginning of the year state controlled telecoms as chairman of Stet to speed up the telecoms privatisation process. He has wasted "lots of Rossis", to own little time and, in the cirshares in his company. cnmstances, has made The privatisation of Stet remarkable progress considcomstances, has made ering all the Byzantine obstacles he has had to face.

A law professor and graduate of Harvard Law School. Mr Rossi, 66, had already built up a reputation as a troubleshooter in Italian business circles. A former chairman of Consob, the Italian stockmarket watchdog, the Senate a controversial he was called in four years ago to put Ferruzzi-Montedison back on its feet when constitution of a new tele-coms and broadcasting agribusiness group was facing virtual collapse.

As Italian businessmen go,

Mr Rossi is pretty unconventional. For a start he is a self-made man - his father was a porter in a Milan building - and a maverick of sorts. He has long preached the virtues of a free and accumulated by an advertis- transparent market, champiing distribution company oned the introduction of rigorous corporate governance wall before they started becoming fashionable in Italy, and was for a time a MMP was controlled by senator sitting as an inde-Stet's telephone directory pendent member of the forsubsidiary Seat which was mer Communist party in the Italian Upper House. might cause additional com- Rossi and the Italian Treeplications for the Stet flotz-

Together with merging Stet with its main operating company, Telecom Italia, Mr Rossi's other priority ahead of privatisation has been to seek to strengthen the Italian group's international operations. He has made it clear he is keen for Stet to forge a strategic alliance with one of the leading international telecoms groups and talks are advanced with AT&T of the US. Already, Stet has linked up with AT&T to bid for new business in Brazil Stet is also eyeing opportu-

nities in the Spanish market and has recently joined a consortium headed by Endesa, the dominant power group in Spain, and Union Fenosa, Spain's third-largest domestic electricity company, to bid for Retevision, soon to become Spain's secand-largest telecom operator after Telefonica.

In a further deal to spread won in April the competition to acquire a 25 per cent stake in Mobilkom Austria, the cellular telephone subsidiary of the Austrian post and telecoms monopoly also

Even though Mr Rossi appears to have overcome all tha main hurdles - especially the issue of setting up an authority to regulate the Italian telecoms and broadcasting industries - that risked undermining his privatisation timetable, he could face other problems: not so much because of some new Italian political imbroglio but hecause of the strong possibility that Germany may decide to sell a second tranche of Deutsche Telekom this year in an attempt to resolve its own budgetary problems.

This could create a clash on the markets and complicate the Italian flotation and the expectations of all those Rossis ready to invest in Mr Rossi's privatised telecoms

INTERVIEW: Circle Gent, Vodefone CEO . By Joia Shillingford

Sharpening up its distribution and branding strategies

Vodafone is doing well: 1996-97 pre-tax profits are up 13.5 per cent and overseas investments are profitable as a whole for the first time

odefone, the UK mobile operator, is sharpening up its distribution strategy and branding under Mr Chris Gent, the company's chief executive since January.

"There'll be a big announcement in July, but our brands will come down to two, maybe one," says Mr Gent. Currently, the company has 12 brand names having added service providers Peoplesphone, Talkland and Astec to its other distribution outlets.

Vodafone is also considering selling its products through retailers such as Department stores and supermarket chains such as mobiles in France, says Mr

The company has hired a new manager to make its distribution more focused: Mr Peter Bamford joins the company on June 16. He was until recently a main board director at W.H. Smith and has also worked at Kingfisher and Tesco.

"Once we've narrowed the brands, we need to change the way we promote ourselves, adds Mr Gent We'll be doing more local radio and print, not just television

"Wa'll also be using cricket sponsorship to get our message across. The company will be sponsoring English cricket (Mr Gent is a blg cricket fan) for four years; men's, women's and even children's teams. Although he is new to his

current post, Mr Gent has already made a big contribution. He joined Vodafone in 1985, and was managing director at the age of 31. Previously, he was a director of UK computer company ICL, now owned by Fujitsu. As UK managing director. one of Mr Gent's jobs was to

phone ventures in which Vodafone had stakes. Mr

Julian Horn-Smith, Voda-fone Group International's

head, would sign them up, be says. Then he would hand them over to the UK team. "We'd send some managers over, help them out with advice, and try to duplicate the kind of company culture we bave here," says Mr Gent. "Then, when they stopped phoning us, and started coming up with ideas

we wished we'd thought of ourselves, we handed them back to Julian." Mr Gent will not have time for that now. Earlier this month he stepped down from the board of the Netherlands operation. On June 3, the company issued its first set of results with Mr Gent at the belm. He took over from Sir Gerry Whent, who was so popular with the City that analysts

held a dinner for him when he retired. Sir Gerry is a hard act to follow, but Mr Gent is well regarded by analysts. He comes across as relaxed and

massuming. vodafone is doing well, July 1987: with 1996-97 pre-tax profits Vodafone launches

Gent: We need to change the way we promote ourselver

up 13.5 per cent and overseas investments profitable as a whole for the first time. UK subscriber levels exceed 2m. However, the company

faces a number of challenges. UK growth in subdue to "churn" among customers migrating from analogue to digital networks. Mr Gent hopes to change this by improving distribution and by simplifying pricing.

He thinks there is scope for a leisure tariff offering low rates and some free offpeak calls. Some improvements have been made to Vodafone's pre-paid card for analogue users, designed for people with a poor credit history, or those who prefer to pay in advance. The card can be bought at post offices and from mobile phone ser-

But Mr Gent insists there is scope for growth, espe-cially in the mass market. Sweden has nearly 30 per cent penetration of mobile phones among its population; Australia has 25 per cent. He believes UK take-up will grow to 35 per cent.

Another challengs is Oftel's ambition to reduce. charges for incoming calls to mobiles. Oftel wants to get the price down to about 20 makes 18 pence a minute on these calls, with BT making

Vodafone is hoping to avoid further regulation by getting BT to charge at its to tell people we've got it. standard call rate of about 5 and we've got to keep it," pence, and reducing its own says Mr Gent. charge to 15 pence over two years (Vodafone originally tus symbol, if he has one, is wanted to phase the reduction over four years). subsidies on phone handsets in Germany, coupled with poor communication with dealers and service providers. depressed sales.

There has been a change of marketing manager and a which Bell South, the other minority investor in E-Pius, is in full agreement, says Mr Gent. Sales in Germany have already started to pick up.

Vodafone's overseas strategy is to increase its stakes in the countries in which it already has a presence rather than to bid for licences which involve competing with an established operator. Earlier this financial year, it increased its presence in Greece (Panafon) and France (SFR) and Mr Gent said at the results meeting that the company was "very likely" to increase

its stake in SFR. The company's investment in South Africa is also pay-ing dividends. Vodatone's partly-owned operation now accounts for 25 per cent of all telephone traffic in the country, says Mr Gent. And 80,000 pre-paid cards for digital telephony have been bought - mainly by people in the townships who have no credit history.

However, Vodafone does pence. Vodafone currently not rule out making investments in other countries if a good opportunity comes along. "In service quality and customer support, we've

Mr Gent says his only staa horse box. Unlike many of he has steered clear of ownhorse. But all the women in Overseas, Vodafone's his life - his wife and two

Ambitious and focused

The merger with MCI and the formation of partnerships in Europe will boost BT's muscle into the next millennium

Sir Iain Vallance, Brit-ish Telecommunica-tions chairman, sets out the argument unambigu-

ously: "Telecommnnications operators are faced with a stark choice. Either they remain in their own country and try to defend what in ths end may be indefensible. Or they get out into the global market and go for it.
And we are absolutely determined to be the world's leading telecoms operator."

BT's local and international strategy for global success is, most analysts agree, amhitious and focused. Its proposed merger with MCI of the US, which now needs only the green light from the US regulatory authorities, would create Concert plc, a telecoms titan with strengths in Europe and the US, more than 170,000 staff and revenues in excess of \$45bn.

According to the partners, the merger will result in: "a group which can provide seamless telecommunications services to multinational companies worldwide by serving all product markets including local, long-distance and international, mobile multimedia and internet services".

The European competition authorities approved the deal last month, asking only for minor concessions - the hiving-off of BT's andio and videoconferencing businesses, for example,

The US Federal Communications Commission and Department of Justice are expected to give their decisions by the end of the summer. They will be concerned to ensure that the deal companies have similar of £14.9bm last year.

Valiance: 'We are absolutely determined to be the world's

opportunities to compete in ths UK as Concert will have in the US. No serious problems are expected because the UK market is, if anything, more open than that in the US.

BT's strategy in Europe has been to form partnerships with companies such as the industrial group Viag in Germany, with the French utility Compagnie Générale des Eaux in France and with the Italian financial group Banca Nazionale del Lavoro. As a result it should be in a strong position to bid for licences to compete in these markets when they become available: "We recogniss there is a tremendous premium to be gained by being the early mover. We need to

for licences," says Mr Alfred Mockett, bead of BT's internstional division. At home, it continues to fight off competition from more than 70 rivals, including traditional telecoms companies such as AT&T of the US, cable television operators such as Telewest, new telecoms companies incinding Energis, the telecoms arm of the National Grid, and WorldCom and the new,

PROFILE Cable and Wireless Communications

Customer service and marketing come first

After guiding Cable & Wireless Communications to its £4.5bn listing in April, Mr Graham Wallace, chief executive, is set for a long haul.

He is under no illusions. "We have to improve our marketing and look after our customers better. While place as quickly as possible, we do not see a step-change in sales. It will be a slow build-up.'

His challenge is to convert the four constituent companies which make up UK's largest combined telecoms and entertainment provider into an effective force to challenge the dominance of British Telecommunications in the UK domestic telecoms market.

The merger of Mercury, the UK telecoms business of Cable and Wireless, with the cable companies Nynex CableComms, Bell Cahlemedia and Videotron. won widespread support from industry observers when it was announced last

At a stroke, it created the largest cable company in a fragmented industry, with about 40 per cent of the television subscribers. With the Mercury business, it also has more than 1m

making it the after BT, which has some 20m domestic customers. The merger was also seen as solving some of the fundamental problems of all the companies involved.

For Cable and Wireless,

While Mercury has made commissioned a trial - with significant in-roads into the the satellite group's approval - in Sunderland. larger business market, it has struggled to make an

"If we can show flexibility on programming can improve revenues, I'm confident BSkyB will see it as a positive move," says Mr Wallace. CWC's size should also

differentiate itself from BSkyB's dish operations. Mr Wallace is coy about revealing any plans, which are at an early stage, but be is keen to emphasise the company's strength in being able to target

particular regions, an option not open to satellite. Regional sports activities would be an obvious target. CWC is also keen to launch its own movie channel, and talks are continuing with

US studios. Instrumental in the group's expansion plans is the launch of digital television. This had been set for later this year, but the decision by British Interactive Broadcasting, a coalition including BT and BSkyB, to delay the launch of a rival version, has prompted a re-think at

"We could not have Sky launching before us, but now they have delayed. It gives us the flexibility to get our own start right," says Mr Wallace.

He is also adamant that tha the cable offering is superior in both price and quality to that offered by BIB. The greater capacity of cable's broadband network will enable the industry to offer about 200 channels, against the 30 planned hy BIB, which must rely on BT's lower-capacity copper

This greater capacity will give cable the scope to exploit interactive services.

"Services which need lots of data will not go down a telephone line," says Mr

Wallace. "It may be okay for booking things, but not proper interactivity."

In addition, he says there will be only an incremental increase in cost for cable being owned by the companies and the cost recovered over time. However, satellite subscribers must buy new equipment, not least the et-top receiver which is likely to cost about £200.

Taken together with the cable groups' discounted telephone service. Mr Wallace says: "We will be cheaper and offer a better service."

However, Mr Wallace's optimism is not shared by all observers. CWC shares have slipped 10 per cent since flotation at the end of April. The company attributes this to the stock overhang of the 2.5 per cent stake belonging to Jones Intercable, which it has

indicated it wants to sell. But critics point to the still stiff challenges the company faces. Not least is the tenacity of BT, which is unlikely to let the new company mount a sustained price-based campaign

Similarly, BSkyB, which has consistently shown superior marketing skills to cable, will remain a formidable competitor in the battle for digital

Mr Wallace is pragmatic. We have a unique opportunity here. But having tha best product in the world is useless unless we get our customer service and marketing right."

Christopher Price

Biting into BT's market Meanwhile, CableTel bas

The UK cable industry is investing £6m a day in developing its networks and is more than half way through a £12bn investment programme

The latest figures published by the Independent Television Comon show that telephony is continuing to eat into the market of British Telecommunications. Every month for the past year, the cable companies have, on average, installed more than 73,000 cable telephone lines and have persuaded about 60,000 customers to leave the national

In the year to April 1, the number of cable telephony lines installed rose from 1.621m to 2.498m. Most are residential although cable now has nearly 300,000 business lines installed which earn a disproportionately

high level of revenue. Uniquely in Europe, there are now more cable telephony subscribers than cable television subscribers although increasingly the two products are marketed and sold as a single entity. There is little doubt that in terms of revenues it is cable telephony that is the more important of the products on

Without the present revenues and future prospects for telephony, it is inconceive able that the UK cable industry would be investing in developing its networks at the rate of £6m a day - or be more than half way through a £12bn investment pro-

General Cable, a cable company with interests in west London, Birmingham and Yorkshire, said this month that of its £30.5m revenues in the first quarter of this year, 34 per cent had

come from business telecoms, 38 per cent from residential telephony and only 28 per cent from cable televi-

"Good progress is being made towards establishing General Telecom (General's business telecoms division) as a national telecommunications company," Sir Anthony Cleaver, chairman of General Cable said

Cable telephony has continned to make progress mainly because of its price advantage.

Some of cable companies such as Nynex Cable Comms have been able to claim that their tariffs have been able to undercut, on average, the basic BT prices by 25 per

BT has, however, been cutting its own prices and responding with a plethora of discount schemes such as offering price cuts on a customer's 10 most used numbers. BT has also got into trouble with Oftel, the regulator, over aggressive campaigns aimed at winning cable customers back.

There have been allegations of "dirty tricks" and mis-information and Oftel had to intervene following complaints that a number of ex-directory cable subscribers had been called by BT

Consolidation in the cable industry last year has also intensified the thrust behind telephony in the UK. In March 1996, CableTel, one of the large cable companies which has all the franchise to cable Northern Ireland at an expected cost of £800m, bought NTL, the broadcast and communications services business. The acquisition created a national full

service telecoms network. In October there was a four-way merger between Mercury, the UK telecoms business of Cable and Wireless, and three of the largest cable groups - Nynex, Bell Cahlemedia and Videotron - to create Cable & Wireless Communications. The new company, which accounts for about 40 per cent of the UK cable industry, should provide some of the stiffest competition BT

What Cable and Wireless. the UK'e second-largest telecoms group, was buying was access to local cable net-works. There is little doubt that C&WC's main emphasis will be on developing telecoms eervices to compete with BT as rapidly as possi-

has ever faced.

choose whether or not they want other nackages channels such as a news

package, a sports package and a movie package. Cable-Tel claims the effect has been to increase penetration rates - the proportion who subscribe compared withthose who could if they want to - to about 37 per cent.

This compares with the industry average which has been stuck for years at about 22 per cent.

Mr Barclay Knapp, chief : executive of CableTel, claims to have "cracked the code" of how to sell cable although there is already litigation with the LIVE TV channel. angry that it has been left out of the first tier of pro-

The small, relatively inex pensive, packages of televi-sion channels bundled with a telephone line should help to continue to drive cable

telephony forwards. The arrival of number por tability - whereby subscribers can retain their old number when they move to a cable telephone line - has also removed one barrier to the growth of cable tele

Although competition increases all the time it is not inconceivable that cable could double its number of lines to 5m and be a formidable competitor to BT. The next stage of cable development is already under way - the move to digital and the provision of a large array of interactive services - including fast access to the inter-

What you never thought possible."

The UK and Cable telephony in Europe

OTHER LICENSED OPERATORS . By Joia Shillingford

Niches can be profitable

For the time being, there is still some scope for smaller businesses - but for how long?

There are more than 200 other licensed telecoms operators in Britain, but who are they are and how can they compete against BT?

There are six groups of telecoms operators (telcos) offering telephony within the UK: long-distance carriers, cable operators, regional operators, cellular operators (see report, Page 4), metropolitan area network operators, and fixed radio access

The long-distance carriers include Energis, Racal and National Telecommunications Ltd (NTL), all of which also have licences to offer international services. NTL was formed from a merger of the IBA broadcasting network and cabie operator International CableTel.

Larger than these in sales. and more numerous, are the companies with access to large cable networks. The biggest of these are: Cable & Wireless Communications (CWC), formed from Mercury and three cable TV operators, Nynex Cablecomms. Bell Cablemedia and Videotron; Telewest; and Comcast.

1 1050

産業 セー・・・・・

These offer low-cost local calls via their own cable networks and national calls over other people's. The exception is Cable & Wireless Communications, which bas its own fixed-line national network.

The regional operators, such as Scottish Telecom and Kingston Communications (Hull) tend to make their money mainly from

in hig cities such as London, there are Metropolitan Area Networks, the best known of which are operated by Colt and MFS Communications. These provide a final fibre-optic connection to corporate customers in business areas. They have advanced networks capable

high-tech services such as fast data communications. Ionica, Atlantic Telecom

and Radiotel are the most important fixed radio access (FRA) operators. BT and CWC are also expected to get radio licences in September. These operators provide wireless links into long-distance networks, bypassing BT's local-loop (local phone) network. About half the other

licensed operators (OLOs) offer international telephony from the UK. The main operators used to be BT, Mercury and a group of opportunistic resellers offering services such as callback (cheap international calls usually via US networks). But the picture was mnddied somewhat when the Department of Trade and Industry (DTI) issued about 45 new international facilities-based services licences (IFBSs) in December last year.

Almost everyone wbo applied for an IFBS got one, and there are now four classes of international operator. BT and CWC; IFBS holders; International Simpla Resale (ISR) licence holdars; and callback operators.

Tha difference between an IFBS holdar and a simple resellar is that an IFBS holder can buy an indefeasible right of use (IRU) to a circuit lasting, say. 25'years. This is much cheaper than the short-term leases on circuits that can be purchased by simple resellers. So, providing a telecoms company can generate enough traffic it makes sense to become an IFBS holder.

There is a wide variety of operators in the internatlonal call market ranging from small callback services operating from a spare room to overseas telcos. Among the latter, AT&T, Telia and Worldcom are already pushing aggressively to expand

Competing against large incumbent operators such as BT and CWC is not easy. This is mainly because of the economics of telecoms. Mr James Ross, telecoms analyst at ABN Amro Hoare Govett, says: "Telecoms is of providing customers with all about economies of scale.

penetration level of 25 per

But a price-based strategy

The bigger you are, the more cost-efficient you can be." But there is still some scope for smaller operators, especially if they can iden-tify niches where BT has not

made the most of its domi-

nant market position. World Telecom is a big operator in the market for pre-paid cards, ACC Telecom bas targeted the student market and has 20,000 student customers. RSL Com Europe has been chosen by the Association of British Travel Agents as its recommended telecoms supplier

for travel agents. Another niche which OLOs such as Energis have been quick to exploit is bandwidth-on-demand. Users can say: "On Thursday afternoons, and only then, I want extra ATM (Asynchronous Transfer Mode) capacity for 25 minutes."

A number of OLOs use new technologies to do things in a different way charges, customers get a from BT. Fixed radio access operators are a case in point. Mr Ross says: "They can make money from a penetration level of 2.5 per cent of users in their coverage area, because their wireless technology is cheaper to set up than fixed phone lines.

"It is easy for an FRA to set up a thin, wide network of high-spending customers, who they can attract with lower prices. By contrast. fixed-line operators need a found it quite a struggle to cable TV companies.

EUROPEAN CABLE UPDATE . By Raymond Snoddy

ه کنامن بوجهل

Companies prepare for open market

Technological advances and a European directive have stimulated competition

The UK has been virtually alone in Europe in pioneering the development of cable telephony, a phenomenon that began as early as 1990. The other country which went for early deregulation of tele-

coms was Sweden. But now that is starting to change. All over continental Europe cable companies. with various degrees of enthusiasm and equally varying speeds, are preparing to compete on interactive services and voice tele-

Apart from the possibilities offered by rapid technological change, the compa-nies have been stimulated by the European directive fully opening up the market for volce and data telecoms from 1998

The pattern of change will be very different, however. in individual European coun-

In France, there seems to be a sharp division of opinlon among cable operators about how attractive voice telephony will be as a business opportunity.

Lyonnaise Cable, the second-largest French cable operator, is enthusiastic about cable telephony and related interactive services such as Internet connections - a business it calls "local loop multimedia." The company is already at work on local telephony trials and is looking for a partner for the full introduction of tele-

France's other leading cable operator, Compagnie Generale des Eaux, which has suggested cutting back its cable interests, is sceptical about telephony.

There are a number of barriers to the introduction of voice telephony will formally

notably the fact that France Telecom owns 70 per cent of French cable networks and leases them to private operators. It is hardly surprising that the networks were not built with telecoms in mind.

A telephone service using cable is expected to start on the Annecy cable network later this year.

The power of the estab lished telephone company will also be a huge factor in Germany whare Deutsche Telekom is by far the largest cable company - indeed the world's largest cable company - with 16.67m homes con-

nected by the end of 1996. Deutsche Telekom, which does not directly operate all the systems it owns, has been upgrading its networks to provide digital transmissions. As a result, as many as 150 digital programme channels will be broadcast over the networks which in the past transmitted about

30 analogue channels. But Deutsche Telekom can bardly be expected to compete against itself in telecoms. Some critics to argue that Deutsche Telekom's cable intarests should be separated from the main company if effective cable

telephony is ever to be established in Germany. The same issues arise in the Netherlands where KPN is both the telecoms com-

pany and a cable operator. Dutch cable operators have been holding both commercial and technical trials to test the market for Internet delivery, telephony and near-video-on-demand.

Late last year, leading cable operators, including KPN, promised that within three years 2m Dutch households will be able to have access to the internet via cable, although CAI Westland is the only cable company providing such a service at the moment.

The first licences for competing telecoms services were issued last year and

cable telephony in France, become a liberalised service at the beginning of July. A great deal of work has already been carried out to modernise the Netherlands cable network and a number of the large cable groups are expected to launch voice telephony and enhanced internet services in the sec-

ond half of this year. Even non-European Union countries such as Israel seem to be following a similar timetable. The Israeli Ministry of Communication recently approved experimental telephony on cable networks. Telecoms and telephone services will be opened up to competition

from the beginning of 1999. Full competition may take a little longer in Ireland. The Irish government received EU approval for Telecom Eireann's strategic alliance with European partners KPN of Holland and Telia of Sweden. There was also EU approval for a request by for a derogation until the year 2000 to protect residential volce telephony from open

competition. Swiss cable companies do not seem interested in competing with their national telephone company. Rediffusion, the large Swiss cable company emphasised recently it intended to stick to what it does best - provid-

ing television services. At the same time as mov ing towards the introduction of cable telephony services, tha cable companies of Europe have been co-operating on the introduction of digital cable television. A technical group brought together by the European Cable Communications Association has decided on a common standard for the introduction of digital cable. A common decoder, which should reduce both cost and unnecessary duplication, has been agreed by the big operators such as Deutsche Telekom. More than Im of the hlack decoder hoxes are expected to be ordered over the next 18 months.

"Improvising takes two things. Creativity and experience.

NICHOLAS HADDAD, Operations Manager, Mobile Communications, Ericsson Australia Pty. Ltd. (with his father).

More than a century of telecommunication expertise lends force to the ingenuity that is instrumental in the way Ericsson serves its customers. Being a major player, we see our sophisticated repertoire in telecommunications not just as technological triumphs, but as ways to add value to people's lives. What better inspiration for new solutions and services than to make things work for the individual as well as for companies and entire countries?

Ericsson's 90,000 employees are active in more than 130 countries. Their combined expertise in switching, radio and networking makes Ericsson the world leading supplier in telecommunications.

It's about communication between people. The rest is technology.

FRANCE • By David Owen in Paris

The key to credibility

The new regulatory authority is proof that the French government wants competition to take root quickly

rance is not known for being at the forefront of liberalisation in any market. But the country has scored high marks for the way it is preparing for the freeing up of European telecoms markets from 1998.

For one thing, the government has presided over the creation of an independent non-ministerial agency - the Autorité de Régulation des Télécommunications (ART) - that has shared regulatory tor with the Ministry of Teleunications since January 1 this year.

According to Mr François Fillon - telecoms minister in the centre-right administration of Mr Alain Juppé, prime minister, that was in place prior to France's recent general election - the very fact such a body has been established should be interpreted as an indication of the strength of that government's desire to ensure that effective competition takes root quickly,

"You know there are not many regulatory authorities in France," he says. "It is really something that slightly offends our administrative tradition.

"I wanted there to be a regulatory authority because I considered it was the key to the credibility of the opening of the market to competition vis e vis other countries. That was an extremely difficult fight in this country. We don't like independent authorities. We think it is up to the state to look after regulation. We think that is its role."

Although general regulatory powers - particularly for the formal granting of licences for public networks and voice telephone service providers - continue to rest with the ministry, ART has been given extensive jurisdiction over market and competition conditions. together with a first-year operating budget of just over

alisation, for example, ART is responsible inter alia for processing licance applications, allocating numbers and frequencies, intervening in disputes over competition conditions and settling disputes over interconnection and facility sharing.

It is also in the authority's remit to approve the interconnection price list and standard offering proposed by "public network operators with significant market power" - in effect, France Tslecom, the treditional state-owned monopoly opera-

The authority's indepen-dence has been underpinned by the system of appointing members to the five-member governing body, or "college", charged with establishing broad policy lines and adopting decisions and opinions on issues under ART's jurisdiction. Crucially, no member is eligible for re-appointment, nor can their six-year term of office be revoked. Three of the members are appointed by presidential decree, with the two others chosen by the respective chairmen of the French Senate and National Assembly.

vent eyebrows being raised last October when it emerged thet Mr Jean-Michel Hubert, 57, a former top official at the City of Paris who worked closely with President Jacques Chirac when he was the city's mayor between 1977 and 1995, was set to be named ART chairman.

This announcement appears as a matter of record only

interest represented by the government's ownership of France Telecom.

The authority recently considered the vital question of the standard interconnection charges to be paid to France Telecom by new market entrants for connecting their fragmented networks into its national network. The ART'e ruling illustrates the point because the charges have sparked little complaint from the estab-lished operator's future com-

Ms Patricia de Suzzoni. deputy managing director of telecoms for Lyonnaise Câble, a Lyonnaise des Eaux subsidiary recently granted a licence to offer a full range of telecoms services in the Annecy region of eastern Frence, describes the charges as "low enough to start with". She adds: "We expect them to come down in subsequent years."

Plans to enable customer to eccess a variety of long-distance operators with-out having to dial extra digits are also widely thought to be encouraging to new market entrants. The proposed system will permit a consumer's choice of long-distance operator to be determined, on a call-by-call basis, by the first digit in new 10-digit telephone numbers introduced last year. One area in which the gov-

ernment's preparations for liberalisation have gone less smoothly is its plan to sell a minority stake in France Telecom for between FFr30bn and FFr50bn in one of the country's biggest privatisations. The preparations had to be postponed in April following Mr Chirac's decision to call a snap parliamentary election.

With Mr Lionel Jospin's Socialist party opposed to the sale, the move had the effect of jeopardising the whole operation. The Socialist stance prompted a strongly-worded pre-election warning from Mr Fillon to the effect that leaving France Telecom as a solely stateowned entity would risk rapidly calling into question the French operator's international agreements with Europe

FT writers report on the progress of individual western European countries as they prepare for market

New competitors get ready for a long haul

Germany's march towards telecoms liberalisation will not be smooth or hasty - but it is inevitable

GERMANY • By Ralph Atkins in Bonn ...

To matter how strong the conservative tradition of German business and no matter how dominant the position of Deutsche Telekom - Europe's largest telecommunications group - the country's large and fast growing telecoms market cannot escapa Europe's trend towards liberalisation.

From next Jannary - scarcely a year after its partial privatisation in November 1996 – Deutsche Telekom will face challenges from a range of well-financed, determined competitors able, under Germany's 1996 telecoms ect, to compete fully in public voice telephone services. Among those backing Germany's some of the country's biggest industrial groups, including industrial and power conglomerates such as Veba and Mannesmann in Düsseldorf, RWE in Essen, and Munich-based Viag.

The transformation of the German market may take some time, however, Dentsche Telekom is fighting its corner. Mr Ron Sommer, chairman, says: "We will not make things easy for our competitors and we will fight with all our might for every single customer."

Under Mr Sommer, Deutsche Telekom has cut staff and sought to correct its repntation for poor customer service. Lucrative, highspending customers in particular have been targeted with a "VIP service". Prices have been cut.

There are also concerns among the new generation of telecoms companies that Germany's proposed regulatory system will fail to cre- large infrastructure netate a level playing field - at least in the short term.

A proposed new supervisory body has yet to come into operation and, until the end of this year, the government - which still owns 74 accusations that Germans per cent of Deutsche Telekom - will remain the industry's regulator. There are rs of a politically-biased structure, too eager to defend Deutsche Telekom's role as a national champion.

Some companies which planned grand ventures have retreated in the face of such obstacles and the past year has been dominated almost as much by talk of changes in alliances as of by Deutsche Telekom. preparations for next Janu-

less pulled out of an alliance between RWE and Veba. But even if January 1 1998 does not bring an immediate revolution, the remaining new competitors are prepared for a long haul Viag. for example, has drawn up plans with British Telecommunications for a joint venture general telephone business that will invest DM8.5bn over the next 10 years and is not expected to break even until 2001. The Veba and RWE venture - named o.tel.o - plans to invest DM7bn in a customer-orientated service that

of up to DM9bn in 2005. Meanwhile, Deutsche Bahn, the German railway operator, has teamed up with a consortium led by Mannesmann and including AT&T, Unisource and Air Touch, to create Mannesmann Arcor. The new company is building a telecoms system using lines along Deutsche Bahn railway

is forecast to have revenues

The rivals to Deutsche Telekom have a number of edvantages that point to the long-run erosion of the former state monopoly's hege-

First, they have financial strength thanks to their parent companies' cash-generating interests in the energy sector. They can also drawn on experience in running works and billing systems. And on their side is accumnlated customer dissatisfaction with Deutsche Telekom's performance during its monopoly days - even if pay considerably more for their telephone calls than in other countries are fiercely denied by the group.

tion in telecoms. The mobile telephone market has been liberalised since 1990 and there are already four competing networks, with a fifth to start in 1998. Only two of the networks are controlled Elsewhere, in another sign

Thyssen, the industrial Telecom, the UK-based sub-

1990. Opel offers an "OnStar" communications and information service to drivers via a mobile phone which is linked to a globa positioning system in the vehicle. When drivers contact a special call centre, the vehicle's position is pinpointed precisely

buy capacity from Deutsche ekom at wholesale rates and sell it on to its own customers - typically small and medium sized businesses in Germany - at a discount to standard Deutsche Telekom

Moreover, Germany's relatively late embrace of across-the-board liberalisation of land-based networks means the new rivals to Deutsche Telekom can import experienced managers and technicians to boost their chances of success and can avoid some of the mistakes made by those challenging dominant groups in other countries.

Unlike Mercury in the UK, for example, the new German companies are looking to offer a range of services to business and private clients. That will allow economies of niche opportunities.

becoming used to competi- agreements - the arrangements necessary to integrate rival networks. Ill-tempered arguments have erupted in public in the past few months over Deutsche Telekom's negotiating stance in talks over deals which are vital if the new rivals are to use Dentsche Telekom's so-called "last mile" connections into the homes and businesses of would-be cli-

The federal post and tele-

first "switchless reseller" of coms ministry has been Deutsche Telekom's voice called in to referee Rivals services. It bas the right to say Deutsche Telckom is exploiting unfairly its dominent market position. But Mr Sommer insists; "We do not plan to subsidise our competitors".

Nevertheless, the pressure towards liberalisation seems unstoppable. If regulators in Germany fail to balt any abuse by Deutsche Telekom of its dominant position - in interconnection negotiations, or otherwise - its rivals have recourse to competition authorities in Europe or elsewhere.

The impetus for liberalisation, after all, has largely come from European Union directives. ACC was helped securing its deal with Deut sche Telekom by regulators' insistence there should exist opportunities to provide basic switched voice resale.

At the same time, the investment spent on buildscale and prevent over-de- ing networks will, over a pendence on short-term number of years, reduce reliance on Deutsche Telekom As elsewhere in Europe, a to access customers. For enied by the group. significant hitch may prove example, Viag Inter-German customers are to be "interconnection" kom - the Viag/BT joint venture - is looking to exploit technology which allows the linking of fixed and mobile telephone networks.

The timescale envisaged before such investments: mature suggest Germany's march towards telecoms liberalisation will not be smoothe or hasty. But the opening up to competition of Germany's telecoms market - forecast to be worth DM100bn by the turn of the century – is inevitable.

IRELAND • By John Murray Brown in Dublin

Open market gets closer

Liberalisation represents a potent challenge for Telecom Eireann

n July 1, another brick in the edifice of Ireland's state-dominated telecoms industry will be removed when private operators will be free to offer non-voice ISDN (integrated services digital network) trunk services without having to lease lines from Telecom Eireann, the state com-

This is the latest step towards liberalising the tiny Irish market, which must be fully open to competition including voice telephony from the year 2000, in line with a timetable finalised with the European Commission in December.

For Esat Telecom, the private operator which has an estimated 15 per cent of trunk traffic, the new regime will mean it can provide customers with its own microwave, fibre-optic trunk lines, without having to rent lease lines from TE. It will also avoid the cost of connecting the signal from its own switch to TE's lease lines.

Mr Denis O'Brien, Esat founder and chief executive, estimates the change will result in a 25 per cent improvement in margins. The telecoms business is

all about economies of scale, If you put in a switch, you need the vast amounts of obligations. But with inter-telephone minutes. The barnetional tariffs coming riers to entry are enormous," he says. Liberalisation represents a

more potent challenge for cost base. TE, which sold 20 per cent of

link-up performs. The so-called strategic alliance valued TE at 1£915m. The consortium has a option to take a further 15 per cent in three years time. Morgan Stanley, the US

bankers who lead-managed the deal, said: "The structure aligns the strategic and financial interests of the Irish state, the company and KPN-Telia."

By introducing a profitsharing formula, it provides an incentive for the company to maximise the value of its option, and puts a discreet constraint on government regulation. Mr Alfie Kane, the TE

chief executive, says the alliance will "help us to do faster and better what we know we need to do". Liberalisation of the market is already attracting

other operators. British Telecommunications is in discussions with Ireland's Electricity Supply Board about a possible link-up to make use of ESB's rights of way to install a fibre optic network. rowings at May 1996 stood at On the mobile side, the government is due to invite tenders for the third phone contract by the end of the year - Eircell, TE's subsidiary, and Esat have the existing

Overseeing all the changes is a newly-appointed industry regulator - Ms Etain Doyle. As a former official of the European Commission, her knowledge of Brussels' inner workings is seen as

In January, the new TE board met for the first time, with three newcomers - two from KPN and one from Telia added to the line-up.

ment injections from his many as 15 top manag positions already identified, as the company moves to consolidete the changes.

For all thet, overall controi of TE will remain with the government. Even on fundamental issues such as a possible flotation, Mr Kane's hands are tied. "If you ask my personal opinion, it's quite likely there will be an IPO in three years' time, as part of the exercise of the option. But it's important to remember it's the decision of the shareholder, the government," he

Much is being made of the potential bone of contention over the workers' demands for an employee share ownership scheme, envisaged as part of the alliance with KPN-Telia.

In the government's Statement of Strategy document published in February. It envisages that 5 per cent of TE's shares would be "made available" to the workers. However during the current election campaign, both Labour, with its strong links with the Communications Union, and the populist Fianne Fail party, have offered more generous

Mr O'Brien suspects some in the government are using the issue as a "Trojan Horse" to delay the muchneeded labour retrenchment. He also wonders ultimately just how "strategic" TE's alliance really is.

"I think some guy in Goldman Sachs will sooner or later wake up and begin to look at the break-up value of

SPAIN • By Tom Burns in Madrid

than L40,000bn.

The problem is a combination of vested interests and political divisions over what will constitute probably the most important privatisation so far undertaken by the government

any fine words of 1996, it signed up 290,000 new subscribers.

In Italy during the TIM's domestic competipast months on the liberalisation and privatisation of started operating in Decemthe country's telecoms sector. But despite all the political endorsements for opening up the Italian telecoms market to competition, the procese has continued to drag on - to the increasing frustration of large international telecoms groups now poised to invest heavily in Europe's fourth-largest telecoms market after Germany, the UK and France. Sir Peter Bonfield, British

Telecom's chief executive, is the latest to have vented openly these frustrations in the Italian press. He said the UK group was prepared to invest heavily in Italy, but was being obstructed by the delaying tactics of the Italian authorities to deregulate the market and implement the European Union's directives to liberalise telecoms.

British Telecom is part of the Albacom consortium which includes Banca Nazlonale del Lavoro, the Mediaset media group of Mr Sil-vio Berlusconi, the former prime minister, and is expected to be joined soon by the Italian ENI oil and gas

Albacom is one of the new groups planning to eventually offer telecoms services in competition to the current domestic monopoly Telecom Italia, whose privatisation is due to take place later this year but which continues to be bogged down in political

France Telecom has also recently teamed up with the Olivetti-led Infostrada group, which also includes Bell Atlantic of the US, to offer similar services. And a third group, consisting of the State Enel electricity con-cern in partnership probably centre-left administration of cern in partnership probably with Deutsche Telekom, is now considering entering the market. The Agnelli Fiat majority in the House of family's IFI and IFIL holding the possibility of investing of Mr Fausto Bertinotti. And in this third group.

Even the liberalisation of the Italian cellular telephone , trol of so-called strategic market continues to be dogged by controversy. The country's second operator. Omnitel, controlled by the Olivetti information technology group, is complaining of delaye in levelling the playing field. Interconnection charges for mobile operetors, for example, are still among the highest in Europe and are likely to remain so even after an expected reduction of between 25 per cent and 40 per cent this

However, the opening up of the mobile market has led to spectacular growth in cellular telephone u Italia Mobile (TIM), the celiular phone company controlled by Telecom Italia, is now the biggest in Europe. Demand for cellular services continues to expand, with Italians seemingly having an unsatlable appetite for mobile telephones. In the first quarter of this year, TIM signed up 547,000 new subscribers bringing its total to 6.25m Italian cellular sub% penetration of population (and 1996) 11,2% Wide area person June 1996

Where competition really works

Liberalisation has been accompanied by the development of stiff intra-Nordic competition, as well as increasing competition from outsiders

utsiders often con-sider the Nordic countries as if they formed a single market, but in telecoms, as in many other respects, this is a mistake. The Nordics are firmly out of step when it comes to telecoms, although destined to arrive at the same point in 1998-99.

Sweden and Finland fully liberalised their telecoms regimes in 1993. Denmark executive, believes that the intended to reach this stage in 1996, but after lengthy haggling over the details of the liberalised regime, full liberalisation will take place from July 1 this year.

Norway is moving more slowly and will follow the European Union timetable (although Norway, unlike Denmark, Finland and Sweden, is not a member of the EU, it is tied into the EU market by the European Economic Area Agreement).

The four countries are also out of step when it comes to corporate structures in the national telecoms markets.

The Danish government partially privatised the national monopoly. Tele Danmark, in 1994 with a big international share issue. The state retains control of 51 per cent of the capital in Tele Danmark. A further reduction in the state's hold-ing is not yet a definite item on the government's agenda, but it has been pencilled in for consideration.

Sweden's Telia was converted from status as a state agency into a state-owned corporation in 1991, but privatisation remains a gleam in the eye of Mr Lars Berg, the chief executive. According to Telia'e executives, Ms Ines Unsmann, the present communications minister, favours privatisation, but she has not yet been able to convince the rest of her cahinet colleagues.

Norway's Telenor has also been converted into a stateowned corporation. Mr Tormod Hermansen, chief excecutive, is impatient for privatisation and the access which this will give the company to tan the markets for equity capital, but the minority Labour party govplans to heed his wishes. Norway faces a general elec tion to the Storting in September this year, which will leave this ball in the incoming government's court. Finland is an exception to the situation as it has existed in the other Nordic countries and most European countries. Finland never had a national monopoly telephone company and in some ways the market was more like

European tele market. In the 1930s, Finland had well over 600 telephone companies, most of them municipally-based, often customer co-operatives. The country still has 52 telephone compa nies, but the market is dominated by two main operators - the state-owned Telecom Finland and the Finnet Group, a consortium of regional phone companies (the biggest of which is the capital's phone company, Helsinki Telephone). These two are relatively even competitors in terms of market shares, and competition is

the US market than a typical

Telecom Finland is a subsidiary of the state's PT Finland - both post and tele-

intra-Nordic competition, as tion from outsiders - and all the Nordic companies have interests outside the Nordic region, mainly in cellular networks, although Tele Danmark bas a stake in Belgium'e Belgacom and Telia in Ireland's national phone company. Telia regards the Nordic market as an extended bome market. In Denmark this spring it obtained one of four new

subscribers per cap-ita - range from about 26 per cent in Denmark to more than 30 per cent in Sweden licences for DC1800 cellular and Finland, and the Nordic systems, which it expects to telephone operators are conhave np and running in vinced that the growth of Copenhagen this year. the mobile market will con-It has an interconnect tinue, with penetration rates agreement with Tele Danreaching 50-60 per cent mark which has enabled it within a few years. Finland stands out, again, to snatch a significant share of the market for internabecause the high penetration tional traffic, and it is mov-

ing forward with plans to provide pationwide phone services for the Danish market, internet services, and pan-Nordic services. Tele Danmark, Telenor and BT are striking back in Sweden with a jointly-owned building up services in com-

ance - which has ambitions to become a significant operator in the Swedish market. Telia also has ambitious

plans for Finland, where last year it acquired 75 per cent of the shares in Telivo. which utilises the fibre cable infra-structure system established by IVO, the Finnish power utility. At the end of last year, Telivo had 8 per cent of the market for international calls and 4 per cent of domestic traffic. Telivo also has a licence to establish a DC1800 mobile system in Finland.

Telecom Finland's executives say they see Telia and Telivo as its toughest competitors in the long term. even if today it is the Finnet Group which offers the stiff-The Finnish groups are

by the development of stiff petition with Telia which share of international traffic, also faces competition from 90 per cent for national the Global One alll- loog distance traffic, aud claims more than 50 per cent of the market for GSM cellular. Competition in local calls bas barely begun. Throughout the Nordic region, the technical side of the telephone business is advanced, although Denmark bas yet to complete digitalisation.

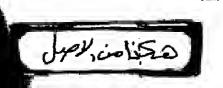

A factor in the develop ment of these markets is the absence, historically, of exclusive supply agreements with equipment manufacturers, which has kept the rival suppliers, including Sweden's Ericsson and Finland's Nokia, fine-tuned to competitive pressures,

Partly because of the role which Ericsson and Nokia have played in their respective domestic markets, it is Sweden and Finland which arc showing the way, whether it comes to corporate networks, cellular, internet, tele-medicine, and every kind of value-added service. They are a clear concompany, Telenordia, that is market quite well. It has firmation of the theory that competition works.

As the European telecoms industry moves closer to full liberalisation in 1998, the market place is changing drastically driven by new investment, strategic alliances and innovative products and services. To provide you with coverage of these core issues, FT Telecoms has published a unique series of 10 management reports plus a special master volume. Each report provides a detailed and up-to-the-minute profile on one of the following key European telecoms markets:

The Dutch state railways are part of the Telfort joint venture with

Modestly ahead of the pack

The cost of being a front runner has been a blurred regulatory environment

f the Dutch are set a European Union deadline, they often pride themselves on meeting it six months or so early. The country's market for basic not to be able to agree even fixed-line phone services will thus be opened to full competition from July 1.

modestly ahead of the pack, roument that Mrs Jorritsma being a front runner has required companies to enter the fray before Brussels clarified its requirements - and while national regulatory the absence of an overall policy was still being deter-

It was not until the second half of May, to take one of to form an industry regulathe most contentious issues, that the European Commission confirmed that it would by 2000. Or put another way, that existing national teleswitching to another pro- the NS railway operator, and

change in phone number. KPN, the Netherlands' partially privatised posts and telecoms company, says it will offer that facility for all customers from the beginning of 1999. This is still way too late, argue entrants to the sector such as Telfort, a joint venture between British Telecommunications and the Dutch state railways, and Enertel, a consortium grouping power and cable

Corporate clients holding blocks of 1,000 or more numbers will be offered portability as early as this October, says KPN, while acknowledging that "those are the most interesting customers." This means it will throw tailor-made deals their way in an effort to ensure they stay

In the phased deregulation of the Fl 15bn-a-year market, larger volume husiness users have for a while been offered a choice of carrier for their international and data traffic. KPN, owner of the infrastructure through which such calls must still in part be routed, bas developed a reputation for what the Dutcb call a hard-necked

Rivals seeking to syphon off some of that husiness allege that their newly-won customers are are being vis-ited by KPN representatives soon after they defect. The sales force, they maintain, turns up armed with details of their individual call patterns drawn from its records, and presents a tailor-made package designed to lure them back.

This is said to have included offers such as a free upgrade of the customer's switchboard. Although KPN has long since lost its monopoly on hardware, the question for competitors remains whether it is crosssubsidising - funding such deals from profits on those activities which until July remain protected. A small stack of such complaints has already landed on the Brussels desk of Mr Karel Van Miert, competition commis-

Mrs Annemarie Jorritsma, who as Dutch transport minister is in charge of the sector, has meanwhile been deliberating on the other main cause of anguish: the level of interconnection tariffs for calls routed among competing services. Telfort in particular has become increasingly vexed at its inability to reach accord with KPN on how much 96 penetration of population (and 1996) Marie Committee Cellular 6.8% Source Cif Penningh

these should he. After months of wrangling the two sides seemed this month still on a benchmark for what they were talking about.

But it is symptomatic of Although they are only the blurred regulatory enviwas due to make her ruling on the issue only weeks before the official freeing of the basic telecoms sector. In competition authority, a division within her ministry is meanwhile being hived off tor called Oota.

Until Opta's independence is established, the governrequire number portability ment remains not only regulator, and judge and jury of the first instance, but also a coms utilities facing new main shareholder in the telecompetition could until that coms sector. It owns a residdate stem the drift away of ual 45 per cent of KPN, a customers by ensuring that balf share in Telfort through vider was encumbered by a stakes in several of the energy companies which control Enertel. Those two ventures were last autumn awarded licences to build national infrastructures costing perbaps Fl 1bn apiece, while a bost of smaller enter prises have been granted rights to offer more specialised or regional services.

> Telfort and Enertel have been concerned to protect their capital investment against operators which they see as seeking merely to skim the cream - and this has put them at times on the same side as KPN in the argument over network

or the consumer, nothing much will change on July 1. Few if any of the new services will yet he able to offer a choice across the domestic market. The main difference so far is in the tone and content of the literature being sent out by KPN, which is deluging customers with formulae such as per-second billing. call redirection, and a choice of subscriptions offering cheaper rates to frequent callers and a lower monthly standing charge to those who use their phone less

This is being echoed by more aggressive competition between the Netharlands' two GSM mobils services ahead of the auction of a new licence hased on the DCS 1800 standard.

Libertel, owned by a group of investment institutions. has just launched a promotional campaign intended to convey its technical prowess now that it has filled in most black spots in its signal. Functions such as voice or text messaging are being advertised in an attempt to lure sign-ups away from the rival KPN service, behind which it already trails closely.

New providers of fixed line services start from a far weaker position. Carrier select, through which customers of one phone company may pick another to route a specific long-distance call, will require them to key in a four-digit code. The Dutch consumers' association says that real competition will not happen before number portability comes. And surveys suggest this holds true of business users too: most want a choice but fewer than a sixth would switch if it meant new letterheads and everything else that a change of phone num-

CALL CENTRES • By George Black

Combining the best of both worlds

Despite their advantages, the use of call centres is not growing as rapidly in Europe as in the US

all centres are spreading rapidly because they can now combine telecoms and computer technology to belp companies win customars and serve them better. The number of agents working in call centres worldwide will rise from 530,000 last year to 8.9m in 2002, the Ovum consultancy forecasts.

The US has more call centres than the rest of the world put together. Use of call centres is growing in Europe, but not as fast as in the US. This may be partly because the American public is more telephone-oriented, but in the UK at least the public has hecome much more willing to do business over the phone.

Britain is the most popular European location for call centres. Early deregulation of telecoms services and the consequent growth of competition helped the UK to

Whether the vendor is a personal computer maker providing a helpdesk for users, a watar company advising about drought measures or a financial services company answering account or policy queries, e call centre has become the preferred solution.

Call ceutres can cut the cost of employing staff across a number of sites as well as that of the field sales team. Customer service can be provided more cheaply if the operation is based in a less expensive area with lower wage rates. For this reason the north of England, Scotland and Ireland have

become favoured locations. First Direct, Midland'e telephone banking arm, is building one of the UK's largest call centres at Hamilton, Scotland.

Some companiee are starting to construct "virtual call centres", run by bomeworker agents. This could cut costs still further, but it will pose formidable problems of communication and quality control, to which no solution is yet proven.

offered free or low-rate calls and leads the agent through so that the cost of a a script to produce answers

nzie: 'Companies should learn from their mistakes'

put them off. International centres allow customers to call a local number and transfer them to an overseas agent speaking their own language. The Netherlands is a popular site for international centres because of the country's reputation for multi-lingual skills.

The advance of computer telephony integration (CTI) has enabled the call centre to replace the traditional service department. CTI links the phone to a computar which routes calls to the most appropriate agent, olution is yet proven. prompts the agent with cal-Customers are usually ler data ("screen popping")

Calvert: 'A lot of money spent on ty advertising is wasted questions. CTI applications

software is becoming plentiful, although users will probably need professional help to install it. Automated or "predictive"

dialling, which connects agents to customers just as they answer, is being applied to cut call lengths and save time wasted on unsuccessful calls. And in the next few years, combined voice and data networks based on Asynchronous Transfer Mode (ATM) and Gigabit Ethernet switching protocols will make call centres better able to cope with large volumes of inquiries.

The market is very fragmented and the buyer may long-distance call does not to thousands of different need to deal with several

to work closely together. Offthe shelf products are usually to be preferred, but they may need tailoring. The bigthe cost is in systems integration. But the investment can be repaid in just a few mouths, says Ovum. Surprisingly, however,

suppliers, who must be made

only a minority of UK call centres use CTI systems and fewer still deploy them effectively. "The technology is available to do it, but it's ing them into streams are hard to get right," says Mr Marcus Hickman, project manager at Henley Centre, money spent on television the research organisation, which last year published a study of the subject called Teleculture Futures.

Customers are often displeased with the way their calls are handled, he says, mainly because the centres have not planned the operation carefully. Many have uot properly applied software which tracks call patterns and plans staffing levels, or instituted work schedules which match demand fluctuations.

Companies should not expect to get the operation learn from their mistakes, are forecasting.

says Mr David Mackenzie, a director of CTI software developer Royalblue Technologies.

Call centres could produce gest part of the effort and better results when the technology matures further and becomes better managed, says Ms Natalie Calvert, managing director of consul-tancy Calcom Associates.

Also, the interactive voice response (IVR) eystems which are used to answer calls antomatically by sortadvertising is wasted because the system set up to handle calls that flow from it does not work well." Staffing is another prob-

lem; turnover at call centres is notoriously high. This is partly due to the stress of the job, forcing as many as 100 calls a day ou to agents, and calls which are either repetitive or difficult or

Overall, the problems of the business are to be blamed more on poor management than on deficient technology, but both must exactly right from the start be improved to sustain the hot should be prepared to rapid growth which analysts

VSAT SYSTEMS . By lan Channing

European market set for lift-off

European Union has created a more favourable

environment for VSAT operators

ith increasing customer acceptance and an easing of the regulatory situation working in its favour, the European market for very small aperture terminal (VSAT) satellite communications seems set to enjoy solid growth into the next cen-

The western European VSAT market has grown by 35-38 per cent annually over the past three years and there are now approximately 55,000 VSAT terminals installed or ou order. Although still lagging substantially behind North America, where 60 per cent of the world's 250,000 VSAT terminals are installed, western Europe is oow firmly established lu the number two spot.

VSATs use satellites in geostationery orbits to provida high quality voice and data communications between widely dispersed sites. The satellite disbes used for VSAT communications are small - between one and two metres in diameter - and can be installed in less than a day.

There are a number of different types of VSAT net- ing VSAT operators. work, with the most popular being the interactive two-way configuration, in which multiple sites communicate through a shared hub. Other options include mesh configurations where all the sites can communicate with oue another, and single point-to-point links.

VSAT communications are particularly popular with multinational organisations which need to establish private networks. The alternative to VSAT is using terrestrial fibre or copper links which introduce additional difficulties.

"In Europe, for example, you have to deal with different operators in every country if you are putting in a pan-European uetwork." says Mr Simon Bull, senior analyst with Communications Systems, based in St Albans, England, and author of the 1997 VSAT Industry Status Report, "And that means you cannot coutrol the quality and response times across the bordera. With VSAT you can, because

it is end-to-end." The initial demand in westeru Europeau for VSATs came from the multinational vehicle industry. Mr Thomas Bahnsen, mar keting director of VSAT operator Teleuor Satellite Services, says: "VSAT technology can be used for crossborder data and Lan-to-Lan [local area network] communications and for the transmission of video to updata the car dealerships on new models and developments in technology.

"This can be done much more cheaply by VSAT than by terrestrial networks. The automobile companies had been exposed to the VSAT technology in the US, where it was introduced more than 10 years ago. and have brought the technology with them into the European mar-

Pressure from the an excellent communications solution for any organisation with a significant number of geographically widespread outlets and its use is now spreading in the retail sector, through companies such as Safeway and J. Sainsbury, and to banks. insurance companies and financial institutions.

The take-up of VSATs in Europe was, according to most industry observers, inhibited by regulatory burriers and concerns about the reliability of satellite techuology. But pressure from the European Union has created a more favourable environmeot for VSAT operators and further liberalisation should cusure a continued easing of regulatory restrictions, stimulating growth in the VSAT market.

Mr Richard Aspinall, head of global satellite services at British Telecommunications, sees deregulation creating market opportunities in Europe. "We are going to see fast moving deregulation and customers will be looking more and more at different types of technology. Traditionally in Europe, the PTTs have oot sold VSAT services to their customers which gives operators like us the opportunity to sell them alternative technologies and services."

Educating the market to the benefits of satellite communications has proved to be the other big problem fac-

Mr David Nicholson, general manager of Kingston Satellite Services, says: "There has been a period of education but now the large corporates are waking up to the fact that VSAT can oot only be very competitive, but can also provide a very reliable. high quality service.

here has also been rising demand for VSAT technology in central and eastern Europe, but with different market drivers. VSAT links, largely point-to-point rather than shared hub uetworks, are being used in eastern Europe to provide the connectivity that cannot be obtained from the existing antiquated terrestrial infrastructure.

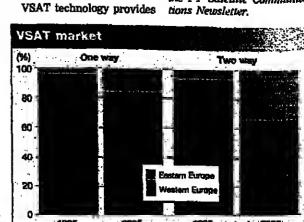

Many eastern European organisatious now have western partners who are familiar with VSAT technology and who see it as a method of rapidly providing the good communications they used in order to service their local customers.

Government departments, particularly in the central European countries with close links to the European Union, are turning to VSAT technology. And demand for access to the internet and to western dialtone are also driving VSAT growth.

A study by UK-based market analysts CIT Research. Satellite Communications in Europe 1996, projected subetantial VSAT growth In eastern Europe, with the installed base rising from 1,345 in 1996 to more than 15,000 in 2005.

In the overall Europeao telecoms mix, VSAT seems certain to remain a niche solution. VSAT operators, however, are unlikely to be concerned when the niche equates to a 3-4 per cent share of a telecoms market worth \$650bn.

so far, most of about 40 increasingly likely to be achieved. However, volce quality on the internet is at present very poor because it is affected by delays in transmission - and that is why internet telephony

software systems can now be downloaded from the internet free of charge, some are being incorporated into browser software and hundled with the latest multimedia PCs. None have so far received much praise for quality from reviewers. But this could change rapidly.

The development of software standards by the Interuet Engineering Task Force (IETF), the International Telecommunications Union (ITU) and the European Telecommunications Standards Institute (ETSI) could help to overcome the technical prob-The IETF is working on

protocols which could provide guaranteed bandwidth on the internet for phoue calls, thus boosting its voice phones quality. The most important of these is RSVP, the reservation protocol, which guarantees the arrival time of information. Routers on the internet are now equipped with RSVP but desktop machines are not. They need to have it in order to be able to tell routers to give priority to voice messa

"RSVP is the uext step towards guaranteeing the talued within intranets. quality of service oo the internet," says Mr Benjamin can be cootrolled, but not Ellis, product marketing within the public Internet, manager for the router man- he says.

ufacturer Cisco Systems The key standard for achieving interoperability of internet phone systems is the ITU's H.323, on which some are already based. But

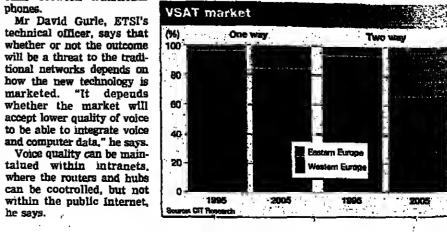

Internet phone systems developed in the past three years have followed a proprietary design, which makes it impossible for PC users to talk to each other unless they have the same software. The developers have to be persuaded, by market forces if nothing else, to bring them in line with standards. And to make this happen, the standards bodies have to make the standards clearer and easier to implement.

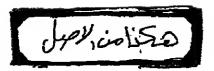

At present it is not easy

for the developers to follow

the standards even if they want to. But H.323 is approaching maturity and by the end of this year the developers may rally round it. ETSI has recently launched a project with nine leading companies to develop several internet telephony standards. It aims first to tackle standards for making calls to traditional phones from computers, then for calls from phones to computers and lastly for calls between traditional

Mr David Gurle, ETSI's technical officer, says that whether or not the outcome will be a threat to the traditional networks depends on how the new technology is marketed. "It depends whether the market will accept lower quality of voice to be able to integrate voice and computer data," he says. Voice quality can be main-

MARKETS REPORT . By Christopher Price

Investors take their pick

Widely varying performances may reflect such issues as competition, earnings potential and coalitions

s the investor love affair with telecoms issues fading? The past year has seen the share prices of Europe's newly privatised telecoms groups vary widely as investors have become increasingly selective.

At the same time, more new issues of telecoms stock is saturating the market as European governments continue to look to the sector to

We think expectations and many valuations on national telecoms operators are far too high and because of this overall underperformance will continue," says Mr Andrew Harrington, telecoms analyst at Salomon Brothers in London.

year vary between a near-50 per cent rise in shares of Portugal Telecom against the Lisbon market, to a 32 per cent decline against the Amsterdam bourse by KPN. The other six quoted operators fall in between.

While this in part reflects the proportion of shares floated and the performance of local stock markets, analysts believe it also shows up more fundamental issnes such as competition, earnings potential and coalitions.

The rise in Portugal Telecom's shares has accelerated in recent months as results ahead of expectations have been compounded by the formal link-up with Concert, the alliance forged by British Telecommunications and MCI of the US.

The Portnguese group, which has e free float of 49 per cent, reported e 51 per cent increase in net profits in 1996 at Es54.9bn. The results came ahead of a third global offering of the group which is now expected in

partly a result of a lowerper cent of total earnings, compared with 53 per cent in

Also joining Concert is Telefónica, the Spanish tele-coms operator which was fully privatised in February. News of the link-up boosted the shares, as did strong first-quarter results reported recently. These showed net attributable profits rising 16 per cent to Pta27.8bn. Consolidated revenues were Pta552.2bn, 21 per cent above those of the first three

months of 1996. The group's profitability was fuelled by its international division, where revenues from the cluster of Latin American operators controlled by Telefonica increased 47 per cent to

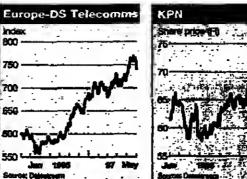

Pta108.4bn. Shares in Telecom Italia have also performed well, rising 43 per cent in absolute terms in the past 12 months and by 24 per cent relative to

Performances in the past September. The higher-than the Milan exchange indices. ear vary between a near-50 forecast profit growth was The rise has been helped by news of the merger of Telethan-expected tax rate of 47.4 com Italia with Stet, the state-controlled holding company, ahead of further priva-

Telecom Italia'a recent results showed profits surging 54 per cent to 12,119bn. Sales rose 4 per cent to L29,376bn. The strong profits advance reflected cost cutting, increased revenues from new services and lower debt service costs.

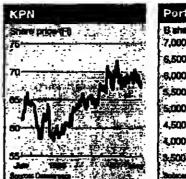

Worst performer over the past year has been KPN, the Netherlands telecoms group. While its shares are 7 per cent higher year-on-year, they have underperformed sharply against the rest of the Dutch market Part of the shares' lackius-

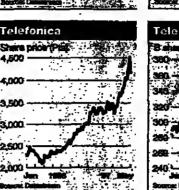

tre showing can be put down to the group's audacious A\$2bn bid for TNT, the Australian transportation group, last October. KPN is funding the offer bid from working capital and a F12.25bn revolving credit facility. There has also been the

opening up of the Nether-Fl 21.83bn. Competition in Netherlands telephony made lands telecoms market to competition. The Netheritself felt through a drop in KPN's market share for lands group reported a 9 per international calls. Its revecent rise to Fl 2.46bn last year, mostly due to expansion abroad. Revenues by F1170m, 7 per cent, as increased 11 per cent to price-cutting set in.

Shares in Tele Danmark, which have risen by 15 per cent in the past year, have declined by a quarter relative to the Copenhagen stock market. Just under half the shares are floating

Pre-tax profits last year

declined 7 per cent to DKr5.06bn, despite turnover ahead 23 per cent to DKr23.30bn. Earlier this year, the group announced plans to shed 2,000 jobs, about 12 per cent of its workforce, over the next 18 months. It blamed the increasingly competitive domestic telecoms market. It is already meeting fierce competition in cellular telephony from Sonofan, its domestic rival And Sonofon and Telia, the Swedish group, have both declared their intention to become

full-service competitors. The stark differences between European telecoms operators was highlighted in a research note from Morgan Stanley earlier this year. The investment bank warned that the flood of telecoms privatisations risked saturating investors.

Telecom equity issues
- boosted by the \$13bn privatisation of Deutsche Telekom, the German national carrier - were worth \$24.8bn in 1996, compared with just \$3.6bn worth of shares sold in 1992. "There is a clear trend: investors are consolidating boldings and starting to pick the winners," the

Company in the news: Hongkong Telecom, . By Louise Lucas Under the spotlight and under fire on several

Long-running speculation over Hongkong Telecom's future has intensified

s the territory's last significant British-Lacontrolled monopoly, Hongkong Telecom is firmly in the spotlight. And, as the last weeks of British rule tick by, Hongkong Telecom's share price has been chased up by investors betting on China interests eroding Cable & Wireless' 58 per cent controlling share.

The big money is on the Chinese Ministry of Posts and Telecoms (MPT) as buyer. Hongkong Telecom itself, which has shied from the subject of a possible sale, flagged as much last mouth

in the Hong Kong carrier. Speaking at the annual results, Mr Linus Cheung, chief executive of Hongkong Telecom, acknowledged discussions with both the China operators, and added:

"Hongkong Telecom bas maintained a much closer relationship with the MPT than with China Unicom." But if livestors are betting on MPT as a buyer, they are much less clear on what the sale terms would be, and even on what such a deal stands to bring in the shape

Hongkong Telecom. The hope (and what has inflated the share price) is that it would offer an entree into China's telecoms sector. from which foreign equity participation is now barred. Thus Hongkong Telecom is metamorphosed from a utilat the face of a hugely undeveloped market

But not all analysts expect MPT to pander to this scenario. As a commercial entity it is unlikely to divert profitable contracts into Hongkong Telecom which it could keep for itself. And even a sizeable stake would' not necessarily prevent it from setting up ehop in Hong Kong to tap the lucrative China-Hong Kong traffic which makes up almost half of Hongkong Telecom's international business.

of concrete benefits for Mr Dylan Tinker, telecoms analyst with Jardine Fleming, reckons the carrier's current China project - the Kong-Beijing fibre optic backbone - could typify the sort of contracts offered even after an MPT deal.

com - low return, no equity ownership, capex intensive and technically challenging." he says.

As for the putative deal structure, most analysts anticipate an asset swap. This in part reflects the high cost of buying a significant stake in the \$23bn Hongkong Telecom. An asset swap would contravene the 'no foreign ownership' rule.

owever, Mr Tinker argues that there are signs this law could be relaxed early next year and that by limiting the swap to cellular assets, MPT relinquishes control on an construction of a Hong activity which is neither overly sensitive nor lucrative, but rather requires heavy capital expenditure.

This suggests a deal may "This is indicative of the not be coming quite so soon ity in an increasingly com- type of deal the MPT will as investors are hoping, but

strengthens Cable & Wireless' hand if the share price continues to rise amid specuation. Besides, the question of Hongkong Telecom's future has been a long-running one. In April last year, speculation intensified when Hong Kong's aviation industry was restructured to give China interests a bigger slice. This was followed in January by a similar deal over China Light and Power,

tricity supplier. Meanwhile, Citic Pacific, the Hong Kong-listed arm of Beijing's main investment agency and the vehicle through which China holds its aviation and power interests in the territory, was gradually paring back its holding in Hongkong Telecom. In January last year it reduced its stake from 12 per cent to 10 per cent. This was

the territory's biggest elec-

petitor, expressed an interest petitive marketplace to one farm out to Hongkong Tele- the waiting period certainly further trimmed to 8 per cent five months later. The company completed its exit from Hongkong Tele-

com last month, selling its remaining 8 per cent stake to China Everbright Holdings, an investment company directly controlled by Beiting's state council, for HK\$11.39bn Analysts immediately

branded the deal as the first phase of a more sweeping restructuring. "It's the beginning of the story, not the end," said Mr Jason Billings, head of telecoms research at SBC Warburg in Hong Kong.

China's interest in Hongkong Telecom goes beyond the dilution of British interests. While deregulation is making its mark in Hong Kong as in other parts of the world, the carrier still enjoys a lucrative slice of the territory's telecoms business.

Hongkong Telecom's biggest moneyspinner is its international direct dial franchise (IDD), which last financial year contributed 52 cent of total revenues.

ut the company is Seeking to reduce this reliance as it loses market share to its three competitors, who are estimated to have taken an aggregate 20 per cent slice of the market since launching services last year. In addition, the Hong

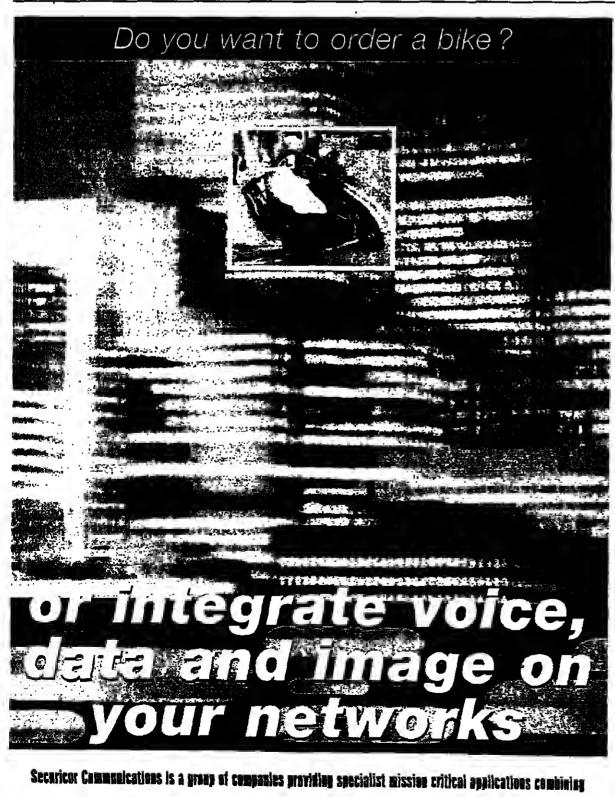

Kong regulators - as part of World Trade Organisation commitments - are seeking an early end to Hongkong Telecom's IDD monopoly which runs through until 2006. These two events have forced the carrier to turn lts attentions to other areas of growth.

Hongkong Telecom has committed HK\$10bn over 10 investors think.

years to its interactive media services (IMS), a bundling of internet, video-ondemand (Vod) and bome shopping. Customers will have their first taste of interactive TV this summer when the service is unrolled to 2,500 housebolds. The full launch is due in October - which means Hong Kong will have the first commercial fully-fledged interactive TV services, ahead of the US and Singapore (due to come on line next year). Analysts, bowever, are less convinced by the com-

mercial merits of IMS. For a company facing assaults on so many fronts. Hongkong Telecom could well see the MPT as its white knight. But without admission to lucrative China projects, the change in ownership may mean less to Hongkong Telecom than

Marr 42 .

404 to 17 ...

NEWS IN BRIEF Libertel joins **EDS** for mobile package

Libertel, a mobile telecommunications company based in the Netherlands and EDS, the giant US computing services group, have joined hands to create a joint venture telecoms company. Socratel.

The aim of the venture is to provide a mobile communications package including management systems and financial solutions tailored to customers' individual needs. Socratel will provida a mobile telecoms service through Libertel'a GSM network, while information management

will be provided by EDS. Other partners in the venture include the financial partners Residentie of Achmes Parcom of the ING Group

and NeSBIC of Fortis. Mr John de Wit, general director of Libertel, said the business telecoms market had changed from a small number of intesive users to large numbers of customers with very different requirements:

The enormous growth in the use of mobile communications has given rise to an increased need for customers to have a better insight into user patterns and related costs. We believe Socratel can respond to these demands," he said.

Cryptic guidance

The Organisation for **Economic Co-operation** and Development (OECD) has approved guidelines for the use of cryptography in electronic commerce, principally the internet, according to the Intellectual Property **Bulletin from Withers** Solicitors. This comes on top of the ruling in laws limiting the export of encryption software to ensure the security of internet messages are unconstitutional as they violate free speech.

Cable billing

Lyonnaise Cable, the French cable TV aubsidiary of Lyonnaise des Eaux, has ordered a customer management system from Anglo-French computer services company Sema Group. The system will be used for billing and customer support. It will be based around Intelcable software from US-based CableData.

Conference calls

Advanced Systems Architectures of Altoo, Hampshire, produce a range of conference products priced from about £10,000 for a 30-channel conference

Mr Chris Williams, managing director, says that a company using such an audioconferencing system for a 10party conference for just 40 bours in a year would break even within the year with the typical costs incurred when using an external teleconferencing bureau.

ه یکنامن المعیل

the cost of faxing

The quality of fax is the same using the internet or telephone lines, but there are big savings to be made

ompanies which do a lot of international iaxing can cut their phone bill by about 40 per cent by sending faxes over the internet, says Mr Bob Pearson Professional report

on internet faxing. This is possible because faxes sent over the internet bypass the expensive part of the phone journey. The public phone network is used only for domestic hops. The saving varies with the distance but "as a typical example," says the report. "it is about 95 per cent cheaper to send a fax from Germany to South Africa via this new medium. And intra-office faxing is free if the company already has 24-bour connections to the

What's the catch? Phone calls can be made over the internet, but there is a perceptible delay between speaking and hearing. Faxing is different. Mr Emmerson says: "The quality of fax over the public phone network and the net

is the same." A standard fax is a binary file sent as a stream of data packets over the public switched phone network (PSTN). All that is required for the same fax to be transmitted over the internet is a change of protocol - to TCP/IP, the internet protocol.

To send faxes over the oet, says Mr Emmerson, a company needs both a fax processor board and a fax gateway – a communications device - on its local area network server computer. The fax processor board turns a document into a standard computer-based fax for sending over PSTN. The fax gateway converts the fax so it can be sent over the net as a data file.

Local faxes are not cheaper over the net. So any solution needs to be able to handle both processes. For

company must install fax boards and compatible fax gateways at all its sites.

At present, different brands of fax gateway cannot work together. This could change, however, as gateways based on the Group 5 multimedia messaging standard start to appear - the standard should be finalised by early next year. Once Group 5 is established, the report says. telecoms companies and mternet service providers will all be offering global faxing services.

Mr Emmerson says companies should not wait until then, because they can benefit from internet faxing

Besides, Mr Emmerson adds, "an international fax may cost a few dollars to send, but the walk to the facsimile machine is the big ticket issue. On average, it takes 10 minutes to send a one-page fax this way. It would only take a few seconds using internet fax."

part of the rapid growth in film merchandising. In the US the latest are dinosaur cards from MCI featuring monsters from The Lost World, Spielberg's Jurassic Park sequel.

Staying in touch: Theres Water engineers conduct a routine inspection of an underground reservoir in south London with a capacity of 18m gallons. The company uses mostly analogue mobiles, but upgrades tend to be to digital

Thames Water cuts phone bill by £2m

King is always looking for savings, but not at the expense of quality

You can see why Tony King, telecoms I manager at Thames Water, is one of three finalists for Telecom Manager of the Year*.

Mr King took over telecoms at Thames Water three years ago, combining the communications activities of 12 companies. In the process he managed to shave £2m off the BT phone

> He is always on the lookout for cost savings, but not at the expense of quality, or of forcing solutions that staff do not want.

The company uses mostly analogue mobiles, but upgrades tend to be to digital. After finding thet it took two temporary and one full-time member of staff to manage the company's mobile phones Mr King

Now Vodafone company Vodac manages Thames Water'a mobiles. This saves on staff costs.

and chores such as informing the Inland Revenue of who has phones. Vodac also provides monthly itemised bills, which show which phones are seldom used - these users are switched to the low-user tariff. Thames Water also has 500 to 400 Celinet mobiles to keep Vodafone on

Thames Water staff use Psion organisers to record meter readings. At home they slot them into a cradle which downloads the data. Mr King is a great believer Thames Water has 2,500 mobiles and 2,250 pagers.

For fixed telephony, be has put in an integrated voice and data network using the frame relay protocol to connect local-area networks. Remote pump stations connect to the network via X.25 packet-switching. The

network also handles some of Thames Water's telemetry needs for leakage monitoring and surveillance - Mr Ring was part of a team that put fibre optic lines in water

BT is the company's main supplier for voice, although Thames Water uses cabla in some areas and Cable & Wireless Communications (formerly Mercury) for

long-distance national calls. Voice compression software is used to cut ont the silences in conversations, reducing voice traffic by 20 per cent to 40 per cent.

Mr King, who spends £17m a year on telecoms for Thames Water, is a member of the Telecom Managers Association. He says the biggest issues are "service quality and getting the best value for the business. I'm a businessman, then a telecoms manager".
